Case No. 23564

AFFIRMATION OF LANDMAN MITCH KRAKAUSKAS

I, being duly sworn on oath, state the following:

1. I am over the age of 18, and have the capacity to execute this Affirmation, which is based on my personal knowledge.

2. I am employed as the Land Manager for Strata Production Company (“Strata” or “Applicant”), and I am familiar with the subject applications and the lands involved.

3. This affirmation is submitted in connection with the filing by Strata of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.

4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record. My education and work experience are as follows: I graduated from New Mexico State University with a bachelor’s degree in Agricultural Business and Economics in December 2005. After graduation, I worked as an independent petroleum landman from January 2006 to March 2009, working throughout New Mexico, Texas, Colorado and Arizona. I have worked for Strata since April 2009. I have worked on New Mexico land matters for approximately fifteen years. I am a Certified Professional Landman through the American Association of Professional Landmen.

5. The purpose of this application is to force pool working interest owners into the horizontal spacing units (“HSU”) described below and in the wells to be drilled in the HSUs.

6. The only party being pooled is Oxy USA Inc. (“OXY”), which has been contacted regarding the proposed wells, but has failed or refused to voluntarily commit their interest in the wells.

7. In **Case No. 23563**, Applicant seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to dedicate the HSU to the following 2.5-mile wells:

a. **Oscar 23 11 EDL Fed Com #1H** well, to be horizontally drilled from an approximate surface hole location 2110’ FNL and 385’ FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100’ FNL and 330’ FWL of Section 11, T23S-R30E. The first take point will be located at approximately 2110’ FNL and 385’ FWL of Section 23, T23S-R30E. The last take point will be located at approximately 100’ FNL and 330’ FWL of Section 11, T23S-R30E.

b. **Oscar 23 11 EDI Fed Com #11H** well, to be horizontally drilled from an approximate surface hole location 2110’ FNL and 460’ FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100’ FNL and 990’ FWL of Section 11, T23S-R30E. The first take point will be located at approximately 2110’ FNL and 460’ FWL of Section 23, T23S-R30E. The last take point will be located at approximately 100’ FNL and 990’ FWL of Section 11, T23S-R30E.

8. In **Case No. 23564**, Applicant seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to dedicate the HSU to the following 2.5-mile wells:

a. **Oscar 23 11 FCL Fed Com #2H** well, to be horizontally drilled from an approximate surface hole location 2310’ FNL and 1905’ FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100’ FNL and 1650’ FWL of Section 11, T23S-R30E. The first take point will be located at approximately 2310’ FNL and 1905’ FWL of Section 23, T23S-R30E. The last take point will be located at approximately 100’ FNL and 1650’ FWL of Section 11, T23S-R30E.

b. **Oscar 23 11 FCI Fed Com #12H** well, to be horizontally drilled from an approximate surface hole location 2310’ FNL and 1980’ FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100’ FNL and 2310’ FWL of Section 11, T23S-R30E. The first take point will be located at approximately 2310’ FNL and 1980’ FWL of Section 23, T23S-R30E. The last take point will be located at approximately 100’ FNL and 2310’ FWL of Section 11, T23S-R30E.

9. The first and last take points and completed intervals for all proposed wells will meet the setback requirements set forth in the statewide rules for horizontal oil wells.

10. A general location map is are attached as **Exhibit A-1**.

11. Maps illustrating the tracts in the proposed HSUs and the ownership of each individual tract are attached as **Exhibit A-2**.

12. Maps illustrating the unit ownership are attached as **Exhibit A-3**.
13. The ownership breakdowns of interests and lists of pertinent leases are attached as **Exhibit A-4**. There are no depth severances in the formation being pooled.
14. A chronology of contacts with OXY is attached as **Exhibit A-5**.
15. The locations of the proposed wells within the respective HSUs are depicted in the C-102 forms attached as **Exhibit A-6**. The C-102 forms also indicate the locations of each surface hole, bottom hole, and the first and last take points.
16. Strata conducted a diligent search of the public records in Eddy County, New Mexico, where the wells will be located, and conducted phone directory and computer searches to obtain contact information for parties entitled to notification. Strata mailed all parties well proposals, including an Authorization for Expenditure (“AFE”) for each well.
17. **Exhibit A-7** is a copy of the well proposal letter and AFEs for the proposed wells. The estimated costs of the wells set forth in the AFEs are fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.
18. **Exhibit A-8** is a copy of the notice letter that was sent with the applications to OXY and to the Bureau of Land Management.
19. Strata has made a good faith effort to obtain voluntary joinder of OXY in the proposed wells.
20. Strata requests the Division to approve operating charges and costs of supervision while drilling of \$8,000/month and, after completion, \$800/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures.
21. Strata requests the maximum cost, plus 200% risk charge, be assessed against non-consenting working interest owners.

22. Strata requests that it be designated operator of the wells.
23. The Exhibits hereto were prepared by me, or compiled from Strata's business records.
24. The granting of the Applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.
25. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO

Case No. 23563

APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO

Case No. 23564

AFFIRMATION OF GEOLOGIST SCOTT KELLEY

I, being first duly sworn on oath, state the following:

1. I am over the age of 18, and have the capacity to execute this Affirmation, which is based on my personal knowledge.
2. I am employed as the geologist for Strata Production Company (“Strata” or “Applicant”), and I am familiar with the subject applications and the lands involved.
3. This Affirmation is submitted in connection with the filing by Strata of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.
4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record. My education and work experience are as follows: I have a bachelor’s degree in geology from the University of Oklahoma and a master’s degree in geology from the University of Texas at Arlington. I have been working continuously as a professional geologist since 2009. I worked for two years at Geosite Inc., two years at Panther Energy Company, six years at Pioneer Natural Resources and have been at Strata Production Company for four years.
5. **Exhibit B-1** shows the regional setting for the proposed wells.

6. **Exhibit B-2** are a general stratigraphic column showing the target zone.
7. **Exhibit B-3** includes a regional Brushy Canyon structure map with 50' contour intervals, which illustrate the locations of the HSUs in a yellow highlighted rectangle.
8. **Exhibit B-4** includes type logs of the production portion of the Brushy Canyon formation. The logs include a gamma ray log, a density porosity log, and a deep resistivity log. These are the key logs used to identify and evaluate reservoirs and landing targets for the proposed wells.
9. **Exhibit B-5** is a Brushy Canyon structural cross section map showing the location of the cross section on Exhibit B-6 in the region of the proposed wells.
10. **Exhibit B-6** is the structural cross section, indicating that the horizontal section of these wells will be placed in a zone that has an estimated gross interval thickness of 320'. This gross thickness is being calculated from the top of the lower Brushy Canyon formation to the Base of the lower Brushy Canyon formation (top of Bone Spring formation). The total thickness of the Brushy Canyon formation in this area is approximately 1600'. Perforations and completions are planned where reservoir quality sands are present through the vertical portion of the wellbore within the greater Brushy Canyon formation.
11. The measured depths and true vertical depths for each well are approximately as follows:

Case No.:		MD	TVD
23563	Oscar 23 11 EDL Fed Com #1H	19,870'	7,539'
	Oscar 23 11 EDI Fed Com #11H	19,010'	7,290'
23564	Oscar 23 11 FCL Fed Com #2H	20,167'	7,579'
	Oscar 23 11 FCI Fed Com #12H	19,009'	7,304'

12. Based on my geologic study of the area, I conclude the following:
 - a. The horizontal spacing and proration units are justified from a geologic standpoint.
 - b. There are no structural impediments or faults that will interfere with horizontal development.
 - c. Each quarter-quarter section in the HSU will contribute more or less equally to production.
 - d. The most efficient way to develop the acreage in Case Nos. 23563 (Oscar 23 11 EDL Fed Com #1H and Oscar 23 11 EDI Fed Com #11H) and 23564 (Oscar 23 11 FCL Fed Com #2H and Oscar 23 11 FCI Fed Com #12H) is as proposed because of drilling island locations due to Potash limitations. There is no known and generally accepted preferential drilling orientation based on present-day stress regime or other geological factors that would counter the proposed south-north well orientation. Successfully developed Brushy Canyon formation horizontal wells oriented south-north have been drilled in the region, so an established trend is present. This orientation also fits our lease boundaries and aligns with the remainder of Strata's planned development in the adjoining tracts. Therefore, the preferred well orientation does not strand any acreage or reserves.
13. The exhibits attached hereto were prepared by me or compiled from Strata's business records.
14. The granting of the Applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.
15. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Michael Scott Kelley

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case No. 23563

APPLICATION

Strata Production Company, OGRID No. 21712 ("Strata"), through its undersigned counsel Montgomery & Andrews, P.A. (Sharon T. Shaheen and Troy S. Lawton), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, all in Township 23 South, Range 30 East in Eddy County, New Mexico. In support of its application, Strata states as follows:

1. Strata is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Strata proposes to drill the following 2.5-mile wells in the proposed HSU:
 - **Oscar 23 11 EDL Fed Com #1H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 385' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 330' FWL of Section 11, T23S-R30E.
 - **Oscar 23 11 EDI Fed Com #11H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 460' FWL of Section 23, T23S-

R30E, to an approximate bottom hole location 100' FNL and 990' FWL of Section 11, T23S-R30E.

3. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells.

4. Strata has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU. The only uncommitted interest in this HSU is owned by OXY USA Inc., and therefore OXY USA Inc. is the only interest owner to be pooled in this proceeding.

5. Approval of the HSU and the pooling of all mineral interest owners in the Delaware formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Strata to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Strata should be designated the operator of the HSU.

WHEREFORE, Strata requests that this application be set for hearing before an examiner of the Oil Conservation Division on June 1, 2023, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 400-acre, more or less, HSU comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico;

B. Pooling all mineral interests in the Delaware formation underlying the HSU;

C. Allowing the drilling of the Oscar 23 11 EDL Fed Com #1H well and the Oscar 23 11 EDI Fed Com #11H well;

- D. Designating Strata as operator of the HSU and the well to be drilled thereon;
- E. Authorizing Strata to recover its costs of drilling, equipping and completing the well;
- F. Approving the operating charges and costs of supervision while drilling of \$8,000/month and, after completion, \$800/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Imposing a 200% penalty for the risk assumed by Strata in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

MONTGOMERY & ANDREWS, P.A.

Attorneys for Strata Production Company

Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico.

Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) **Oscar 23 11 EDL Fed Com #1H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 385' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 330' FWL of Section 11, T23S-R30E; and (2) **Oscar 23 11 EDI Fed Com #11H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 460' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 990' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

Exhibit A-7
Strata Production Co.
NMOCD Case Nos. 23563 & 23564
June 1, 2023

Dear Sir/Madam:

Strata Production Company ("Strata") proposes the drilling and completion of the Oscar 23 11 EDL Fed Com #1H, Oscar 23 11 EDI Fed Com #11H, Oscar 23 11 FCL Fed Com #2H and the Oscar 23 11 FCI Fed Com #12H (collectively, the "Wells") located in Sections 11, 14 & 23, Township 23 South, Range 30 East, Eddy County, New Mexico.

In connection with the above, please note the following:

The estimated cost of drilling, testing, completing, and equipping of each well is itemized on the four (4) enclosed Authority for Expenditures ("AFE") dated March 1, 2023.

Oscar 23 11 EDL Fed Com #1H: To be drilled from the legal location with a proposed surface hole location 2110' FNL & 385' FWL of Section 23 and a proposed bottom hole location of 100' FNL & 330' FWL of Section 11, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7539' TVD) and will be drilled horizontally to a measured depth of approximately 19870'.

Oscar 23 11 EDI Fed Com #11H: To be drilled from the legal location with a proposed surface hole location 2110' FNL & 460' FWL of Section 23 and a proposed bottom hole location of 100' FNL & 990' FWL of Section 11, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7290' TVD) and will be drilled horizontally to a measured depth of approximately 19010'.

Oscar 23 11 FCL Fed Com #2H: To be drilled from the legal location with a proposed surface hole location 2310' FNL & 1905' FWL of Section 23 and a proposed bottom hole location of 100' FNL & 1650' FWL of Section 11, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7579' TVD) and will be drilled horizontally to a measured depth of approximately 20167'.

Oscar 23 11 FCI Fed Com #12H: To be drilled from the legal location with a proposed surface hole location 2310' FNL & 1980' FWL of Section 23 and a proposed bottom hole location of 100' FNL & 2310' FWL of Section 11, Township 23 South, Range 30 East. The well will have a targeted interval within the Brushy Canyon (7304' TVD) and will be drilled horizontally to a measured depth of approximately 19009'.

Strata reserves the right to modify the locations and drilling plans described above in order to address regulatory requirements. Strata will advise you of any such modifications.

In the event you elect to participate in the proposed wells, please execute the enclosed AFEs and return them to the undersigned within thirty (30) days. Please be aware that the enclosed AFEs are only an estimate of costs to be incurred and by electing to participate in the Wells, each working interest owner shall be responsible for its proportionate share of all costs incurred.

Strata is proposing to drill the Wells under the terms of the modified 1989 AAPL form Operating Agreement ("JOA"). The JOA dated January 1, 2023, by and between Strata Production Company, as Operator and Oxy USA Inc. as Non-Operator, with the following general provisions:

- 100%/300%/300% Non-consent penalty;
- \$8,000/\$800 Drilling and producing rate;
- Strata Production Company named as Operator from the surface to base of the Delaware Formation.

If you do not wish to participate, Strata is offering the following terms for divesting your interest:

- \$500 per net acre
- NRI delivered equal to the difference between 20% and existing lease burdens

If you are interested in divesting of your interest or wish to discuss other options, please contact me at (575) 622-1127 ext. 23 or by email mitch@stratanm.com. If an agreement cannot be reached within thirty (30) days of your receipt of this letter, Strata will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed wells to allow Strata to move forward with planning and drilling of the Wells.

Sincerely,

Mitch Krakauskas
Vice President

Enclosures: as stated

Case No. 23564 – Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico – **Oscar 23 11 FCL Fed Com #2H and Oscar 23 11 FCI Fed Com #12H**

Dear Interest Owner:

This will advise that pursuant to NMSA 1978, § 70-2-17, Strata Production Company ("Strata") has filed applications with the New Mexico Oil Conservation Division for orders pooling all uncommitted interests in the proposed wells described below ("Applications"). You are receiving this notice because you may have an interest in one or more of these wells.

Case No. 23563. Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) **Oscar 23 11 EDL Fed Com #1H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 385' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 330' FWL of Section 11, T23S-R30E; and (2) **Oscar 23 11 EDI Fed Com #11H** well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 460' FWL of Section 23, T23S-R30E,

to an approximate bottom hole location 100' FNL and 990' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

Case No. 23564. Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) **Oscar 23 11 FCL Fed Com #2H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1905' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 1650' FWL of Section 11, T23S-R30E; and (2) **Oscar 23 11 FCI Fed Com #12H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1980' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 2310' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

The attached applications will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division. Hearings are currently conducted remotely. The hearing will be conducted on **June 1, 2023**, beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <http://www.emnrd.state.nm.us/OCD/hearings.html>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony.

Failure to appear at that time and become a party of record will preclude you from challenging these applications at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance by **May 24, 2023**, and serve

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF STRATA PRODUCTION CO.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case No. 23564

APPLICATION

Strata Production Company, OGRID No. 21712 ("Strata"), through its undersigned counsel Montgomery & Andrews, P.A. (Sharon T. Shaheen and Troy S. Lawton), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. In support of its application, Strata states as follows:

1. Strata is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Strata proposes to drill the following 2.5-mile wells in the proposed HSU:
 - **Oscar 23 11 FCL Fed Com #2H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1905' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 1650' FWL of Section 11, T23S-R30E.
 - **Oscar 23 11 FCI Fed Com #12H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1980' FWL of Section 23, T23S-

R30E, to an approximate bottom hole location 100' FNL and 2310' FWL of Section 11, T23S-R30E.

3. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells.

4. Strata has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU. The only uncommitted interest in this HSU is owned by OXY USA Inc., and therefore OXY USA Inc. is the only interest owner to be pooled in this proceeding.

5. Approval of the HSU and the pooling of all mineral interest owners in the Delaware formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Strata to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Strata should be designated the operator of the HSU.

WHEREFORE, Strata requests that this application be set for hearing before an examiner of the Oil Conservation Division on June 1, 2023, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 400-acre, more or less, HSU comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico;

B. Pooling all mineral interests in the Delaware formation underlying the HSU;

C. Allowing the drilling of the Oscar 23 11 FCL Fed Com #2H well and the Oscar 23 11 FCI Fed Com #12H well;

- D. Designating Strata as operator of the HSU and the well to be drilled thereon;
- E. Authorizing Strata to recover its costs of drilling, equipping and completing the well;
- F. Approving the operating charges and costs of supervision while drilling of \$8,000/month and, after completion, \$800/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Imposing a 200% penalty for the risk assumed by Strata in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

MONTGOMERY & ANDREWS, P.A.

Attorneys for Strata Production Company

Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico.

Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) **Oscar 23 11 FCL Fed Com #2H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1905' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 1650' FWL of Section 11, T23S-R30E; and (2) **Oscar 23 11 FCI Fed Com #12H** well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1980' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 2310' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

AFFIDAVIT OF NOTICE

STATE OF NEW MEXICO)
) ss.
COUNTY OF SANTA FE)

I, Sharon T. Shaheen, attorney for STRATA PRODUCTION COMPANY ("Strata"), the Applicant in the above-captioned matters, being first duly sworn, state the following:

I caused notice of the applications to be sent by certified mail through the United States Postal Service on May 11, 2023, to all interest owners sought to be pooled in these proceedings. Evidence of mailing to all such owners is attached hereto as Exhibit A. In an abundance of caution, notice was also directed to all such owners by publication in the Carlsbad Current Argus on May 17, 2023, which is reflected in the Affidavit of Publication attached hereto as Exhibit B. Exhibits A and B demonstrate to my satisfaction that all owners sought to be pooled were properly served.

Strata has conducted a good faith, diligent effort to find the names and correct addresses for the interest owners entitled to receive notice of the Applications filed herein.

SHARON T. SHAHEEN

SUBSCRIBED AND SWORN to before me this 30th day of May, 2023.

NOTICE

To the following entities, individuals, their heirs, personal representatives, trustees, successors or assigns, and any other uncommitted mineral owners:

Oxy USA, Inc.; and Bureau of Land Management.

Strata Production Company has filed applications with the New Mexico Oil Conservation Division as follows:

Case No. 23563. Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2 NW/4 of Section 23 and the W/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) Oscar 23 11 EDL Fed Com #1H well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 385' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 330' FWL of Section 11, T23S-R30E; and (2) Oscar 23 11 EDI Fed Com #11H well, to be horizontally drilled from an approximate surface hole location 2110' FNL and 460' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 990' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

Case No. 23564. Application of Strata Production Co. for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division pooling all uncommitted mineral interests in the Delaware formation (Forty Niner Ridge; Delaware [24750]) in a standard 400-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2 NW/4 of Section 23 and the E/2 W/2 of Sections 14 and 11, Township 23 South, Range 30 East in Eddy County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: (1) Oscar 23 11 FCL Fed Com #2H well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1905' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 1650' FWL of Section 11, T23S-R30E; and (2) Oscar 23 11 FCI Fed Com #12H well, to be horizontally drilled from an approximate surface hole location 2310' FNL and 1980' FWL of Section 23, T23S-R30E, to an approximate bottom hole location 100' FNL and 2310' FWL of Section 11, T23S-R30E. The completed interval and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs, the designation of Applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The wells and lands are located approximately 14 miles East of Loving, New Mexico.

These applications will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division on June 1, 2023, beginning at 8:15 a.m. Hearings are currently conducted remotely. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <http://www.emnrd.state.nm.us/OCD/hearings.html>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging this application at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance by May 24, 2023, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement by May 25, 2023, in accordance with Division Rule 19.15.4.13 NMAC. For further information, contact the applicant's attorney, Sharon T. Shaheen, Montgomery & Andrews, P.A., 325 Paseo de Peralta, Santa Fe, New Mexico 87501, (505) 986-2678.
