**APPLICATION OF ASCENT ENERGY, LLC
FOR COMPULSORY POOLING, LEA COUNTY,
NEW MEXICO.**

Case No. 16486

VERIFIED STATEMENT OF LEE ZINK

Lee Zink, being duly sworn upon his oath, deposes and states:

1. I am a landman for Ascent Energy, LLC ("Ascent"), and have personal knowledge of the matters stated herein. I have been qualified by the Division as an expert petroleum landman.

2. Pursuant to NMAC 19.15.4.12.A(1), the following information is submitted in support of the compulsory pooling application filed herein:

(a) The purpose of this application is to force pool working interest owners into the Bone Spring and Wolfcamp horizontal spacing units described below, and in wells to be drilled in the units.

(b) No opposition is expected because the interest owners being pooled have been contacted regarding the proposed well, but have failed or refused to voluntarily commit their interests to the wells. All interest owners are locatable.

(c) The wells are in the Gavilon Development Area, a development area approved by the Bureau of Land Management for drilling in the potash area. A plat outlining the Development area is attached as Attachment A.

(d) A plat outlining the Bone Spring unit being pooled in Case 16484 is attached hereto as Attachment B. Ascent seeks an order pooling all mineral interests in the Bone formation underlying the W/2E/2 of Section 28 and the W/2E/2 of Section 33, Township 20 South, Range 33 East, NMPM. The unit will be dedicated to:

EXHIBIT /

- (i) the Gavilon Fed Com Well No. 506H, a Second Bone Spring test; and
- (ii) the Gavilon Fed Com Well No. 604H, a Third Bone Spring test.

They are horizontal wells with first and last take points set forth in the C-102s included in the geologist's affidavit. The wells will comply with Division setback requirements.

The parties being pooled and their interests are set forth in Attachment B.

(e) A plat outlining the Wolfcamp unit being pooled in Case 16486 is attached hereto as Attachment C. Ascent seeks an order pooling all mineral interests in the Wolfcamp formation underlying the W/2E/2 of Section 28 and the W/2E/2 of Section 33, Township 20 South, Range 33 East, NMPM. The unit will be dedicated to:

- (i) the Gavilon Fed Com Well No. 707H, a lower Wolfcamp A test; and
- (ii) the Gavilon Fed Com Well No. 708H, a upper Wolfcamp X Sand test.

They are horizontal wells with first and last take points set forth in the C-102s included in the geologist's affidavit. The wells will comply with Division setback requirements.

The parties being pooled and their interests are set forth in Attachment C.

(f) There are no depth severances in the Bone Spring and Wolfcamp formations.

(g) Attachment D is a well proposal sent to the parties being pooled. Similar letters were sent to all other working interest owners. Ascent has had numerous contacts with all interest owners.

(h) Ascent has made a good faith effort to obtain the voluntary joinder of the working interest owners in the proposed well.

(i) Ascent has the right to pool the overriding royalty owners in the well unit.

(j) Attachment E contains the Authorizations for Expenditure for the proposed wells. The estimated costs of the wells set forth therein are fair and reasonable, and comparable to the costs of other wells of similar depth and length drilled in this area of Lea County.

(k) Ascent requests overhead and administrative rates of \$7500/month for a drilling well and \$750/month for a producing well. These rates are fair, and comparable to the rates charged by other operators for wells of this type in this portion of Lea County. They are also the rates set forth in the Joint Operating Agreement for the well unit. Ascent requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

(l) Ascent requests that the maximum cost plus 200% risk charge be assessed against non-consenting working interest owners.

(m) Ascent requests that it be designated operator of the wells.

(m) The attachments to this affidavit were prepared by me, or compiled from Company business records.

(n) The granting of this application is in the interests of conservation and the prevention of waste.

Case No. 16484

APPLICATION OF ASCENT ENERGY, LLC
FOR COMPULSORY POOLING, LEA COUNTY,
NEW MEXICO.

Case No. 16486

VERIFIED STATEMENT OF BEN METZ

Ben Metz, being duly sworn upon his oath, deposes and states:

1. I am over the age of 18, and have personal knowledge of the matters stated herein.
2. I am a geologist for Ascent Energy, LLC ("Ascent"), and I am familiar with the geological matters involved in this case. I have been qualified by the Division as an expert petroleum geologist.
3. The geological plats in Attachment A discussed below pertain to the Wolfcamp wells (Case 16486):
 - (a) A structure map on top of the Wolfcamp A zone. It shows that structure dips gently to the south. The subject Wolfcamp wells will be drilled from downdip to updip. The plat also shows a line of cross-section.
 - (b) A cross section. The well logs on the cross-section give a representative sample of the Wolfcamp formation in this area. The target zones (the XY and A zones) are continuous across the well unit.
 - (c) A list of existing Wolfcamp XY and A wells in the area. The more recent wells are all north/south wells, and appear to be economic. That north/south orientation is preferred in this area.
 - (d) The C-102s for the Wolfcamp wells. The wells are in the 96438-Wolfcamp Pool.
4. The geological plats in Attachments B pertain to the Second and Third Bone Spring wells (Case 16484). These zones are prospective in this area. They show:
 - (a) Structure maps on top of each Bone Spring zone. They show that structure dips gently to the east-southeast. It also shows a line of cross-section.

EXHIBIT

3

(b) Cross-sections of each Bone Spring zone. The well logs on the cross-sections give a representative sample of the Second and Third Bone Spring zones in this area. The target zones are continuous across the well unit.

(c) A list of producing Bone Spring wells in the area. The wells are virtually all north/south wells, and the more recent wells appear to be economic. That north/south orientation is preferred in this area.

(d) The C-102s for the Bone wells. The wells are in the 30213-Bone Spring Pool.

5. I conclude from the maps that:

(a) The Wolfcamp and Bone Spring horizontal spacing units are justified from a geologic standpoint, and horizontal drilling is the best method to produce Bone Spring reserves.

(b) Each quarter-quarter section in the Wolfcamp and Bone Spring units will contribute more or less equally to production.

(c) There is no faulting or other geologic impediment on the area which will affect the drilling of the subject well.

6. The granting of these applications is in the interests of conservation and the prevention of waste.
