Each of the above-mentioned wells are in the South Block of the Bell Lake Unit, and are to be drilled from three unique drilling pads, and instead of having production facilities on each drilling pad, KFOC intends to construct a separate production pad which will house a Central Tank Battery (CTB). Each of the eleven (11) wells will produce via their wellheads, but the production will immediately flow to the CTB on the production pad.

The Bell Lake South State Com 134H, 135H, 136H, 635H, & 636H are subject to BLM PA NMNM068292H & NMSLO CA 204492, while the residual six wells, Bell Lake South Unit 131H, 132H, 133H, 631H, 632H, 731H, are subject solely to BLM PA NMNM068292H. NMSLO CA 204492 covers the E/2 of Section 32 23S-34E and Lots 1-2, S/2 NE/4 of Section 5 24S-34E. The CTB is located in the N/2 SE/4 of Section 5 24S-34E, thus outside of NMSLO CA 204492, resulting in the need for off-lease measurement. The CTB will be named Bell Lake South Unit

CTB Northeast, or BLSU CTB NE.

Benefits of the CTB include decrease in simultaneous operations with the drilling rig and frac fleet, reducing the chances and risk of a safety-related incident. The CTB also reduces the environmental impact and surface footprint, with 11 wells sharing common surface equipment for production, where applicable based on ownership.

This notice is intended to replace KFOC's prior notice of its intention to seek a surface commingling and off-lease measurement application for the subject wells.

Enclosed please find KFOC's application as well as supporting documentation for the subject application. Please be aware that this shall serve as formal notice for the subject application and in the event you should have any questions or concerns please contact the undersigned within 20 days of receipt of this letter at [BrendonK@KFOC.net](mailto:BrendonK@KFOC.net) or 918-491-4431.

Each of the above-mentioned wells are in the South Block of the Bell Lake Unit, and are to be drilled from three unique drilling pads, and instead of having production facilities on each drilling pad, KFOC intends to construct a separate production pad which will house a Central Tank Battery (CTB). Each of the eleven (11) wells will produce via their wellheads, but the production will immediately flow to the CTB on the production pad.

The Bell Lake South State Com 134H, 135H, 136H, 635H, & 636H are subject to BLM PA NMNM068292H & NMSLO CA 204492, while the residual six wells, Bell Lake South Unit 131H, 132H, 133H, 631H, 632H, 731H, are subject solely to BLM PA NMNM068292H. NMSLO CA 204492 covers the E/2 of Section 32 23S-34E and Lots 1-2, S/2 NE/4 of Section 5 24S-34E. The CTB is located in the N/2 SE/4 of Section 5 24S-34E, thus outside of NMSLO CA 204492, resulting in the need for off-lease measurement. The CTB will be named Bell Lake South Unit

CTB Northeast, or BLSU CTB NE.

Benefits of the CTB include decrease in simultaneous operations with the drilling rig and frac fleet, reducing the chances and risk of a safety-related incident. The CTB also reduces the environmental impact and surface footprint, with 11 wells sharing common surface equipment for production, where applicable based on ownership.

This notice is intended to replace KFOC's prior notice of its intention to seek a surface commingling and off-lease measurement application for the subject wells.

Enclosed please find KFOC's application as well as supporting documentation for the subject application. Please be aware that this shall serve as formal notice for the subject application and in the event you should have any questions or concerns please contact the undersigned within 20 days of receipt of this letter at [BrendonK@KFOC.net](mailto:BrendonK@KFOC.net) or 918-491-4431.
