

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS NOTICES

Submit this notice in triplicate to the Oil Conservation Commission or its proper agent before the work specified is to begin. A copy will be returned to the sender on which will be given the approval, with any modifications considered advisable, or the rejection by the Commission or its agent, of the plan submitted. The plan as approved should be followed, and work should not begin until approval is obtained. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of notice by checking below:

NOTICE OF INTENTION TO TEST CASING SHUT-OFF	<input checked="" type="checkbox"/>	NOTICE OF INTENTION TO SHOOT OR CHEMICALLY TREAT WELL	
NOTICE OF INTENTION TO CHANGE PLANS		NOTICE OF INTENTION TO PULL OR OTHERWISE ALTER CASING	
NOTICE OF INTENTION TO REPAIR WELL		NOTICE OF INTENTION TO PLUG WELL	
NOTICE OF INTENTION TO DEEPEN WELL			

Hobbs, New Mexico
Place

June 8, 1936
Date

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the _____

Skelly Oil Company Eugene Coates Well No. 5 in NE, SE
Company or Operator Lease
of Sec. 3, T. 24, R. 36, N. M. P. M., Cooper Field,
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

Set 9-5/8" OD casing at 2921' with 775 sacks of cement. Will let stand for 72 hrs then drill cement plug and test for casing shut off

DUPLICATE

JUN 10 1936

Approved _____, 19____
except as follows:

Skelly Oil Company
Company or Operator
By [Signature]
Position District Superintendent

Send communications regarding well to

Name Skelly Oil Company
Address Drawer "D", Hobbs, New Mexico

OIL CONSERVATION COMMISSION,

By [Signature]
Title Oil & Gas Inspector

PHYSICS 551

PHYSICS 551 is a course in quantum mechanics. It covers the basic principles of quantum mechanics, including wave functions, operators, and the Schrödinger equation. The course is designed for students who have completed a course in classical mechanics and are interested in the foundations of quantum physics.

PHYSICS 551: QUANTUM MECHANICS

The course is divided into several sections, each covering a different aspect of quantum mechanics. The first section covers the basic principles of quantum mechanics, including wave functions and the Schrödinger equation. The second section covers the theory of angular momentum and the addition of angular momenta. The third section covers the theory of perturbation theory and the approximation methods used in quantum mechanics.

The course is taught by Professor [Name], who is an expert in the field of quantum mechanics. He has published numerous papers on quantum mechanics and has supervised many graduate students in the field.

The course is a required course for students in the Physics Department who are interested in pursuing a Ph.D. in physics. It is also a valuable course for students who are interested in the foundations of quantum physics and who want to gain a deeper understanding of the quantum world.

For more information, please contact the Physics Department at [Address].
