Re: Application for Administrative Approval of Non-Standard Location
Bridges State #305, 30-025-37971

Cross Timbers Energy, LLC is requesting the approval of the unorthodox location for the above-mentioned vertical well. NOI approval has been given to plug back and recompleate the North Vacuum Abo Unit #305 to the Glorieta pool. The well is to be renamed to the Bridges State #305. Reference approved C-101 ID#491907.

Per the COAs of the approved NOI, and according to the special pool rules for Pool Code 62160, Cross Timbers Energy submits the attached information for an Application for Non-Standard Location. The existing well is less than the required 330' from the Q/Q line. The adjoining Units upon which the unorthodox location encroaches are located in T17S, R34E, Section 26, Units F, G, and K. NSL approval will allow the recompletion of the well to the Glorieta formation to increase production.

Details of the location:
API 30-025-37971
Vertical Well Surface Location J-26-17S-34E, 2600 FSL, 2630 FEL
Pool- Vacuum; Glorieta, Pool Code- 62160

Included here are the Administrative Application Checklist, C-102, Map, and Service List of Affected Parties: New Mexico State Land Office, Surface Owner and Mineral Owner.

Cross Timbers Energy, LLC. is the Operator and Working Interest Owner of the offset wells encroached upon. These tracts are subject to an existing oil and gas lease and notice to each Mineral Interest Owner is therefore not required.

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
