STATEMENT OF THE CASE

Targa seeks authorization to inject treated acid gas comprised of 80% CO₂, 20% H₂S, and traces of light hydrocarbons (“TAG”) from its Red Hills Gas Processing Plant (“Plant”) into the proposed Red Hills AGI #003 well (“Well”). The Well is an Underground Injection Control Class II well subject to the requirements of 19.15.26 NMAC. The Well is vertical with an approximate surface and bottom hole location at 3,116 feet from the north line and 1,159 feet from the east line of Section 13, Township 24 South, Range 33 East in Lea County. The Well’s proposed maximum daily injection rate is thirteen (13) million standard cubic feet per day, and the proposed maximum surface injection pressure is approximately 1,767 pounds per square inch gauge. The target injection zone is within the Bell Canyon and Cherry Canyon Formations of the Delaware Mountain Group at a depth of approximately 5,700 feet to 7,600 feet.

The New Mexico Oil Conservation Commission held a hearing on this matter on July 13, 2023 and approved Targa’s application, subject to permit conditions to be addressed by the parties. The parties are working toward an agreement on proposed permit conditions, which Targa expects will be presented at the hearing.

PROPOSED EVIDENCE

A. Witnesses

<u>WITNESS</u>	<u>ESTIMATED TIME</u>	<u>EXHIBITS</u>
Matthew Eales (Vice President of Regulatory Affairs, Targa Northern Delaware, LLC)	10 minutes	0

Targa reserves the right to call a rebuttal witness(es) if appropriate.

B. Exhibits

Targa's hearing exhibits were admitted into evidence at the July 13, 2023 hearing. Targa may provide additional exhibits if necessary to address NMOCD's proposed permit conditions.

Respectfully submitted,

HINKLE SHANOR LLP
