RE: Commingling Application/Amendment
 Eagle 34 Facility
 Eddy County, New Mexico

Ladies and Gentlemen:

As stated in the Application, Riley Permian Operating Company, LLC ("Riley") requests approval to expand authority granted in Order No. R-10759-A, to include those portions of United States Oil and Gas Lease NM 0557370 ("Lease NM 0557370"), lying outside the existing order and comprising the S/2S/2 of Section 27, Township 17 South, Range 27 East, N.M.P.M., Eddy County, New Mexico. Portions of Lease NM 0557370 are already included in the existing commingling order. The underlying Order No. R-10759-A is attached for your convenience as Exhibit 1.

Riley further requests approval to add two new wells, the Eagle 27 Federal #02 and the Eagle 27 Federal #08, for surface commingling, which are located on Lease NM 0557370.

The Application includes a lease and well data spreadsheet, Exhibit 2, detailing the existing and proposed leases and wells, along with pool codes and current production data.

Exhibit 3 is a detailed schematic, which shows the tank battery as it currently exists along with the equipment that we expect to utilize to determine well production from each lease.

A plat is also enclosed as Exhibit 4, showing the lease numbers and location of all leases and wells that will contribute production to the proposed commingled facility. The Eagle "34" Tank Battery is located on Federal Lease #NMLC67849 in the NE¼SW¼ (Unit K) of Section 34, Township 17 South, Range 27 East, N.M.P.M., Eddy County, New Mexico.

Process and Flow Description: The common gas sales meter will be located at the Eagle "34" Tank Battery. Gas from these wells will be flowed up the casing and measured at each well location with a portable trailer mounted gas meter. Oil and water will be produced via the tubing and go to a header system at the tank battery. Individual wells will be periodically switched into the test treater. From there, oil will go to a test tank where it can be measured, and water production will be metered. All oil will then be sold and trucked from the location.

Production Allocation: Production allocation will be based on the periodic well tests, as described above. Gas allocation will be based on the portable meter tests, oil allocation will be based on the treater test.

The proposed commingling of production is to reduce operating expense on the referenced wells. This will result in increased economic life on each well. This commingling will not result in reduced royalty or improper measurement of production and will not decrease the value of production.

All working interest and overriding royalty owners, including BLM, have been notified in writing of this Application. Through our counsel, Riley has sent the owners Notice Letters dated May 1, 2024, along with the Application and the corresponding attachments via U.S. Postal Service Certified Mail. In the Notice Letters, Riley advised the interest owners on how they may file an objection with the New Mexico Oil Conservation Division. A sample Notice Letter, along with the owners and their addresses, have been included for your convenience, labeled Exhibit 5.

Best Regards,

Mark W. Smith
Sr. Landman
