Re: Application for Non-Standard
Gas Proration Unit

Gentlemen:

Amerada Petroleum Corporation requests application of a non-standard gas proration unit to be assigned to its State LM^{NT} No. 2, 1980' FNL, 1980' FNL, Section 36, T-23-S, R-36-E, Lea County, New Mexico. The well is presently producing from the Jalmat Gas Pool with the NW/4 Section 36 dedicated as its acreage, giving an acreage factor of 1.00. It is requested to increase the acreage factor to 1.75 by adding the W/2 and SE/4 of the NE/4, Section 36, T-23-S, R-36-E to its present acreage.

The W/2 and SE/4 of the NE/4, Section 36 was formerly assigned to Amerada's State LM^{NT} No. 5, a Jalmat Gas - Langlie-Mattix Oil dual located 660' FNL and 660' FNL, Section 36, T-23-S, R-36-E. A recent stimulation treatment in the Jalmat Gas Zone reduced the gas oil ratio to such an extent that its classification has been changed to an oil zone with the NE/4, NE/4, Section 36 attributed as its acreage.

By copy of this application in registered mail, all offset operators are being notified of our request.

Application for an oil-oil dual in No. 5 has been filed.

Yours very truly,

D. C. Capps
