Re: Site Work Plan
Eunice Booster Station Leaksite
Sec 27-Ts21s-R36e

New Mexico Oil Conservation Division (NMOCD) is in receipt of the C-141 (Initial Report) and your Site Work Plan dated November 26, 1997 for the above referenced site.

Your work plan is hereby approved subject to the following additional conditions:

1. OCD APPROVAL CONDITIONS FOR REMEDIATION OF LEAKS AND SPILLS. (ATTACHED)
2. EOTT will provide to the NMOCD quarterly reports (every 90 days) that consist of one composite sample of the Bio-area. The sample shall be tested for TPH (418.1) and BTEX (8020).
3. EOTT shall contact the NMOCD Environmental Bureau in Santa Fe to determine if the Eunice Station shall be required to obtain a Discharge plan pursuant to the WQCC rule and regulations. EOTT shall copy the NMOCD District I office on all correspondence.

If you require any further information or assistance please do not hesitate to call (505-393-6161) or write this office.

Sincerely Yours,

Wayne Price-Environmental Engineer

cc: Chris Williams-NMOCD District I Supervisor
Roger Anderson-Environmental Bureau Chief, Santa Fe, NM
NMSLO-Hobbs office.

Attachments- OCD Approval conditions

OCD APPROVAL CONDITIONS
FOR
REMEDIATION OF LEAKS AND SPILLS

1. The following remedial actions will be performed in accordance with OCD's August 13, 1993 "GUIDELINES FOR REMEDIATION OF LEAKS, SPILLS AND RELEASES":
 - a. Vertical and horizontal extent of contamination will be determined either prior to, during or upon completion of remedial actions.
 - b. Contaminated soils will be remediated to the OCD's recommended levels or a risk assessment will be provided which shows that an alternate cleanup level is protective of surface water, ground water, human health and the environment.
 - c. Final soil contaminant concentrations will be determined upon completion of remedial actions.
 - d. Soil samples for verification of completion of remedial actions will be sampled and analyzed for benzene, toluene, ethylbenzene, xylene and total petroleum hydrocarbons.
2. All wastes removed from a specific site will be disposed of at an OCD approved facility.
3. The OCD Santa Fe Office's Environmental Bureau Chief and the OCD Hobbs District Office will be notified within 24 hours of the discovery of ground water contamination related to remedial actions.
4. Upon completion of all remedial actions, a final remedial action report containing a description and the results of all remedial actions will be submitted to the OCD for approval. The report will include the concentrations and application rates of any materials or additives used to enhance bioremediation of the contaminants and the final concentrations of any soils landfarmed onsite or the final disposition of soils removed from the site. To simplify the approval process, the OCD requests that the final remedial action report be submitted only upon completion of all remedial activities including onsite remediation or landfarming of contaminated soils.
5. All original documents will be submitted to the OCD Hobbs Office for approval with copies provided to the OCD Santa Fe Office.
6. OCD approval does not relieve you of liability should remedial activities determine that contamination exists which is beyond the scope of the work plan or if the actions fail to adequately remediate contamination related to your activities. In addition, OCD approval does not relieve you of responsibility for compliance with other federal, state or local laws and regulations.
