OIL CONSERVATION COMMISSION, Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the Skelly Oil Company E. A. Sticher Well No. 3 in NW/4 SW/4 of Sec. 4, T. 22S, R. 37E, N. M. P. M., Lea County. Transfer from Brunson to Drinkard Field.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

This well was completed in December, 1946, in the Ellenberger pay zone (Brunson Field) for an IP of 365 bbls. 24 hrs., and has been producing from that section since completion. Recently we drilled our E. A. Sticher No. 1, located on the same 40-acre unit as No. 3, deeper to the Drinkard zone, but this zone was not productive, therefore, it was drilled on to the Brunson where commercial production was encountered. In drilling No. 3 tests were made in the Drinkard zone, and the well flowed approximately 15 bbls. per hr. on drill stem test. In view of the fact that this well apparently will produce oil in the Drinkard zone, it is our intention to plug it back from present TD of 8030' to approximately 6600', perforate 7" OD casing from around 6550' to 6590' and put the well to producing. In plugging back mud, cement and plastic will be used, with a bridge plug set at approximately 6600' and about 10' of plastic on top.
