Subject: [EXT] Formal objection to injection well
Date: Friday, March 15, 2019 8:50:41 AM

Mr, Goetze-

Thank you for taking the time to speak with me this morning regarding my concerns about a proposed produced water injection well near my home.

Please consider this to be my formal objection to Solaris Water Misstream LLC's "Texas Ranger SWD No. 1" well.

My concern is primarily due to the following questions:

- 1- Has a geological survey for potable water aquifer impact been completed?
- 1a-What safety procedures/contingency plans are in place?
- 2-Does this well carry a bond in case of an emergency situation?
- 2a-Is that bond local?
- 3- What are the projected noise levels?
- 3a-What are the projected maximum decibel levels?
- 4-What is the projected traffic increase?
- 4a-Who is responsible for road repairs?
- 5-What are the projected hours of operation?
- 6-What kinds of safety features will be in place?
- 7-How will surface spillage be addressed?
- 7a-In case of (inevitable) toxic spillage, what measures will be employed for:
 - 7a1- clean up
 - 7a2-prevention of runoff
- 8-Will this site be equipped with air quality monitoring devices (it is understood H2S isn't really an issue with dump sites, but it is in the area)
- 9-Will this site be fenced?
- 10- Has there been an environmental impact survey completed?
- 11- Has there been an archeological survey for Native American importance completed?
- 12- Although this site is on private property, it will require maintenance and inspections. Who is responsible for these duties, and what are their frequencies?

I have additional questions which I will be directing to other agencies, however I believe the above list begins to address my concerns.

Thank you for your time.
