RE: MR NM Operating LLC
Request for Administrative Approval of Non-Standard Horizontal Spacing Unit

Longship Fed Com Wells
N/2 of Section 23, Township 17 South, Range 27 East
Eddy County, New Mexico
Red Lake; Glorieta-Yeso, Northeast Pool (Code 96836)

Dear Director Chang:

Pursuant to 19.15.16.15(B)(5) NMAC, MR NM Operating LLC ("MR NM"), OGRID No. 330506, respectfully requests administrative approval of a 320-acre, more or less, non-standard horizontal spacing unit ("NSP") comprised of the N/2 of Section 23, Township 17 South, Range 27 East, Eddy County, New Mexico. The Longship Wells target the Yeso formation and the pool within the proposed non-standard spacing unit is Red Lake; Glorieta-Yeso, Northeast (Pool Code No. 96836). MR NM plans to dedicate the NSP to the following horizontal wells (referred to collectively throughout as the "Longship Wells"):

- Longship Fed Com 1H (API No. 30-015-56778)
- Longship Fed Com 2H (API No. 30-015-56787)
- Longship Fed Com 3H (API No. 30-015-56788)
- Longship Fed Com 4H (API No. 30-015-56789)
- Longship Fed Com 5H (API No. 30-015-56790)

C-102s for the Longship Wells are attached as **Exhibit A**. Each well will comply with statewide setback requirements for the proposed non-standard spacing unit.

Division Rules authorize administrative approval of non-standard spacing units to prevent waste and protect correlative rights in conformance with 19.15.15.11(B) NMAC. MR NM is currently the operator of record and has voluntary joinder from working interest owners within the boundaries

of the proposed NSP by virtue of an underlying Joint Operating Agreement. MR NM seeks administrative approval of this NSP to allow for the efficient development of the spacing unit, optimal well spacing, and will call for only one surface facility, which will reduce surface disturbance, create cost efficiencies, prevent waste, and protect correlative rights.

Exhibit B is a plat for Sections 13 through 15 and 22 through 27 of Township 17 South, Range 27 East, that shows the Longship Fed Com NSP in relation to the adjoining tracts. Exhibit B also identifies the operators of the adjoining tracts and interest owners for the adjoining tract operated by MR NM.

MR NM is providing notice to all affected parties in the tracts that adjoin the proposed non-standard spacing unit, along with the State Land Office and the Bureau of Land Management. **Exhibit C** is a list that identifies all affected parties who were sent a copy of this application and attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application, along with the date the notice was sent, and a copy of the notice letter to affected persons.

In my opinion, approval of the NSP is in the best interest of conservation, prevention of waste and protection of correlative rights.

Thank you for your consideration. Should you have questions concerning this application, you may contact me at (214) 354-5414 or blake@mr-nm.com.

Sincerely,

Blake Simmons

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
