APPLICATION

OXY USA Inc. (“OXY” or “Applicant”) (OGRID No. 16696) through its undersigned attorneys, files this application with the Oil Conservation Division for an order (a) approving a standard 320-acre, more or less, overlapping horizontal well spacing unit in the Bone Spring formation underlying the W/2 E/2 of Sections 12 and 13, Township 22 South, Range 31 East, NMPM, Eddy County, New Mexico, and (b) pooling all uncommitted mineral owners in this acreage. In support of this application, Oxy states:

1. OXY is a working interest owner in the subject acreage and has the right to drill thereon.
2. Applicant seeks to initially dedicate the above-referenced overlapping horizontal well spacing unit to the proposed:
 - **Top Spot 12_13 Fed Com 24H** to be horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of Section 13, with a first take point in the SW/4 SE/4 (Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12; and
 - **Top Spot 12_13 Fed Com 25H** to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 13, with a first take point in the SW/4 SE/4

Case No. 24405**

(Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12.

3. This horizontal well spacing unit will overlap the following existing Bone Spring spacing unit:

- 320-acre horizontal well spacing unit comprised of the S/2 S/2 of Section 12, dedicated to OXY's Federal 12 #14H (API: 30-015-40821).

4. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all mineral interest owners in the subject spacing unit.

5. The pooling of interests and approval of this overlapping spacing unit will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this matter be set for hearing on May 2, 2024, before an Examiner of the Oil Conservation Division, and, after notice and hearing as required by law, the Division enter an order:

- A. Approving the overlapping horizontal well spacing unit and pooling all uncommitted interests therein;
- B. Designating Applicant as operator of this overlapping horizontal well spacing unit and the horizontal wells to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, equipping, and completing the wells;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

- E. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

Respectfully submitted,

CASE NO. 24405

SELF-AFFIRMED STATEMENT OF COURTNEY CARR

1. My name is Courtney Carr. I work for OXY USA Inc. ("OXY") as a Senior Land Negotiator.

2. I have previously testified before the New Mexico Oil Conservation Division ("Division") as an expert witness in petroleum land matters. My credentials as a landman have been accepted by the Division and made a matter of record.

3. I am familiar with the application filed by OXY in this case, and I am familiar with the status of the lands in the subject area.

4. OXY was able to reach voluntary agreement with all interest owners and therefore no longer requires pooling of those interests. OXY still requires approval of the non-standard spacing unit.

5. Under **Case No. 24405**, OXY seeks an order (a) approving a standard 320-acre, more or less, overlapping horizontal well spacing unit in the Bone Spring formation underlying the W/2 E/2 of Sections 12 and 13, Township 22 South, Range 31 East, NMPM, Eddy County, New Mexico, and (b) pooling all uncommitted mineral owners in this acreage. OXY seeks to initially dedicate the above-referenced spacing unit to the proposed **Top Spot 12_13 Fed Com 24H**, to be horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of Section 13,

with a first take point in the SW/4 SE/4 (Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12; and the **Top Spot 12_13 Fed Com 25H** to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 13, with a first take point in the SW/4 SE/4 (Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12. This horizontal well spacing unit will overlap the following existing Bone Spring spacing unit:

- 320-acre horizontal well spacing unit comprised of the S/2 S/2 of Section 12, dedicated to OXY's Federal 12 #14H (API: 30-015-40821).

6. **OXY Exhibit C-1** is a diagram depicting the newly proposed spacing unit in relation to the existing spacing units. OXY provided notice to the other working interest owners since OXY is the operator of the existing spacing units. OXY also provided notice to the Bureau of Land Management since federal lands are involved. A sample copy of the notice, and mailing report, is included in Exhibit E.

7. **OXY Exhibit C-2** contains a draft Form C-102 for the wells. The exhibit shows that the wells will be assigned to the Bilbrey Basin; Bone Spring [Pool Code 5695].

8. **OXY Exhibit C-3** identifies the tracts of land comprising the horizontal spacing unit, the ownership interests in each tract, and ownership interests on a spacing unit basis. The subject acreage is comprised of federal lands. **The parties OXY seeks to pool either have and asterisk or are highlighted in yellow.**

9. **OXY Exhibit C-4** contains a sample of the well proposal letter and AFEs sent to owners with a working interest. The costs reflected in the AFEs are consistent with what OXY and other operators have incurred for drilling similar horizontal wells in the area in this formation.

10. OXY requests that the overhead and administrative costs for drilling and producing the proposed wells be set at \$8,000 per month while drilling and \$800 per month while producing. These costs are consistent with what other operators are charging in this area for similar wells.

11. **OXY Exhibit C-5** contains a general summary of the contacts with the uncommitted interest owners. As indicated in the exhibit, OXY has made a good faith effort to locate and has had communications with all of the parties that it seeks to pool in this case in an effort to reach voluntary joinder. In my opinion, OXY has undertaken good faith efforts to reach an agreement with the uncommitted interest owners.

12. OXY has provided the law firm of Holland & Hart LLP with the names and addresses of the parties that OXY seeks to pool and instructed that they be notified of this hearing. OXY has conducted a diligent search of all public records in the county where the property is located, reviewed telephone directories, and conducted computer searches to locate contact information for each interest owner.

13. **OXY Exhibits C-1 through C-5** were either prepared by me or compiled under my direction and supervision.

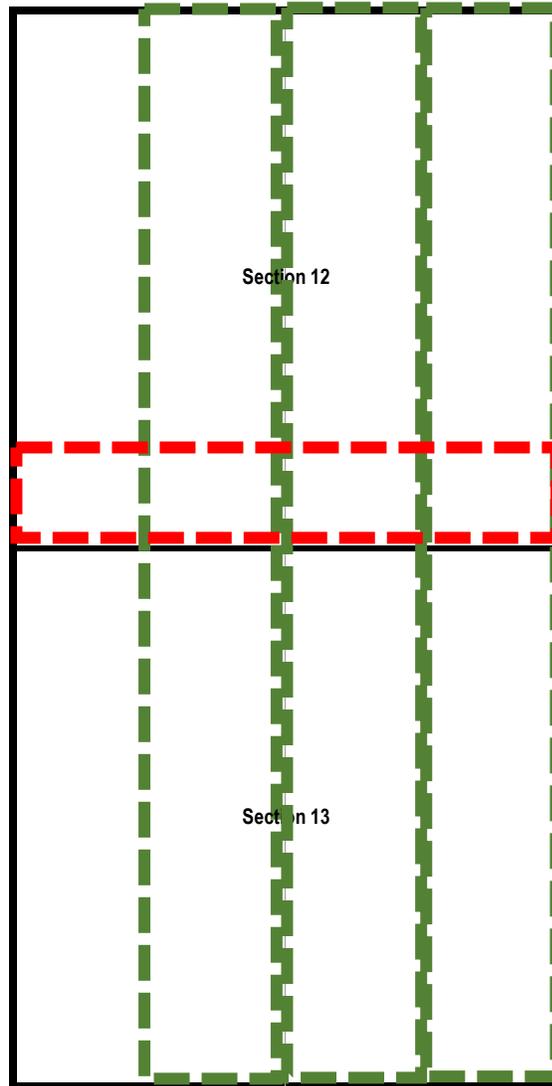

14. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

APPLICATION OF OXY USA INC. FOR
APPROVAL OF AN OVERLAPPING
HORIZOTNAL WELL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY,
NEW MEXICO.

CASE NO. 24405

SELF-AFFIRMED STATEMENT OF JARED ROUNTREE

1. My name is Jared Rountree, and I work for OXY USA Inc. (“OXY”) as a Geologist. I am familiar with the application filed in this case and have personal knowledge of the information provided in this self-affirmed statement.

2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology matters and my credentials as an expert petroleum geologist have been accepted by the Division and been made a matter of record.

3. In this case, OXY is targeting the Bone Spring formation.

4. **OXY Exhibit D-1** is a locator map depicting OXY’s proposed spacing unit. Existing producing wells in the Bone Spring formation are also depicted. The approximate wellbore paths for the proposed initial wells in this case are shown with dashed lines.

5. **OXY Exhibit D-2** shows a subsea structure map that I prepared for the top of the Second Bone Spring formation. The contour interval is 50-feet and the approximate wellbore paths for the proposed initial wells are depicted with dashed lines. This map shows that the Bone Spring formation gently dips to the southeast. I do not observe any faulting, pinch outs, or geologic impediments to developing this targeted interval with horizontal wells.

6. **OXY Exhibit D-3** is a structural cross-section that identifies the three wells penetrating the targeted intervals that I used to construct a cross-section from A to A’. I utilized

these well logs because they penetrate the targeted interval, are of good quality, and are representative of the geology within the proposed spacing unit.

7. **OXY Exhibit D-4** is a stratigraphic cross section using the representative wells depicted on Exhibit D-3. It contains a gamma ray and resistivity logs for each well. The proposed target interval within the Bone Spring formation is labeled on the exhibit. The cross-section demonstrates that the targeted interval is continuous and consistent in thickness across the proposed spacing unit.

8. In my opinion, the standup orientation of the wells is the preferred orientation for horizontal well development of the targeted interval in the Bone Spring formation in this area. This standup orientation will efficiently and effectively develop the subject acreage.

9. Based on my geologic study, the targeted interval within the Bone Spring formation underlying the subject area is suitable for development by horizontal wells and the tracts comprising the proposed spacing unit will contribute more-or-less equally to the production from the wellbores.

10. In my opinion, the granting of OXY's application will be in the best interest of conservation, the preservation of waste, and protection of correlative rights.

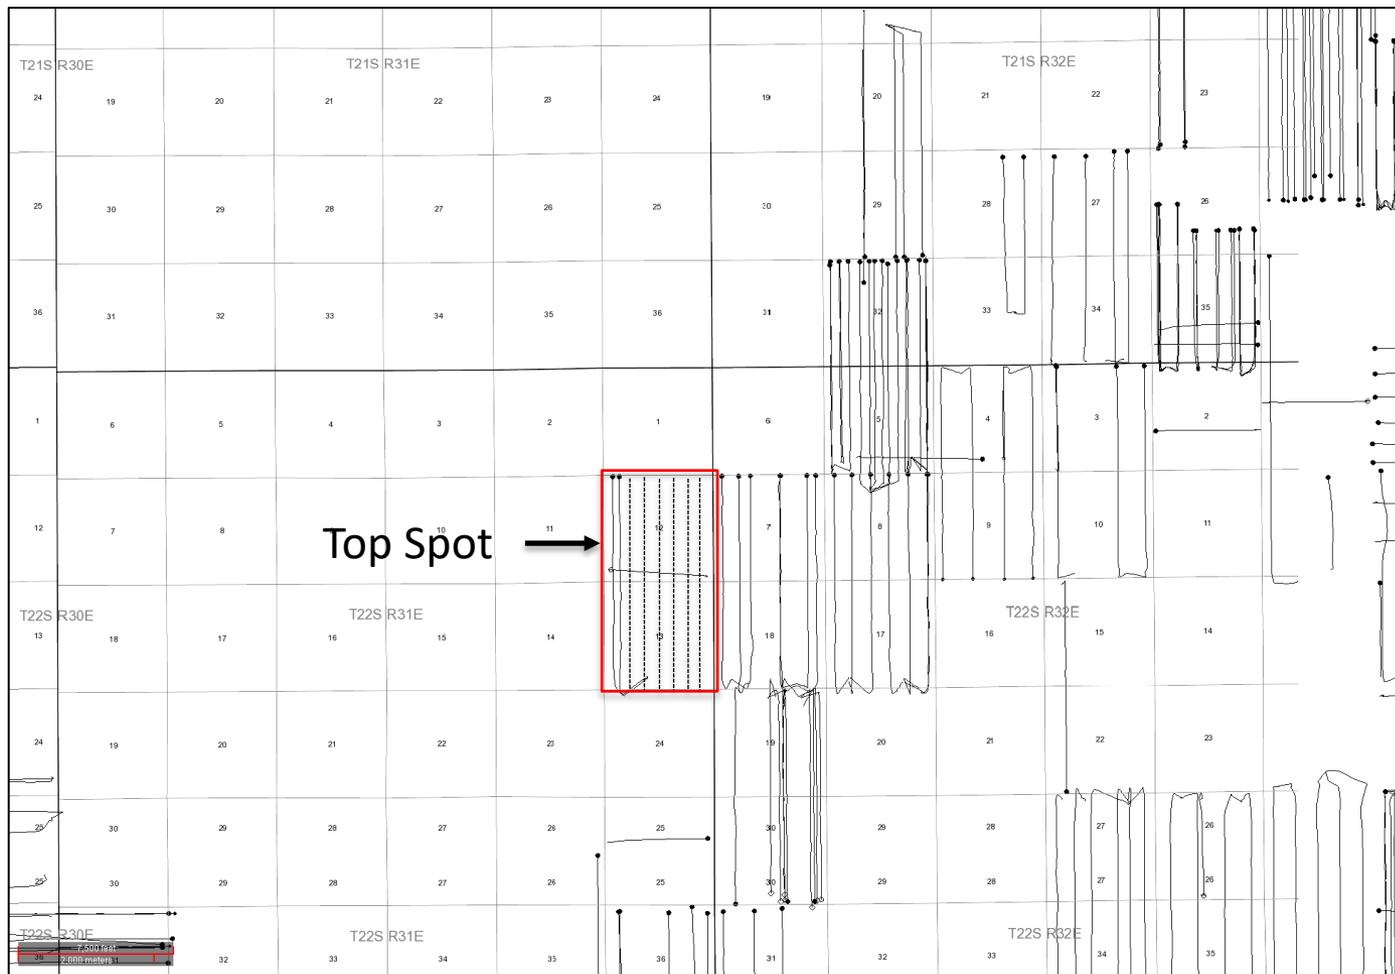

11. **OXY Exhibits D-1 through D-4** were either prepared by me or compiled under my direction and supervision.

12. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

Case No. 24405: Application of OXY USA Inc. for Approval of an Overlapping Horizontal Well Spacing Unit and Compulsory Pooling, Eddy County, New Mexico. Applicant seeks an order (a) approving a standard 320-acre, more or less, overlapping horizontal well spacing unit in the Bone Spring formation underlying the W/2 E/2 of Sections 12 and 13, Township 22 South, Range 31 East, NMPM, Eddy County, New Mexico, and (b) pooling all uncommitted mineral owners in this acreage. This spacing unit will be initially dedicated to the Top Spot 12_13 Fed Com 24H to be horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of Section 13, with a first take point in the SW/4 SE/4 (Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12; and Top Spot 12_13 Fed Com 25H to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 13, with a first take point in the SW/4 SE/4 (Unit O) of Section 13, and the last take point in the NW/4 NE/4 (Unit B) of Section 12. This horizontal well spacing unit will overlap the following existing Bone Spring spacing unit:
*320-acre horizontal well spacing unit comprised of the S/2 S/2 of Section 12, dedicated to OXY's Federal 12 #14H (API: 30-015-40821).
Also, to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof, operating costs and charges for supervision, the designation of applicant as operator, and a 200% charge for risk involved in drilling and completing the wells. Said area is approximately 23 miles northeast of Loving, New Mexico.
