DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a well for gas (or oil) to an approximate depth of 3100 feet with rotary tools. Proposed casing and cementing program is as follows:

- 8 5/8" - 600 feet (or in Red Bed) - cement to be circulated to surface
- 5 1/2" - 3100 feet (or total depth) - cemented with 300 sacks.

This notice supercedes notice to drill covering well No. 1 Elliott dated July 28, 1953. Surveyor's plat was filed with that notice.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
