The elevation of the derrick floor above sea level is 3467 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

At TD 5080', set a cement plug from 5060-4920, from 4760-4700, from 1159-1100, from 465-365, and a 15 sack plug at surface, using mud between all plugs. Used a 4 foot surker with well location and identification. 414' of 24# 8-5/8" casing with 150 ex cement circulated was left in hole. Location is cleaned up and ready for inspection.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
