Attachments: [image001.png](#)

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good Morning Dean,

I am sorry it took me so long to get an answer, a lot of folks traveling around for Spring Break and such.

I have confirmed with our facilities person that we are allocating by well test.

Please let me know if you have any more questions or need anything else.

Thank you,

Jennifer Smith

HSE Regulatory Affairs Coordinator

Subject: [**EXTERNAL**] Application ID: 320079; PLC-711-B add wells 2024 03 04

Be aware this external email contains an attachment and/or link.

Ensure the email and contents are expected. If there are concerns, please submit suspicious messages to the Cyber Intelligence Center using the Report Phishing button.

Ms. Smith,

I am reviewing the sundry referenced in the subject line of this email.

Within the text of the sundry is the language I have highlighted below in which Chevron is stating that it does not intend to make any changes to the allocation method approved in PLC-711-B. Later in this submission is a facility diagram which seems to indicate that Chevron's intent is to allocate via well test. Is this correct? Within future submissions of this nature, please substitute the highlighted sentence with one that states something like, "Allocation to these wells shall be done via well testing". For this instance, you may respond via email with either an affirmative to the allocation being done via well test or diversly provide the proposed allocation method if it is not well test.

The wells mentioned above will produce from a pool and lease identified in Exhibit A of the approved commingle (PLC-711B).

The Culebra Bluff 23 Central Tank Battery is located in the S2SE (UL: P), Sec. 23, T23S-R28E.
The Culebra Bluff 26 Compressor Station is located in Section 26, T23S R28E.

We will not make any changes to the approved allocation method approved in PLC-711B.

Please see the attached C-102s and updated Site Security Diagram for the CTB.
