Re: Elliott A-15 Waterflood Project
Penrose Skelly-GB Pool

Gentlemen:

Your Elliott A-15 Well #2-0 Sec. 15, T22S, #37E, has been shut in since September 1988, and a TA status has been requested. However, it appears you are still using the Elliott A-15 Well #1-P for water injection. Since it appears this is no longer an active waterflood project and the well is serving as a disposal well for this lease it would be appropriate to have it reclassified to a water disposal well.

This reclassification can be done administratively by letter to our Santa Fe office.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
