NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Cliff Hicks, being of lawful age and having full  
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by GEO Vann, Inc. in the capacity of  
Vannsystem Specialist, that on April 15,, 1982

I personally supervised the setting of a Guiberson 7" UNI VI Packer  
Make & type of packer

in Santa Fe Energy, Carlson B,  
Operator of well Lease name

Well no. 25 #3 located in the Justis field,

Lea county, state of New Mexico, at a subsurface depth of

6135' feet, said depth measurement having been furnished me by

Thru tubing gamma ray log correlated to open hole log.;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
