Good morning,

In response to your request for clarification, please see my comments below and the attached current/proposed wellbore diagram and surface owner notifications. Do let me know if you need any addition information or if I can be of further assistance.

Thank you

Thank you for your follow-up regarding the C-108 application for Carson Unit WDW No. 242. During our administrative review, we identified a few items that require clarification before we can proceed:

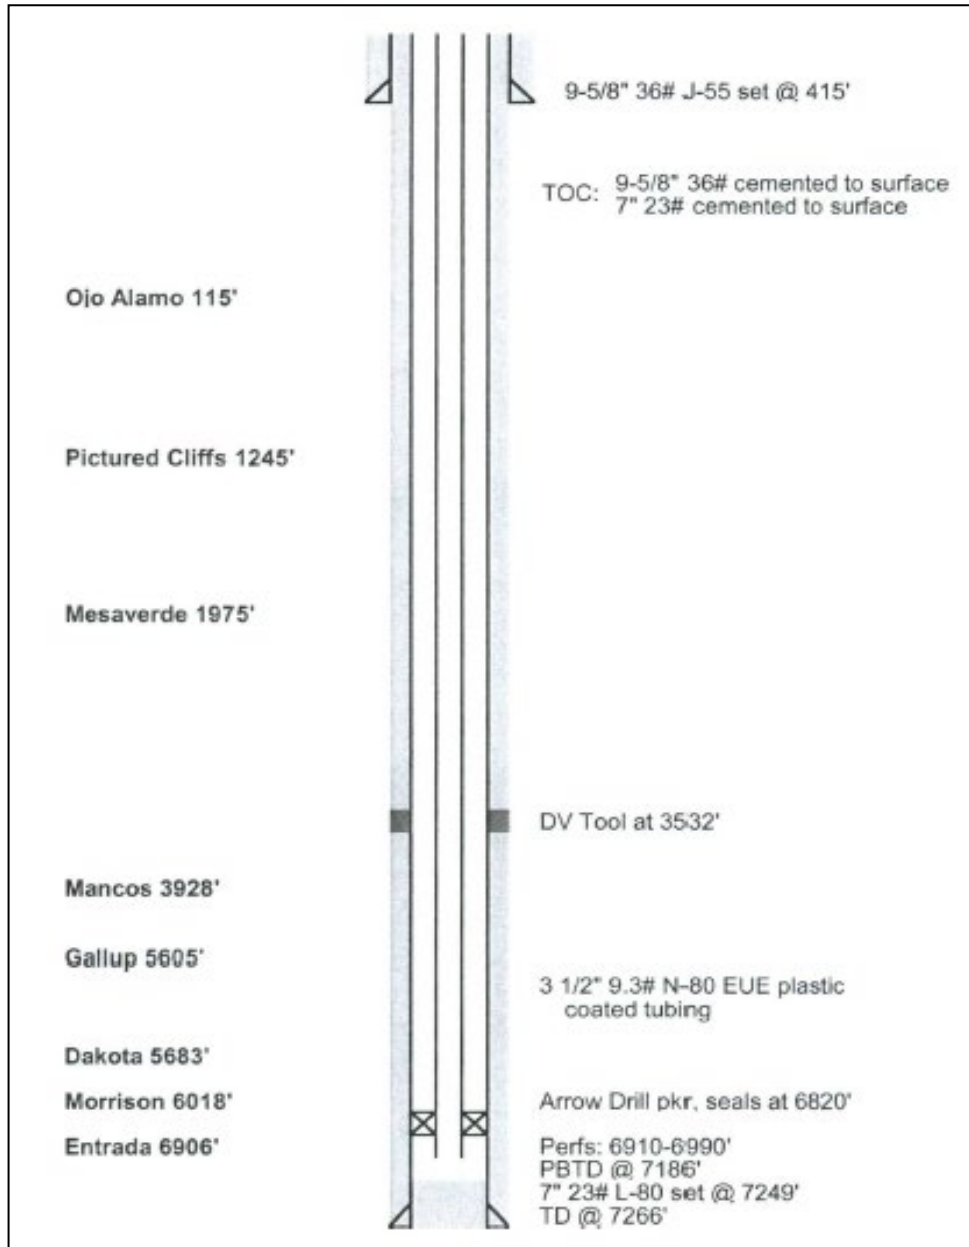

1. *Please confirm the primary operator for this well. As multiple operators are listed in the application, will Whiptail be the permittee of record for the UIC permit?*
 1. Yes, Whiptail Gallup Gathering, LLC OGRID 332293 will be the permittee of record.
 2. I believe they're in the process of seeking approval for an Operator Name Change to "Western Refining Pipeline LLC".
2. *Please provide an updated proposed wellbore diagram/design for Carson Unit WDW No. 242.*
 1. Current is proposed wellbore diagram and is attached to this email.
3. *Has the BLM (mineral owner) been properly notified of this application as required in 19.15.2.7(A)(7)(d) NMAC?*
 1. Yes, please attachment Surface Owner Notifications
4. *Please verify the notification of the surface owner as required in 19.15.26.8(B)(2) NMAC.*
 1. Yes, please see attachment Surface Owner Notifications

Once we receive this information, we will continue with the review.

Thank you, and please let us know if you have any questions or need further clarification.'

Re: *on behalf of* Whiptail Gallup Gathering, LLC

Notice of Application: Authorization to Inject and otherwise reinstate for saltwater disposal

30-045-32447 Carson Unit WDW #242, NENW Section 24-T25N-R12W, San Juan County, New Mexico;

Federal Lease NMSF 0078064.

Ladies and Gentlemen:

The purpose of this communication is to provide notice that Enduring Resources, LLC is making an application for administrative approval to dispose of produced water by means of underground injection on behalf of Whiptail Gallup Gathering, LLC. The subject well was previously authorized for saltwater disposal by Division Order SWD-933. This well went inactive for a period of 12 months and a new C-108 application is required. By re-permitting this existing produced water disposal well, the applicant can again service disposal needs of operators in the area. The Entrada Sandstone formation is the target of this C-108. Injection zone is between the depths of 6910' to 6990' below ground level.

Pursuant to Section 19.15.26 NMAC notice requirement associated with this application, any interested parties must file objections or requests for hearing with the New Mexico Oil Conservation Division, 1220 South St. Frances Drive, Santa Fe, NM 87505 within 15 days of the date of this letter.

Enclosed is a copy of the completed C-108 application filed with the NMOCD. Please do not hesitate to contact me at (505) 716-3297 or sford@enduringresources.com if you have any questions.

Regards,

Shaw-Marie Valadez

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Dave:

Per our phone call this morning, MPLX (Western Refining Pipeline), with the help of Enduring, has been attempting to renew the UIC Class permit for the Carson Unit WDW No. 242. Enduring is assisting because we previously owned and operated the WDW. As required by the NMOCD, BLM must receive notice as both a surface owner and mineral owner where the well is located. With this being the case, please find attached a letter from Shaw Marie Valadez to you providing notice about the renewal of the permit.

If you have any questions, please feel free to contact either Shaw or myself.

Regards,
Dave Brown
