Subject: Surface Commingling Application CTB-1042 DENIED
Date: Monday, December 12, 2022 10:15:51 AM

NMOCD has denied Surface Commingling Application CTB-1042 for the following reason(s):

- Failure to identify and demonstrate the “leases” proposed to be commingled; “leases” is defined by 19.15.12.7 C. NMAC

The applicant may re-submit a new application addressing the above concerns. Adequate notification of the new application shall be provided.

Subject: RE: surface commingling application CTB-1042

Mr. Banks,

Using the email chain associated with PLC-811, is it correct to assume that Burnett intends for the well below to be 1-1/2 miles long?

If so, a BLM approved change of plans making this adjustment from 1 mile to 1-1/2 mile will need to be submitted to the Division.

Additionally, I did not see a record of a CA for this well on the BLM's site and will need to see the packet

for it presuming that the intent is to allocate this well to a CA.

Subject: FW: surface commingling application CTB-1042

Mr. Banks,

Please see the email below.

Please note that failure to take steps to address each of the topics addressed in this email within 10 business days of receipt of this email may result in the Division rejecting the application requiring the submittal of a new application by the applicant once the topics have been fully addressed.

Subject: surface commingling application CTB-1042

Ms. Garvis,

I am reviewing surface commingling application CTB-1042 which involves a commingling project that includes the Gissler B 2 Central Tank Battery and is operated by Burnett Oil Company (3080).

Please confirm the intended spacing for the following well. The current record for this well has a proposed 1 mile long lateral rather than the 1.5 mile long lateral which seems to be depicted with the surface commingling application.

30-015-46407	Stevens B 13C 14D #1H	C D	13-17S-30E	96831
		A B	14-17S-30E	

Additionally, please provide the CA packet for this well as I do not see anything for it within the BLM system.
