### NATURE OF INTERVENOR'S INTEREST

In Case No. 23948, COG Operating, LLC ("COG") seeks an order pooling all uncommitted interests in the Wolfcamp formation underlying a 640-acre, more or less, standard horizontal spacing unit comprised of the E/2 of Section 21 and 28, Township 18 South, Range 34 East, Lea County, New Mexico.

MRC Permian Company ("MRC") and Franklin Mountain Energy 3, LLC ("FME") have made entries of appearance in Case No. 23948 in which they have objected to COG's pooling application going forward by affidavit. Based on descriptions in well proposals received, Cimarex anticipates that MRC and FME will be filing competing pooling applications that will overlap with both COG's proposed development plan and with applications Cimarex will soon be submitting for its development plan to the south that adjoins COG's proposed unit.

This intervention will allow Cimarex to participate in the adjudicatory process to ensure that all the competing development plans in the subject area will be considered in an efficient manner, thus, contributing substantially to the prevention of waste and the protection of correlative rights as directed by 19.15.4.11(C) NMAC.

To the extent that it understands the intentions of MRC and FME, Cimarex opposes any competing development plans that would overlap with COG's and Cimarex's plans in this area.

Respectfully Submitted,

ABADIE & SCHILL, PC
