17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On July 6, 1983 the rotary rig was moved off after having set casing. The well was logged, tubing run, a packer set, and the Tubb zone was perforated from 6355' to 6357'. After swabbing, well was acidized using 250 gal. of 15% mud acid. Well again was swabbed, and a second acid job using 750 gal. of 15% HCl was performed. After another swabbing, rods and pump were run and pumping commenced on 7/27/83. Production has slowly increased to 25 BBL of oil and 165 BBL of water per day as of 8/18/83.
