

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning operations, results of shooting well, results of test of casing shut-off, result of plugging or other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

Table with 4 rows and 2 columns for reporting categories: REPORT ON BEGINNING DRILLING OPERATIONS, REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL, REPORT ON RESULT OF TEST OF CASING SHUT-OFF, REPORT ON RESULT OF PLUGGING OF WELL, and REPORT ON REPAIRING WELL, REPORT ON PULLING OR OTHERWISE ALTERING CASING, REPORT ON DEEPENING WELL.

MICROFILM REPORTS ON WELLS

This report was prepared in accordance with the provisions of the Act of March 3, 1909, (35 Stat. 1455), which authorized the Secretary of the Interior to cause to be made a geological survey of the public lands of the United States, and to report thereon to the President.

Information relative to this report may be obtained from:

Director, Bureau of Geology and Mineral Resources, Santa Fe, N. M.	State Geologist, New Mexico, Santa Fe, N. M.
Chief, Division of Geology, Santa Fe, N. M.	Chief, Division of Mineral Resources, Santa Fe, N. M.
Chief, Division of Water Resources, Santa Fe, N. M.	Chief, Division of Oil and Gas, Santa Fe, N. M.

The following is a list of the wells which have been drilled in the area covered by this report, and the results obtained therefrom. The wells are listed in the order in which they were drilled, and the results are given in the order in which they were obtained.

1. Well No. 1, located in the northeast corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 150 feet, and yielded a flow of water at a rate of 100 gallons per minute. The water is of good quality, and is suitable for domestic use.

2. Well No. 2, located in the southwest corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 120 feet, and yielded a flow of water at a rate of 80 gallons per minute. The water is of good quality, and is suitable for domestic use.

DETAILS OF ACCOUNT OF WELLS AND RESULTS OBTAINED

The following is a detailed account of the wells and the results obtained therefrom. The wells are listed in the order in which they were drilled, and the results are given in the order in which they were obtained.

1. Well No. 1, located in the northeast corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 150 feet, and yielded a flow of water at a rate of 100 gallons per minute. The water is of good quality, and is suitable for domestic use.

2. Well No. 2, located in the southwest corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 120 feet, and yielded a flow of water at a rate of 80 gallons per minute. The water is of good quality, and is suitable for domestic use.

The following is a detailed account of the wells and the results obtained therefrom. The wells are listed in the order in which they were drilled, and the results are given in the order in which they were obtained.

3. Well No. 3, located in the northwest corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 100 feet, and yielded a flow of water at a rate of 60 gallons per minute. The water is of good quality, and is suitable for domestic use.

4. Well No. 4, located in the southeast corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 80 feet, and yielded a flow of water at a rate of 40 gallons per minute. The water is of good quality, and is suitable for domestic use.

The following is a detailed account of the wells and the results obtained therefrom. The wells are listed in the order in which they were drilled, and the results are given in the order in which they were obtained.

5. Well No. 5, located in the northeast corner of Section 16, Township 16N, Range 10E, County of Santa Fe, State of New Mexico. This well was drilled to a depth of 60 feet, and yielded a flow of water at a rate of 20 gallons per minute. The water is of good quality, and is suitable for domestic use.
