Justis (Tubb-Drink) **Lea County** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3170** ft. **est.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We now propose to set 7" casing to T.D. instead of 5 1/2" casing and bring cement behind 7" casing back to bottom of 9 5/8" casing set at 1137' where cement was circulated.

This form supercedes Form 9-331a dated June 21, 1963.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
