ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

Peyton Warren,

The NSP application you have submitted for the 2 Black Pearl 7 19 Fed Com wells, there is some confusion on your referenced Pool Code for the NSP.

The pool code referenced in your application is stated as CODE NO. 24270.

That code identified as FEATHERSTONE;BONE SPRING, EAST [24270]

Not as Pearl; Bone Spring, South, as noted in your application.

Please clarify the pool. Which is the pool that these wells are seeking within the enlarge HSU?
