Good morning, Cole. Thank you for providing the update on the deteriorating borehole conditions. Please proceed with the substitution of the cased-hole log suite provided in your email. With this drilling report, I will reiterate the need for proper landing and cementing of the 5.5 casing. And you have already confirmed the COA for the CBL. Please keep OCD informed is there are issues with the completion. Thanks. A copy of this email will be placed in the UIC permit for the record. PRG

Phil,

As I explained to Ward we have had hole stability issues from the get go on this well. We successfully TD'd the well at 9880' last night around 10:40 pm and are currently stuck on the trip out at 7800'.

In leu of running open hole triple combo logs we would like to get permission to run **Cased Hole Gamma, Neutron, and Sonic logs.**

I appreciate your time on this matter.

Thank You,

Cole Ponce
