Longfellow Energy, LP

Nieuwendyk 28 SWD No.1

SWD-2674

## **Clarification on Injection interval.**

- Concurrent injection into the Lower Wolfcamp and Cisco-Canyon will not be approved by OCD. As an alternative, initial injection will be limited to Cisco-Canyon. If the Cisco-Canyon disposal interval pressures-up, it will be plugged-back and the injection interval will be moved up hole to perforate and inject into the Lower Wolfcamp Formation.
- A Statement on the lack of hydraulic connection between the disposal interval and Underground Sources of Drinking Water (USDW) is contained on page 42/62 of the Initial C-108 Application

Hi Tony,

1. Longfellow agrees to the approach described below, with initial approval into the Cisco-Canyon only.
2. Please find attached the affirmative statement regarding USDW below the injection zone.

Thanks!

Hi Reed

The application has been reviewed. Please review the items below with your client and reply to this e-mail. The e-mail will then be added to the imaging folder as part of the C-108 package for the permit.

1. OCD has concerns with concurrent injection into the Wolfcamp and Cisco Canyon.
  - a. OCD proposes to approve injection into the Cisco-Canyon initially. In the future, if the disposal zone pressures-up, it would be isolated, move up-hole, and perforate the Cisco-Canyon. Does your client agree with this approach?
2. The C-108 application did not include an Affirmative Statement regarding potential USDW below the injection zone.
  - a. Please reply to this e-mail with an affirmative statement regarding the potential

for USDW below the proposed disposal zones.

Regards
