APPLICATION TYPE:

☐ Pool Commingling ☒ Lease Commingling ☐ Pool and Lease Commingling ☒ Off-Lease Storage and Measurement (Only if not Surface Commingled)LEASE TYPE: ☐ Fee ☒ State ☒ Federal & Navajo AllottedIs this an Amendment to existing Order? ☒ Yes ☐ No If "Yes", please include the appropriate Order No. CTB-560-D

Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling

☒ Yes ☐ No**(A) POOL COMMINGLING**

Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production		Calculated Value of Commingled Production	Volumes

(2) Are any wells producing at top allowables? ☐ Yes ☐ No(3) Have all interest owners been notified by certified mail of the proposed commingling? ☐ Yes ☐ No.(4) Measurement type: ☐ Metering ☐ Other (Specify)(5) Will commingling decrease the value of production? ☐ Yes ☐ No If "yes", describe why commingling should be approved**(B) LEASE COMMINGLING**

Please attach sheets with the following information

(1) Pool Name and Code. Basin Fruitland Coal (71629)(2) Is all production from same source of supply? ☒ Yes ☐ No(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No(4) Measurement type: ☒ Metering ☒ Other (Specify) Each well will be equipped with an allocation meter or an approved method of alternative measurement**(C) POOL and LEASE COMMINGLING**

Please attach sheets with the following information

(1) Complete Sections A and E.

(D) OFF-LEASE STORAGE and MEASUREMENT

Please attached sheets with the following information

(1) Is all production from same source of supply? ☒ Yes ☐ No See Attachment No. 2

(2) Include proof of notice to all interest owners. See Attachment No. 3 & 8

(E) ADDITIONAL INFORMATION (for all application types)

Please attach sheets with the following information

(1) A schematic diagram of facility, including legal location. See Attachment No. 3 & 8

(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved. Attachment No. 1

(3) Lease Names, Lease and Well Numbers, and API Numbers. See Attachment No. 2

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Re: Application to surface commingle and for the Off-Lease
Measurement/sale of produced natural gas for wells
to be added to Dugan Production's Sesamee Street
Gas Gathering System
San Juan County, New Mexico

Dear. Ms. Sandoval, Mr. Fields, Ms. Garcia-Richard, and Ms. Joe,

Dugan Production Corp. is seeking your agencies approval to expand Dugan Production Corp.'s Sesamee Street Gas Gathering System (SSGS). Dugan recently acquired a new asset and, after further review and analysis, determined that by combining the existing gathering systems, Dugan would be able to minimize costs, maximize production, reduce greenhouse gas emissions, and reduce our operational footprint.

We are requesting approval for surface commingling, off-lease measurement, and beneficial off-lease use of produced gas. At this time Dugan has approval for such operations for 220 wells approved for the SSGS. We are proposing to combine Dugan's SSGS with Juniper Resources gathering system located nearby. This commingling action will add 120 wells to the SSGS. To ensure accurate allocation of production each well will be equipped with an allocation meter to ensure production is allocated accurately to each well.

NMOCD Form 107-B is attached for this application to add wells to the gathering system. These 120 wells were recently acquired from Juniper resources (at the time of this writing the change of operator was in process). Prior to this Dugan's wells were approved to operate as a gathering system by the NMSLO, NMOCD and BLM. The NMOCD issued CTB-560-D to formally authorize the operation of the gathering system. The BLM in turn issued a letter permitting the commingling allocation approval (CAA). Juniper's wells also were previously permitted to function as a gathering by similar approvals. Previous operators received OCD approval under CTB-528 and CTB 556 to operate the gathering system. Similar approvals were granted by the BLM and NMSLO.

A summary presenting the wells and production for each pool is presented on Attachment No. 4. Gas sales for the SSGS will occur at 5 separate sales meters/FMPs. Attachment #7 details the locations of the sales meters as well as the meter numbers. There was a sixth meter but at this time the facility is not in service.

We are also requesting the NMOCD to continue to include a provision in their order that for future additions to the SSGS, only the interest owners in the wells being added need to be notified, providing that it is reasonably certain that the proposed additions will not adversely affect the interest owners in the wells already approved for the gathering system. This provision will be very helpful and will significantly reduce the work effort necessary to add future wells to the gathering system.

The SSGS was installed by DPC and was approved for operation in August of 2005. Initially there 13 wells added to the gathering system. Later in February of 2009 122 wells were added to the gathering system. A second CDP was added in 2012. The system was further expanded in 2017 when newly drilled wells were added to the gathering system. Dugan seeks to add 120 additional wells with this application. Currently there are 220 wells approved for the SSGS. Production currently averages a total of 8898 mcf/d for an overall average of 53 mcf/d per well. Gas is allocated via an allocation meter located at each well site. At the time of this writing none of the wells being added to the system are connected to the SSGS. The wells are currently being produced through the Juniper gathering system.

We stress there is an urgency associated with this application. As the world has been disrupted by Covid-19 and global hydrocarbon prices are at record lows it is essential this gathering system approval be granted in a timely fashion. By granting approval to consolidate the system Dugan will be able to lower operating costs via elimination of excess compression horsepower which will save Dugan money and in turn improve the economics for the wells included in the gathering system which in turn will generate more royalty for the people of the United States, New Mexico and mineral owners on allotted lands. Once these approvals are granted Dugan will connect the systems on an existing ROW and begin selling gas as quickly as possible. We ask that this application be processed as quickly as possible.

A description of each attachment has been included for clarity and informational purposes:

Attachment No. 1 presents maps of the SSGS with the wells and proposed locations to be added highlighted in blue. The leases, meters, compression and water disposal facilities are also identified on the map.

Attachment No. 2 presents information for the wells currently approved and the wells to be added to the SSGS. At the time of this application there are 220 wells approved to be connected to the SSGS. Dugan seeks approval for 120 more wells for the system.

Attachment No. 3 presents the interest ownership for the wells to be added to the SSGS.

Attachment No. 4 presents a summary of the pools, wells, production and leases for the SSGS. With this application Dugan is adding 15 Federal leases, 6 state lease and 23 Navajo Allotted leases to the gathering system.

Attachment No. 5 presents the allocation procedure being used for the SSGS. All requirements set forth in 43 CFR 3173 & 43 CFR 3175 will be followed to ensure that production can be accurately measured and verified.

Attachment No. 6 presents an economic comparison of connecting the proposed wells to the existing SSGS as opposed to operating each system as presently permitted. This analysis was done to illustrate the benefits connecting wells to the gathering system and to satisfy requirements set forth in 43 CFR 3173.

In addition to increasing the value of the asset there is an additional component by eliminating surface facility foot prints through the elimination of excess compression as well as eliminating engine emissions that potentially contribute to climate change.

Attachment No. 7 presents facility diagrams for Compression and Salt Water Disposal facilities needed to operate the SSGS and Juniper gathering systems. Water is piped to each SWD. This greatly optimizes operational efficiency as well as eliminates water hauling traffic and vehicle emissions.

Since the water disposal and central compression are a critical part of operating our gathering systems, we are requesting that the fuel gas needed to operate the equipment be considered a "beneficial off-lease use" for the wells connected to the gathering system.

Attachment No. 8 presents copies of our efforts to provide the required notice to all interest owners in the wells being added to the gathering system.

Page 4 of 206

In summary, Dugan Production is requesting approvals to:

1. Add 120 wells/locations to Dugan's Sesamee Street Gathering System.
2. Consolidate Juniper's gas gathering system into Dugan's Sesamee Street Gathering System.
3. Authorize the beneficial use of off-lease fuel used by equipment necessary to operate the gathering system.
4. Authorize the surface commingling of produced gas and produced water.
5. Authorize the off-lease measurement of gas.

Should you need additional information or have questions regarding this application, please feel free to contact me at the letterhead address.

Sincerely,

Kevin Smaka
Production Engineer

cc: NMOCD – Aztec; All Working Interest Owners

ATTACHMENT NO. 5**Allocation Procedures****Dugan Production Corp.'s****Sesamee Street Gathering System**

CDP Gas Sales Meter 1: Enterprise Field Services Meter #86238 located @ NESW 30, T-25N, R-10W

CDP Gas Sales Meter 2: Enterprise Field Services Meter #91083 located @ NWSE 2, T-24N, R-10W

CDP Gas Sales Meter 3: Enterprise Field Services Meter #98708 located @ SWSW 1, T-24N, R-10W

CDP Gas Sales Meter 4: Enterprise Field Services Meter #85645 located @ SWSW 34, T-25N, R-10W

CDP Gas Sales Meter 5: Enterprise Field Services Meter #88023 located @ NWNW 10, T-24N, R-10W

CDP Gas Sales Meter 6: Enterprise Field Services Meter #88108 located @ NWNE 5, T-24N, R-10W (not in service)
San Juan County, New Mexico

Base Data:

U = Water Volume (BWPD) from Periodic Well Test x days operated during allocation period.

V = Water Volume (bbl) at Central Battery during allocation period.

W = Gas Volume (MCF) from allocation meters at individual wells and central battery separator during allocation period.

X = Gas Volume (MCF) from CDP Sales Meter during allocation period.

Y = BTU's from CDP Sales Meter during allocation period.

Allocation Period is typically a calendar month and will be the same for all wells.

1. Individual Well Gas Production = A + B + C + D + E + F

A = Allocated Sales Volume, MCF = $(W / \text{SUM } W) \times X$

B = On lease fuel usage, MCF. Determined from equipment specifications, operating conditions and days operated.

C = Purged and/or vented gas from well and/or lease equipment, MCF. Calculated using equipment specifications and pressures.

D = Allocated fuel from gathering system equipment, MCF. The total fuel required to operate gathering system equipment will be allocated to the individual wells benefiting from the equipment using allocation factors determined by $(W / \text{SUM } W)$ for the wells involved.

E = Allocated volume of gas lost and/or vented from the gathering system and/or gathering system equipment, MCF. The total volume will be determined using industry accepted procedures for the conditions existing at the time of the loss. All volumes corresponding to liquid condensation within the gathering system will also be determined. The total volume lost and/or vented will be allocated to the individual wells affected using factors determined by $(W / \text{SUM } W)$.

F = Allocated gas sales volume (MCF) associated with water production = (A) in mcf for the central battery separator multiplied by a factor of $(U / \text{SUM } U)$ for wells delivering gas and water to the central battery separator.

2. Allocated Individual Well BTU's = $((W \times \text{Individual well BTU}) / \text{Sum } (W \times \text{individual well BTU})) \times Y$.

Individual well gas heating values to be determined in accordance with BLM regulations (currently Onshore Order No. 5).

3. Individual Well Water Production = Allocated production volume, bbl = $(U / \text{Sum } U) \times V$.

Attachment #7 Facility Diagrams

Typical Facility Diagram for compression facilities on Dugan's Sesame Street Gathering System

Salt Water Disposal Facility Diagram

dugan production corp.

January 26, 2021

Dear Stakeholder,

Dugan Production Corp. has applied to the NMOCD, BLM and NMSLO, for administrative approval to commingle production from the Basin Fruitland Coal gas pool and the Mancos gas pool. The gas will be gathered into a pipeline, compressed, and sold. This action will not harm, damage or devalue any of the potential production, pools or reservoirs involved in this commingling action.

If you have concerns, please contact me.

Kevin Smaka

ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
 [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
 [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
 [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
 [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
 [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

- [1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]
 [A] Location - Spacing Unit - Simultaneous Dedication
☐ NSL ☐ NSP ☐ SD
- Check One Only for [B] or [C]
 [B] Commingling - Storage - Measurement
☐ DHC ☒ CTB ☐ PLC ☐ PC ☐ OLS ☒ OLM
- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR
- [D] Other: Specify _____
- [2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or ☐ Does Not Apply
 [A] ☒ Working, Royalty or Overriding Royalty Interest Owners
 [B] ☐ Offset Operators, Leaseholders or Surface Owner
 [C] ☒ Application is One Which Requires Published Legal Notice
 [D] ☒ Notification and/or Concurrent Approval by BLM & SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
 [E] ☒ For all of the above, Proof of Notification or Publication is Attached, and/or,
 [F] ☐ Waivers are Attached

- [3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

- [4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

NC = not connected to gathering system

P = producing, includes wells temporarily shut in but able to produce

WOC = well drilled and casing cemented but not completed. Waiting on securing a gas sales connection.

2 - Production from October 2019 - October 2020

3 - The Sesamee Street Gas Gathering System currently has 147 wells or locations approved for surface commingling and off-lease measurement & sale of gas at two central delivery sales meters: (CDP 1) located in NESW (Unit K), Section 30, T-25N, R-10W on Enterprise Field Service Lateral 10A-1 at Enterprise Meter No. 86238.

(CDP 3) located in NWSE (Unit J), Section 2, T-24N, R-10W on Enterprise Field Services Lateral 10A-2 at Enterprise Meter No. 91083. Current regulatory approvals: for CDP 1 & 2 - BLM 3/13/17; NMSLO 3/23/17; NMOC D 3/23/17 (Commingling Order CTB-560-D)

(CDP 4) located in SWSW (Unit P), Section 34, T-25N, R-10W on Enterprise Field Services Meter No. 85645

(CDP 5) located in NWSE (Unit D), Section 10, T-24N, R-10W on Enterprise Field Services Meter No. 88023

(CDP 6) located in NWSE (Unit B), Section 5, T-24N, R-10W on Enterprise Field Services Meter No. 88108 - NOT IN SERVICE

4 - Well was initially approved for operation on the Goodtimes Gathering System and upon completion of expansions to the Sesamee Street Gathering System, was transferred from the Goodtimes to the Sesamee Street Gathering System on 6/13/07 (14 wells, Hop Sing 1, Hoss Com 90, Hoss 91, 91S & 92, Mary Lou 90 & 90S, Mary Lou Com 91 & 91S, Pierre Com 90, 90S, 91 & 91S, Road Runner 90).

5 - During 11/07, Dugan Production changed from using the letter "S" to designate a well as being a Fruitland Coal infill and initiated using unique numbers for each well. The wells using unique numbering and sharing a common spacing unit are:

Wells	Common Spacing Unit	Wells	Common Spacing Unit
Flo Jo 92 & 93	N/2 1-23N-11W	Marathon Com 90 & 91	N/2 4-23N-10W
Flo Jo 94 & 95	S/2 1-23N-11W	Martinez Begay Com 1 & 2	S/2 34-24N-10W
Helsink Com 90 & 91	S/2 9-23N-10W	Olympic 90 & 91	S/2 3-24N-11W
Hoss Com 93 & 94	W/2 11-23N-11W	Road Runner 90 & 91	S/2 36-24N-11W
Hoss Com 95 & 96	E/2 12-23N-11W	Road Runner 92 & 93	N/2 36-24N-11W
Hoss Com 96 & 97	W/2 12-23N-11W	Squaw Valley Com 90 & 91	S/2 4-23N-10W
Jim Thorpe Com 90 & 91	N/2 3-24N-10W	St. Louis Com 90 & 91	N/2 9-23N-10W

6 - NMOC D Administrative Order authorizing water disposal by underground injection: Flo Jo 8 SWD (SWD-1006), Frazzle 1 SWD (SWD-1048), Herry Monster 3 SWD (SWD-994), Mary Lou 1 SWD (SWD-884-B), St. Moritz 2 WD (SWD-1318); Juniper SWD #1 (SWD-806-B); Juniper SWD #4 (SWD-1010); Juniper West SWD #1 (SWD-1055); Tsah Tah SWD #1 (SWD-1087-A), Tsah Tah SWD #11 (SWD-1063-A), Tsah Tah SWD 36 (SWD-1053-B)

7 - PGA Unit wells, unit approved by BLM 8/27/12, agreement number NMNM128992X, effective 6/1/12; NMSLO approved 8/29/12. DPC acquired as of 11/1/16; operator change to DPC pending BLM approval. Juniper West 31 #31 acquired as of 11/1/16; operator change to DPC pending NMOC D C-145 approval.

8 - Juniper West 31 #31 acquired effective 11/1/16; operator change to DPC pending NMOC D C-145 approval which included PGA Unit wells and Juniper West 31 #31 well. 240A NSPU approved with APD.

9 - A portion of the lands involved in lease NM15654 have been committed to a unit agreement and the lease segregated. The lands committed to the unit agreement retains the serial number NM15654; the lands outside of the unit area received new lease number NM134598

10 - Phelps 15 #3 & 16 #3 acquired effective 10/1/15, OCD approved 1/26/16; previously named Kinbeto 15 #3 & 16 #3

11 - Waiting to be completed

Attachment No. 8
Interest Ownership Notification
Dugan Production Corp.'s Application dated 1/20/21
Proposing the Addition of 120 Wells to
Dugan Production's Sesamee Street Gathering System

Presenting evidence that interest ownership in the Sesamee Street Gathering System and the 120 wells proposed to be added have been given notice of Dugan's application, attached is:

1. A copy of Dugan's transmittal letter dated 1/20/21 used to send copies of the subject application to the overriding royalty interest owners in the 120 wells/locations being added to the Sesamee Street Gathering System under NMOCD Commingling Order CTB-560-D. Each overriding royalty interest owner was offered a copy of our application should they desire to receive one. Of the 120 wells/locations being added, Dugan Production will be the operator of all wells and holds 100% of the working interest in 106 of the wells, plus 87.50% in 2 of the wells, 77.50% in 2 of the wells, 75% in 2 of the wells, and 62.94438% in 2 of the wells. Six of the 120 wells are SWD wells. All letters were sent by certified mail with a return receipt requested. Upon receiving the receipts, copies will be sent to the NMOCD.
2. The royalty interest for all 120 wells/locations being added is either federal, Navajo Allotted, or state. There is no fee royalty. Since the subject application is addressed to the Farmington Field Office of the Bureau of Land Management (for federal leases), Federal Indian Minerals Office (for Navajo Allotted leases), and the New Mexico State Land Office (for state leases) a separate notice to royalty interest owners was not needed. The applications were sent by certified mail with a return receipt requested and upon receiving the receipts, copies will be sent to the NMOCD.
3. Copy of the "Affidavit of Publication" for our advertisement published in the Legal Notice section of the Thursday, December 31, 2021 issue of the Farmington Daily Times regarding the subject application to add 120 wells/locations to Dugan's Sesamee Street Gathering System. This publication was made in anticipation that of the notice mailed to the interest owners, there will be at least one either returned for some reason or the return receipt will be lost in the mail.

Wells currently approved for operation on
Dugan Production Corp. Sesamee Street Gathering System
(Address List Attached)

Re: Dugan Production's Application dated 1/19/21 to add 120 wells/locations to
Sesamee Street Gathering System
San Juan County, New Mexico

Dear Interest Owner,

According to our records, you have an interest (working, royalty, or overriding royalty) in one or more of the wells that is currently approved for the Sesamee Street Gathering System. The wells and interest owners are listed on the attached address list. You are receiving this notice for your information as required by the New Mexico Oil Conservation Division (NMOCD) and this matter does not require any action on your part. The subject application to the New Mexico Oil Conservation Division (NMOCD), Bureau of Land Management (BLM) and the State Land Office (SLO), requests their approvals to add 120 wells/locations to Dugan's Sesamee Street Gathering System. This will require surface commingling of gas production from the subject wells, plus the sale of gas at an off-lease central delivery sales meter (CDP). Each well will be equipped with a meter to measure production for allocation purposes. Attached for your information is a copy of Attachments No. 2 from the subject application which provides detailed information for all wells to be added and all wells currently approved. Since your interest is in wells that are currently approved, there are no costs chargeable to you. The wells to be added should not affect production from wells that are currently connected to the gathering system. This in turn means you will not see an increase or decrease in royalty generated.

This matter does not require any action on your part. Current NMOCD regulations require that all interest owners (wells in the existing system and those being added) receive notice of proposed additions to gathering systems. Included in Dugan's application, as permitted in the NMOCD rules, is a request that for future additions to the gathering system, only the interest owners in the wells to be added will require notification, provided the proposed additions will not adversely affect the existing wells. This will greatly simplify adding wells to the gathering system and should not affect the interests previously authorized to operate on the gathering system. Should you have any questions, need additional information, desire to receive a complete copy of our application, or have any concern as to our proposal, please let me know. Should you have an objection to our proposal, please let me know, or you can contact the New Mexico Oil Conservation Division directly at 1220 South St. Francis Drive, Santa Fe, NM 87505, and we would appreciate receiving a copy of your objection. Objections should be filed within 20 days after the NMOCD receives our application.

Sincerely,

Kevin Smaka
Regulatory Engineer

JAN 04 2021

Dugan Production Corp. is applying to the New Mexico Oil Conservation Division (NMOCD), the Bureau of Land Management (BLM), the Federal Indian Minerals Office (FIMO), and the New Mexico State Land Office (NMSLO), for regulatory approvals to add 118 wells Dugan Production's Sesamee Street Gathering System (SSGS). This will require the surface commingling of produced natural gas and water plus the off-lease measurement and sale of natural gas. There will not be any commingling of oil or condensate. Dugan Production is also requesting that wells connected to the gathering system also be approved for providing natural gas as a "beneficial use" to fuel equipment necessary to operate the gathering system. In addition, we are requesting that the notice provisions in the existing surface commingling order (CTB-560-A; CTB-560-B) be amended to remove the Basin Fruitland Coal completion reference since the producing pool is not a factor influencing the surface commingling and off-lease measurement approvals and that future additions, regardless of producing pool, should continue to allow notice only to the interest owners in the wells being added, provided it is reasonably certain that the proposed additions will not affect the wells previously authorized for the gathering system. The wells to be added and the existing gathering system are located within Sections 3-6, 9-10, 15-20, 27, 29-30 of T-23N, R-10W; plus Sections 1-4, 6-16, 21-24, 26-27 of Township 23N, Range 11W; plus Sections 1-12, 15-22, 26-34 of T-24N, R-10W; plus Sections 1-2, 11-15, 21-28, 31-36 of Township 24 North, Range 11 West, as well as Sections 32-36 of T25N-R10W; all located in San Juan County, New Mexico. All production to be commingled will come from the Basin Fruitland Coal gas pool and are operated by Dugan Production Corp. Any person holding an interest in any of these leases or wells may contact Dugan Production Corp. for additional information. Inquiries should be directed to Kevin Smaka at 505-325-1821 or by mail at P. O. Box 420, Farmington, NM 87499. Any objection or request for a formal hearing should be filed in writing with the NMOCD's Santa Fe Office within 20 days from the date of this publication. In the absence of objection, Dugan Production Corp. is requesting that the NMOCD approve its application administratively. The NMOCD's address is 1220 South St. Francis Drive, Santa Fe, NM 87505.

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION FOR SURFACE COMMINGLING
SUBMITTED BY DUGAN PRODUCTION
CORPORATION**

ORDER NO. PLC-735

ORDER

The Director of the New Mexico Oil Conservation Division ("OCD"), having considered the application and the recommendation of the OCD Engineering Bureau, issues the following Order.

FINDINGS OF FACT

1. Dugan Production Corporation ("Applicant") submitted a complete application to surface commingle and off-lease measure the gas production ("Application") from the pools, leases, and wells identified in Exhibit A.
2. To the extent that ownership is identical, Applicant submitted a certification by a licensed attorney or qualified petroleum landman that the ownership in the pools, leases, and wells to be commingled is identical as defined in 19.15.12.7(B) NMAC.
3. Applicant proposed a method to allocate the gas production to the pools, leases, and wells to be commingled.
4. Applicant proposed recovering gas production from produced water prior to its injection into the wells identified in Exhibit C.
5. To the extent that ownership is diverse, Applicant provided notice of the Application to all persons owning an interest in the gas production to be commingled, including the owners of royalty and overriding royalty interests, regardless of whether they have a right or option to take their interests in kind, and those persons either submitted a written waiver or did not file an objection to the Application.
6. Applicant provided notice of the Application to the Bureau of Land Management ("BLM") or New Mexico State Land Office ("NMSLO"), as applicable.
7. Applicant certified the commingling of gas production from the pools, leases, and wells will not in reasonable probability reduce the value of the gas production to less than if it had remained segregated.
8. Applicant stated that it sought authorization to surface commingle and off-lease measure, as applicable, gas production from the proposed well(s) identified in Exhibit D which produce from pools and leases identified in Exhibit A.
9. Applicant submitted or intends to submit one or more proposed communitization agreement(s) ("Proposed Agreement(s)") to the BLM or NMSLO, as applicable, identifying

the leases to be consolidated into a single pooled area ("Pooled Area"), as described in Exhibit B.

CONCLUSIONS OF LAW

10. OCD has jurisdiction to issue this Order pursuant to the Oil and Gas Act, NMSA 1978, §§ 70-2-6, 70-2-11, 70-2-12, 70-2-16, and 70-2-17, and 19.15.12 NMAC.
11. Applicant satisfied the notice requirements for the Application in accordance with 19.15.12.10(A)(2), (C)(4)(c), and (C)(4)(e) NMAC, as applicable.
12. Applicant's proposed method of allocation, as modified herein, complies with 19.15.12.10(B)(1) or (C)(1) NMAC, as applicable.
13. Commingling of gas production from state, federal, or tribal leases shall not commence until approved by the BLM or NMSLO, as applicable, in accordance with 19.15.12.10(B)(3) and (C)(4)(h) NMAC.
14. By granting the Application with the conditions specified below, this Order prevents waste and protects correlative rights, public health, and the environment.

ORDER

1. Applicant is authorized to surface commingle and off-lease measure gas production from the pools, leases, and wells identified in Exhibit A.

Applicant is authorized to surface commingle and off-lease measure, as applicable, gas production from wells identified in Exhibit D that produce from a pool and lease identified in Exhibit A.

2. This Order supersedes Orders CTB-528, CTB-528-A, CTB-556, CTB-556-A, CTB-556-B, CTB-556-C, CTB-560, CTB-560-A, CTB-560-B, CTB-560-C, CTB-560-D, and CTB-570.

For the wells identified in Exhibit A, this Order supersedes Orders PLC-389, PLC-389-A, OLM-84, and OLM-84-A.

3. For each Pooled Area described in Exhibit B, Applicant shall submit a Proposed Agreement to the BLM or NMSLO, as applicable, prior to commencing gas production. If Applicant fails to submit the Proposed Agreement, this Order shall terminate on the following day.
4. No later than sixty (60) days after the BLM or NMSLO approves or denies a Proposed Agreement, Applicant shall submit Form C-103 to OCD with a copy of the decision and a description of the approved lands, as applicable. If Applicant withdraws or the BLM or NMSLO denies a Proposed Agreement, this Order shall terminate on the date of such action, and Applicant shall cease commingling the production from the Pooled Area. If the BLM or NMSLO approves but modifies the Proposed Agreement(s), Applicant shall comply with the approved Agreement(s), and no later than sixty (60) days after such decision, Applicant shall submit a new surface commingle application to OCD to conform this Order with the

approved Agreement(s). If OCD denies the new surface commingle application, this Order shall terminate on the date of such action.

5. Applicant shall allocate the gas production to each lease within a Pooled Area in proportion to the acreage that each lease bears to the entire acreage of the Pooled Area described in Exhibit B.
6. The allocation of gas production to wells not included in Exhibit A but that produce from a pool and lease identified in Exhibit A shall be determined in the same manner as to wells identified in Exhibit A that produce from that pool and lease, provided that if more than one allocation method is being used or if there are no wells identified in Exhibit A that produce from the pool and lease, then allocation of gas production to each well not included in Exhibit A shall be determined by OCD prior to commingling production from it with the production from another well.
7. The allocation of gas production recovered from produced water prior to its injection into each injection well identified in Exhibit C shall be allocated back to each production well serviced by that injection well based on the ratio of water produced for that production well versus the total water produced for all production wells that are serviced by that injection well.
8. The gas production for each well identified in Exhibit A shall be separated and metered prior to commingling.
9. Applicant shall measure the commingled gas at a central delivery point or central tank battery described in Exhibit A in accordance with 19.15.19.9 NMAC, provided however that if the gas is flared, and regardless of whether OCD has granted an exception pursuant to 19.15.18.12(B) NMAC, Applicant shall report the gas in accordance with 19.15.18.12(F) NMAC.
10. Applicant shall calibrate the meters used to measure or allocate gas production in accordance with 19.15.12.10(C)(2) NMAC.
11. If the commingling of gas production from any pool, lease, or well reduces the value of the commingled gas production to less than if it had remained segregated, no later than sixty (60) days after the decrease in value has occurred Applicant shall submit a new surface commingling application to OCD to amend this Order to remove the pool, lease, or well whose gas production caused the decrease in value. If Applicant fails to submit a new application, this Order shall terminate on the following day, and if OCD denies the application, this Order shall terminate on the date of such action.
12. For wells included in Exhibit D that produce from a pool and lease identified in Exhibit A, Applicant shall submit Forms C-102 and C-103 to the OCD Engineering Bureau after the well has been approved to be drilled and prior to off-lease measuring or commingling oil or gas production from it with the production from another well. The Form C-103 shall reference this Order and identify the well and proposed method to determine the allocation of gas production to it.

13. Applicant shall not commence commingling oil or gas production from state, federal, or tribal leases until approved by the BLM or NMSLO, as applicable.
14. OCD retains jurisdiction and reserves the right to modify or revoke this Order as it deems necessary to prevent waste or protect correlative rights, public health, or the environment.
