Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface bearings and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Well was dual Blineby-Tubb in accordance with New Mexico Oil Conservation Commission Order DC 844 dated 11-25-59. On May 18, 1972, the Oil Conservation Commission issued Administrative Order #DMC-113 authorizing down-hole commingling of the Blineby and Tubb in the common well bore. Commingling was effected by a hole in the long string of tubing above the packer, as indicated on the attached diagram. The unused string of tubing will be removed when convenient. Further attached are copies of (1) Letter dated 4-26-72 addressed to Oil Conservation Commission requesting "Down-Hole Commingling" in accordance with Rule 303-C; and (2) Letter dated 5-18-72 addressed to Westates from Secretary-Director of the New Mexico Oil Conservation Commission granting the above requested commingling.

18. I hereby certify that the foregoing is true and correct
