Gentlemen:

From a telephone conversation with you we understand that Skelly Oil Company is taking the gas from your Turner No. 16 located in Unit M of Section 22, T-21-S, R-37-E, which has been recompleted as a San Andres gas well, and that it is going through a commingled facility with other wells on this lease. Since the period of time that was granted to test the well in this manner has expired, the well must be shut in until a separate meter has been set and we have been so advised by Skelly.

Yours very truly,

OIL CONSERVATION COMMISSION
