

OIL CONSERVATION COMMISSION
HOBBS, NEW MEXICO

March 10, 1964

Continental Oil Co.
Box 460
Hobbs, New Mexico

Gentlemen:

Forms C-104 and C-110 covering the Blinebry completion on your Nolan No. 3 located in Unit K of Section 11, T-21-S, R-37-E are being approved this date.

According to our analysis the base of the Blinebry Pool will be at 5968' in this well and you are perforated to a depth of 6047', which means that your completion crosses into the zone of "no nomenclature" between the Tubb and Blinebry Pools. However, I am aware of your pending application to include this zone of "no nomenclature" into the vertical limits of the Blinebry Pool. Therefore, this completion is approved on the assumption that you will have a successful presentation of your request.

If your request is not granted it will be necessary that all perforations below 5968' be squeezed or blocked off in some manner.

Yours very truly,

OIL CONSERVATION COMMISSION

Joe D. Ramey
Supervisor, District 1
