RE: Administrative Order SWD-2533 Extension of Injection Authority

Well: Denali SWD No.1
Surface location: 660 feet FSL 1980 feet FEL Unit O, Section 3, Township 16 South,
Range 28 East, NMPM, Eddy County, New Mexico
Order Date: January 30, 2025
Injection formations: Devonian Formation; 10,150 feet – 10650 feet

Dear Jerry W Sherrell,

Reference is made to your July 21, 2025, request on behalf of Mack Energy Corporation, (the "operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is one year after issuance of the order: January 30, 2026

It is the Division's understanding from your correspondence that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled in the one-mile Area of Review (AOR). Additionally, no new affected parties have been identified in the AOR. Therefore, the extension request could be reviewed administratively for approval.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is hereby extended until January 30, 2027.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for

SWD-2533: Extension of Injection Authority
Mack Energy Corporation Page 2 of 2

this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

8/13/2025

Albert Chang
Division Director
Oil Conservation Division

Good Morning,

I am attaching a letter request along with the letter Mack Energy received from Central Valley Electric. We are requesting this extension due to lack of electricity for our Denali SWD #1, SWD-2533. Thank you.

Re: Denali SWD #1
API No. 30-015-32444
SWD-2533

Dear Mr. Goetze:

Mack Energy Corporation (Mack) respectfully requests approval for an extension of one year for the UIC permit for SWD-2533(Issued 1/30/2025). Mack was notified by Central Valley Electric that Southwestern Public Service Company is restricting new load connections until they have completed upgrades to their transmission system. Anticipated completion in the second ½ of 2026.

Mack Energy is evaluating which wells we can drill and produce based on available power supply. The Denali SWD #1 is within the restricted area. We anticipate being able to drill the Denali late 2026. I am attaching a copy of the letter from Central Valley Electric.

Thank you for your consideration to this request. Should you have any questions regarding the above, please email me at jerrys@mec.com or call me at (575) 748-1288.

Sincerely,

MACK ENERGY CORPORATION

Wade Nelson, General Manager

April 4, 2025

Dear CVE Member,

Southwest Public Service Company (SPS) has recently imposed restrictions on the load that can be connected to Central Valley Electric Cooperative's "PCA" transmission interconnection point, which provides power to our easternmost four substations. Despite CVE's consistent submission of new load requests along with our standard load forecasts, SPS has analyzed the loads on their transmission system and abruptly determined that no more loads can be added until upgrades to their transmission infrastructure are completed, and a further load analysis is performed.

Additionally, SPS is evaluating their transmission capacity feeding our "8 Mile" transmission interconnection point, which serves another portion of our oil field distribution system. We are currently awaiting further data and clarification regarding the available capacity at this delivery point prior to making any new connections. Unfortunately, we do not have a timeline for this process, however we are actively working with various entities to assess specific power availability and explore alternatives in the event of limited capacity at this delivery point. Central Valley Electric Coop will provide updates as new information becomes available.

Sincerely,

Ransom Spencer

The project is moving forward. It would be helpful if you would submit a write up regarding the current AOR review. The images sent in response to my previous

request were several years old and do not provide confirmation that a recent AOR was performed.

Good Morning Jerry,

Missing from the request for extension and the supplemental information provided to date is a summary statement clarifying whether there are new affected persons or penetrations within the AOR.

Provide a signed summary statement, on company letterhead, regarding the recent findings of the current AOR and whether there are new affected person(s) within the AOR.

ERICA GORDAN
