COMPULSORY POOLING APPLICATION CHECKLIST	
ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS	
Case: 25572	APPLICANT'S RESPONSE
Date	September 11, 2025
Applicant	Longfellow Energy, L.P.
Designated Operator & OGRID (affiliation if applicable)	Longfellow Energy, L.P., 372210
Applicant's Counsel:	Spencer Fane, LLP (Sharon T. Shaheen)
Case Title:	Application of Longfellow Energy, L.P. for Compulsory Pooling, Eddy County, New Mexico
Entries of Appearance/Intervenors:	None at this time
Well Family	Petty Federal Com 31CD
Formation/Pool	
Formation Name(s) or Vertical Extent:	Yeso Formation
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	Yeso Formation
Pool Name and Pool Code (Only if NSP is requested):	
Well Location Setback Rules (Only if NSP is Requested):	
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	320 acres
Building Blocks:	Quarter-quarter section (40 ac)
Orientation:	East-West
Description: TRS/County	S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe and is approval of non-standard unit requested in this application?	Yes
Other Situations	
Depth Severance: Y/N. If yes, description	No
Proximity Tracts: If yes, description	Yes, N2 S2 of Section 31
Proximity Defining Well: if yes, description	Yes, Petty Federal Com 31CD 006H well
Applicant's Ownership in Each Tract	Tract 1: 100%; Tract 2: 90%; Tract 3: 0.00%; Tract 4: 0.00%; Tract 5: 0.00%; Tract 6: 0.00%
Well(s)	
Name & API (if assigned), surface and bottom hole location, footages, completion target, orientation, completion status (standard or non-standard)	Add wells as needed

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF LONGFELLOW ENERGY, L.P.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case No. 25572

APPLICATION

Longfellow Energy, LP, OGRID No. 372210 (“Longfellow” or “Applicant”), through its undersigned counsel Spencer Fane, LLP (Sharon T. Shaheen), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) in a standard ~320-acre, more or less, horizontal spacing and proration unit (“HSU”) with proximity tracts comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico. In support of its application, Longfellow states as follows:

1. Longfellow is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Longfellow seeks to dedicate the following 9 ~1.0-mile wells to the proposed HSU:
 - Petty Federal Com 31CD 001H well, to be horizontally drilled from a surface hole location approximately 441’ FWL and 1,717’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,628’ FSL of Section 31-16S-31E;
 - Petty Federal Com 31CD 002H well, to be horizontally drilled from a surface hole location approximately 441’ FWL and 1,697’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,319’ FSL of Section 31-16S-31E;
 - Petty Federal Com 31CD 003H well, to be horizontally drilled from a surface hole location approximately 441’ FWL and 1,677’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,159’ FSL of Section 31-16S-31E;
 - Petty Federal Com 31CD 004H well, to be horizontally drilled from a surface hole location approximately 441’ FWL and 1,657’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 1,785’ FSL of Section 31-16S-31E;

- Petty Federal Com 31CD 005H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,637' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 1,410' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 006H well, to be horizontally drilled from a surface hole location approximately 1,085' FWL and 676' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 1,250' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 007H well, to be horizontally drilled from a surface hole location approximately 1,086' FWL and 656' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 875' FSL of Section 31-16S-31E;
- Petty Federal Com 31CD 008H well, to be horizontally drilled from a surface hole location approximately 1,086' FWL and 636' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 500' FSL of Section 31-16S-31E; and
- Petty Federal Com 31CD 009H well, to be horizontally drilled from a surface hole location approximately 1,087' FWL and 616' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 340' FSL of Section 31-16S-31E.

3. The Petty Federal Com 31CD 006H well is a proximity well.

4. The completed interval of the Petty Federal Com 31 CD 001H well will be a non-standard location. Longfellow will seek administrative approval of the non-standard location. With the proximity tracts, the completed intervals of all other wells will meet the standard setback requirements. The first and last take points of all wells will meet the standard setback requirements.

5. Longfellow has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

6. Approval of the proposed HSU and the pooling of all mineral interest owners in the Yeso formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

7. In order to permit Longfellow to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Longfellow should be designated the operator of the HSU.

WHEREFORE, Longfellow requests that this application be set for hearing before an examiner of the Oil Conservation Division on September 11, 2025, and that, after notice and hearing as required by law, the Division enter an order:

A. Approving a standard 320-acre, more or less, HSU, with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico;

B. Pooling all mineral interests in the Yeso formation underlying the HSU;

C. Allowing the drilling of the following nine ~1.0-mile wells in the proposed HSU: Petty Federal Com 31 CD 001; Petty Federal Com 31 CD 002; Petty Federal Com 31 CD 003; Petty Federal Com 31 CD 004; Petty Federal Com 31 CD 005; Petty Federal Com 31 CD 006; Petty Federal Com 31 CD 007; Petty Federal Com 31 CD 008; and Petty Federal Com 31 CD 009.

D. Designating Longfellow as operator of the HSU and the wells to be drilled thereon;

E. Authorizing Longfellow to recover its costs of drilling, equipping, and completing the wells;

F. Approving the operating charges and costs of supervision while drilling of \$12,000/month and, after completion, \$1,200/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Longfellow in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

SPENCER FANE, LLP

Attorneys for Longfellow Operating Partners, LLC

Application of Longfellow Operating Partners, LLC for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division approving a standard ~320-acre horizontal spacing and proration unit (“HSU”), with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico and pooling all mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) underlying the HSU. Applicant proposes to drill the following 1.0-mile wells in the HSU: Petty Federal Com 31CD 001H well, to be horizontally drilled from a surface hole location (“SHL”) ~441’ FWL and 1,717’ FSL of Section 32-16S-31E and a bottomhole location (“BHL”) ~20’ FWL & 2,628’ FSL of Section 31-16S-31E (“001H”); Petty Federal Com 31CD 002H well, to be horizontally drilled from a SHL ~441’ FWL and 1,697’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 2,319’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 003H well, to be horizontally drilled from a surface hole location approximately 441’ FWL and 1,677’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,159’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 004H well, to be horizontally drilled from a SHL ~441’ FWL and 1,657’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 1,785’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 005H well, to be horizontally drilled from a SHL ~441’ FWL and 1,637’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 1,410’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 006H well, to be horizontally drilled from a SHL ~1,085’ FWL and 676’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 1,250’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 007H well, to be horizontally drilled from a SHL ~1,086’ FWL and 656’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 875’ FSL of Section 31-16S-31E; Petty Federal Com 31CD 008H well, to be horizontally drilled from a SHL ~1,086’ FWL and 636’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 500’ FSL of Section 31-16S-31E; and Petty Federal Com 31CD 009H well, to be horizontally drilled from a SHL ~1,087’ FWL and 616’ FSL of Section 32-16S-31E and a BHL ~20’ FWL & 340’ FSL of Section 31-16S-31E. The completed interval of the 001H is in a non-standard location (“NSL”). Applicant will seek administrative approval of the NSL. With the proximity tracts, the completed intervals of the other wells will meet standard setback requirements. The first and last take points of all wells will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and wells to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 6 miles Northeast of Loco Hills, New Mexico.

Case No. 25572

SELF-AFFIRMED STATEMENT OF LANDMAN STUART GASTON

I, Stuart Gaston, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.
2. I am a landman employed as Senior Landman with Longfellow Energy, L.P. ("LFE" or "Applicant"), and I am familiar with the subject application and the lands involved.
3. This testimony is submitted in connection with the filing by LFE of the above-referenced compulsory pooling application (the "Application") pursuant to 19.15.4.12(A)(1) NMAC.
4. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness. A summary of my education and work experience is as follows: I graduated from Texas Tech University in 2012 with a Bachelor's Degree in Business Management and Texas Tech University in 2017 with a Master's Degree in Business Administration. I have been employed with LFE as Senior Landman since 2022. My education and work experience are further detailed in my resume, appended hereto.
5. In this case, LFE seeks an order pooling all uncommitted mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) in a standard ~320-acre, more or less,

horizontal spacing and proration unit (“HSU”), with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico.

6. LFE proposes to drill the following one-mile wells in the proposed HSU:
- Petty Federal Com 31CD 001H well will be horizontally drilled from a surface hole location approximately 411’ FWL and 1,717’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,628’ FSL of Section 31-16S-31E. The first take point will be ~2628’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~2628’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 002H well will be horizontally drilled from a surface hole location approximately 411’ FWL and 1,697’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,319’ FSL of Section 31-16S-31E. The first take point will be ~2319’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~2319’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 003H well will be horizontally drilled from a surface hole location approximately 411’ FWL and 1,677’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 2,159’ FSL of Section 31-16S-31E. The first take point will be ~2159’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~2159’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 004H well will be horizontally drilled from a surface hole location approximately 411’ FWL and 1,657’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 1,785’ FSL of Section 31-16S-31E. The first take point will be ~1785’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~1785’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 005H well will be horizontally drilled from a surface hole location approximately 411’ FWL and 1,637’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 1,410’ FSL of Section 31-16S-31E. The first take point will be ~1410’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~1410’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 006H well will be horizontally drilled from a surface hole location approximately 1,085’ FWL and 676’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 1,250’ FSL of Section 31-16S-31E. The first take point will be ~1250’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~1250’ FSL and 100’ FWL of Section 31, T16S-31E.
 - Petty Federal Com 31CD 007H well will be horizontally drilled from a surface hole location approximately 1,086’ FWL and 656’ FSL of Section 32-16S-31E and a bottomhole location approximately 20’ FWL & 875’ FSL of Section 31-16S-31E. The first take point will be ~875’ FSL and 100’ FEL of Section 31, T16S-31E, and the last take point will be ~875’ FSL and 100’ FWL of Section 31, T16S-31E.

- Petty Federal Com 31CD 008H well will be horizontally drilled from a surface hole location approximately 1,086' FWL and 636' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 500' FSL of Section 31-16S-31E. The first take point will be ~500' FSL and 100' FEL of Section 31, T16S-31E, and the last take point will be ~500' FSL and 100' FWL of Section 31, T16S-31E.
- Petty Federal Com 31CD 009H well will be horizontally drilled from a surface hole location approximately 1,087' FWL and 616' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 340' FSL of Section 31-16S-31E. The first take point will be ~340' FSL and 100' FEL of Section 31, T16S-31E, and the last take point will be ~340' FSL and 100' FWL of Section 31, T16S-31E.

7. The completed interval of the Petty Federal Com 31 CD 001H well ("001H") will be a non-standard location. Longfellow will seek administrative approval of the non-standard location.

8. The Petty Federal Com 31CD 006H well is a proximity well. With the proximity tracts, the completed intervals of all wells other than the 001H will meet standard setback requirements.

9. The first and last take points of all wells will meet standard setback requirements.

10. Approval of the HSU and pooling of all mineral interest owners therein will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

11. A Form C-102 for each well is included as **Exhibit A-1**. The Form C-102 also indicates the locations of each surface hole, bottom hole, and the first and last take points.

12. A plat for each proposed spacing unit showing tracts, tract ownership, and applicable lease numbers is included in **Exhibit A-2**.

13. **Exhibit A-3** includes the unit recap, highlighting the pooled parties, for each proposed spacing unit.

14. A sample of the well proposal letter and the authority for expenditure ("AFE") for each well is included in **Exhibit A-4**. The estimated costs of the wells set forth in the AFEs are

fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

15. A chronology of contacts with the non-joined working interest owners is attached as **Exhibit A-5**.

16. There are no depth severances in the formations being pooled.

17. A diligent search of recorded public documents was conducted for Eddy County, New Mexico, where the wells will be located, to obtain contact information for parties entitled to notification. I mailed all working interest owners a well proposal, including an Authorization for Expenditure ("AFE"), for each well.

18. LFE has made a good faith effort to obtain voluntary joinder of the working interest owners in the proposed wells.

19. LFE requests the Division to approve operating charges and costs of supervision while drilling of \$12,000/month and, after completion, \$1,200/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures

20. LFE requests the maximum cost, plus 200% risk charge, be assessed against non-consenting working interest owners.

21. LFE requests that it be designated operator of the wells.

22. The exhibits attached hereto were prepared by me or compiled from LFE's business records under my supervision.

23. The granting of the applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.

24. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

WORK EXPERIENCE**Longfellow Energy, LP, Dallas, TX****October 2022 – Present***Senior Landman*

- Handled the land department responsibilities covering two large gas fields in West Texas
- Diligently vetted, initiated, and implemented land and GIS software for the company to house the various land records for the company's active development and legacy assets
- Worked closely with the asset development team to explore and evaluate bolt-on and new asset target areas in West Texas and New Mexico
- Worked with land department and accounting department staff to implement new division order and owner relations response processes
- Initiated the hiring, interviewing, selection and training process of a direct report in the land team
- Established revenue and JIB decks for horizontal wells in Texas and New Mexico

Chief Oil & Gas, LLC, Dallas, TX**April 2020 – August 2022***Landman*

- Managed operated and non-operated assets across multiple counties within the Marcellus Basin of Northeast Pennsylvania
- Drafted and reviewed highly detailed working interest workbooks for multi-partner horizontal wells
- Reviewed operating agreements to ensure that company operations were conducted in accordance with the provision of the contracts
- Established new drilling units and facilitated the drilling of numerous cross-unit wells in coordination with multiple non-operators
- Drafted JOAs, Designations of Pooled Units, Memorandums and prepared proposals for new wells
- Provided integral assistance in sales efforts and transition services between Chief Oil & Gas as seller and Chesapeake Energy as purchaser of Chief's properties

Silver Creek Oil & Gas, LLC, Irving, TX**June 2019 – December 2019***Landman*

- Performed subsurface evaluations for lands in North Texas, Oklahoma, and North Permian
- Prepared detailed presentations for lands subject to JOAs, Participation Agreements, Unit Agreements and Farmouts
- Handled day-to-day revenue and expense deck maintenance

Callon Petroleum Company, Midland, Texas**May 2016 – May 2019***Project Landman*

- Managed assets of over 20,000 net acres in the Midland Basin
- Established fourteen horizontal units through pooling and allocation methods
- Proficiently delegated and supervised drill preparation, curative, and leasing projects by multiple brokerage groups
- Negotiated JOAs for both operated and non-operated units
- Facilitated several complex trades and acquisitions for operated acreage, leasehold, and minerals
- Worked closely with facility engineers to establish large production infrastructure to support drilling and completion operations
- Negotiated Surface Use, Saltwater Disposal, and Surface Purchase Agreements
- Routinely gave presentations to senior management regarding asset development progress

432.413.5210 StuartfGaston@gmail.com

Big Star Oil & Gas LLC, Midland, TX

May 2013 – May 2016

Land Representative

- Performed due diligence for newly acquired assets on over 5,300 acres in the Midland Basin
- Prepared Title Material for drilling operation for both vertical and horizontal wells
- Reviewed JOAs and prepared ownership reports on Working Interests for acquiring producing wells
- Negotiated Leases for over 2,500 gross acres in Howard and Dawson Counties, Texas
- Cured title requirements and prepared pay sheets as set out by DOTOs
- Negotiated surface matters and acquired RoWs for drilling operation
- Experience with pooled units and identifying pooling provisions of multiple lease forms

OPERATOR CERTIFICATIONS

I hereby certify that the information contained herein is true and complete to the best of my knowledge and belief, and, if the well is a vertical or directional well, that this organization either owns a working interest or unleased mineral interest in the land including the proposed bottom hole location or has a right to drill this well at this location pursuant to a contract with an owner of a working interest run leased mineral interest, or to a voluntary pooling agreement or a compulsory pooling order here to fore entered by the division.

If this well is a horizontal well, I further certify that this organization has received the consent of at least one lessee or owner of a working interest or unleased mineral interest in each tract (in the target pool or formation) in which any part of the well's completed interval will be located or obtained a compulsory pooling order from the division.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

OPERATOR CERTIFICATIONS

I hereby certify that the information contained herein is true and complete to the best of my knowledge and belief, and, if the well is a vertical or directional well, that this organization either owns a working interest or unleased mineral interest in the land including the proposed bottom hole location or has a right to drill this well at this location pursuant to a contract with an owner of a working interest run leased mineral interest, or to a voluntary pooling agreement or a compulsory pooling order here to fore entered by the division.

If this well is a horizontal well, I further certify that this organization has received the consent of at least one lessee or owner of a working interest or unleased mineral interest in each tract (in the target pool or formation) in which any part of the well's completed interval will be located or obtained a compulsory pooling order from the division.

Page 9 of 18

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

OPERATOR CERTIFICATIONS

I hereby certify that the information contained herein is true and complete to the best of my knowledge and belief, and, if the well is a vertical or directional well, that this organization either owns a working interest or unleased mineral interest in the land including the proposed bottom hole location or has a right to drill this well at this location pursuant to a contract with an owner of a working interest run leased mineral interest, or to a voluntary pooling agreement or a compulsory pooling order here to fore entered by the division.

If this well is a horizontal well, I further certify that this organization has received the consent of at least one lessee or owner of a working interest or unleased mineral interest in each tract (in the target pool or formation) in which any part of the well's completed interval will be located or obtained a compulsory pooling order from the division.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

Re: Well Proposals – Petty Federal Com 31CD 001H, 002H, 003H, 004H, 005H, 006H, 007H, 008H, 009H
South Half (S/2) of Section 31-16S-31E, Eddy County, New Mexico

To whom it may concern:

Longfellow Energy, LP (“Longfellow”) hereby proposes to drill and complete the following wells “back to back”:

- Petty Federal Com 31CD 001H, with an approximate true vertical depth of 5,867’, as a horizontal well in the Yeso formation (with an approximate measured depth of 11,272’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 441’ FWL & 1,717’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 2,628’ FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 002H, with an approximate true vertical depth of 4,961’, as a horizontal well in the Yeso formation (with an approximate measured depth of 10,337’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 441’ FWL & 1,697’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 2,319’ FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 003H, with an approximate true vertical depth of 5,226’, as a horizontal well in the Yeso formation (with an approximate measured depth of 10,562’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 441’ FWL & 1,677’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 2,159’ FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 004H, with an approximate true vertical depth of 5,875’, as a horizontal well in the Yeso formation (with an approximate measured depth of 11,165’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 441’ FWL & 1,657’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 1,785’ FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 005H, with an approximate true vertical depth of 4,969’, as a horizontal well in the Yeso formation (with an approximate measured depth of 10,280’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 441’ FWL & 1,637’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 1,410’ FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 006H, with an approximate true vertical depth of 5,244’, as a horizontal well in the Yeso formation (with an approximate measured depth of 10,572’) and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 1,085’ FWL & 676’ FSL of Section 32-16S-31E; with a Bottom Hole Location of 20’ FWL & 1,250’ FSL of Section 31-16S-31E.

July 9, 2025

Petty Federal Com 31CD 001H, 002H, 003H, 004H, 005H, 006H, 007H, 008H, 009H

Well Proposals

- Petty Federal Com 31CD 007H, with an approximate true vertical depth of 5,894', as a horizontal well in the Yeso formation (with an approximate measured depth of 11,173') and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 1,086' FWL & 656' FSL of Section 32-16S-31E; with a Bottom Hole Location of 20' FWL & 875' FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 008H, with an approximate true vertical depth of 4,987', as a horizontal well in the Yeso formation (with an approximate measured depth of 10,267') and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 1,086' FWL & 636' FSL of Section 32-16S-31E; with a Bottom Hole Location of 20' FWL & 500' FSL of Section 31-16S-31E.
- Petty Federal Com 31CD 009H, with an approximate true vertical depth of 5,243', as a horizontal well in the Yeso formation (with an approximate measured depth of 10,541') and an estimated cost of \$6,096,876 for a completed producing well, as set forth in detail on the enclosed AFE Well Cost Estimate dated 7/7/2025. Surface Hole Location is 1,087' FWL & 616' FSL of Section 32-16S-31E; with a Bottom Hole Location of 20' FWL & 340' FSL of Section 31-16S-31E.

To facilitate these wells and for efficient development, Longfellow proposes to form a Drilling Spacing Unit (the "DSU") covering the South Half (S/2) of Section 31-16S-31E, containing approximately 302.07 acres. For development of horizontal Yeso wells within the DSU, Longfellow proposes a new horizontal joint operating agreement dated January 1, 2026, a modified 2015 Horizontal AAPL Form 610 Operating Agreement, (hereinafter referred to as the "HJOA") to govern horizontal Yeso development within the DSU, to supersede existing JOAs (if any), containing the following provisions:

- Contract Area being the S/2 of Section 31-16S-31E, limited to the Yeso formation
- Applies to horizontal well development only
- 100% / 300% / 300% non-consent penalties
- \$12,000 / \$1,200 drilling and producing monthly overhead rates

According to our title examination, Chevron U.S.A. Inc. owns a working interest as to the proposed DSU. We respectfully request that you select one of the following three options with regard to your interest in the proposed wells:

Option 1 - Participate with your working interest in the proposed wells, pursuant to the terms of the HJOA

Option 2 – Elect to not participate in the proposed wells, pursuant to the terms of the HJOA (an election of "Non-Consent")

Option 3 - Assign all of your leasehold rights, and the existing wells (if any) associated with those rights, in the DSU area to Longfellow for \$2,000/net acre (delivering your existing Net Revenue Interest)

Please indicate your election as to the aforesaid three options in the space provided below, and execute and return a copy of this letter to the undersigned within 30 days of receipt of this proposal. Your election of Option 1 and 2, should be returned to Longfellow by U.S. mail to the letterhead address below or email to Stuart.Gaston@longfellowenergy.com. Upon receipt of your election, I will send the HJOA for your review and execution. Should you elect to assign your interest pursuant to Option 3, please return your election and I will send an Assignment for your review and execution. If you prefer to review the HJOA prior to making an election, please request a copy by email and I will furnish for your review.

July 9, 2025

Well Proposals

Longfellow looks forward to working with you on this proposal and I encourage you to contact me with any questions pertaining to the proposed wells. Please be advised, to facilitate timely development, Longfellow may file with the New Mexico Oil Conservation Division for compulsory pooling of any uncommitted working interest owners. Should you have any questions concerning this matter, please contact the undersigned by phone at 972-532-8205 or by e-mail to Stuart.Gaston@longfellowenergy.com.

Sincerely,

LONGFELLOW ENERGY, LP

Stuart Gaston
Senior Landman

_____ Option 1. The undersigned elects to participate in the drilling and completion of the proposed wells. Enclosed please find the executed AFEs please forward me the HJOA for my execution.

_____ Option 2. The undersigned elects to not participate in the drilling and completion of the proposed wells, pursuant to the non-consent provisions of the HJOA. Please forward me the HJOA for my execution.

_____ Option 3. The undersigned elects to assign all of its leasehold rights, and the wells associated with those rights (if any), in the South Half (S/2) of Section 31-16S-31E to Longfellow for \$2,000 per net acre, delivering our existing Net Revenue Interest.

AGREED to and ACCEPTED this _____ day of _____, 2025.

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF LONGFELLOW ENERGY, L.P.
FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case No. 25572

SELF-AFFIRMED STATEMENT OF GEOLOGIST JACOB S. DEHAMER

I, Jacob S. DeHamer, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.
2. I am a Geologist for Longfellow Energy, L.P. ("LFE") and am familiar with the subject applications and geology involved.
3. This testimony is submitted in connection with the filing by LFE of the above-referenced compulsory pooling application pursuant to 19.15.4.12(A)(1) NMAC.
4. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology matters. A summary of my education and work experience is as follows: I graduated from Calvin College in 2006 with a Bachelor's of Science in Geology and from Louisiana State University in 2010 with a Master's Degree in Applied Geology. I have worked as petroleum geologist in the oil and gas industry for 17 years. I have been employed with LFE in its geology department since 2022. I have worked on New Mexico oil and gas matters since 2022. My education and work experience are reflected in my resume, appended hereto.
5. **Exhibit B-1** is a general location map indicating the location of the proposed horizontal spacing units ("HSU").

6. **Exhibit B-2** is a subsea structure map and cross-section map showing the structure of the top of the Yeso formation. Contour interval is 50'. The Yeso structure dips NW to SE in the Petty CD unit. The cross section referenced in Exhibit B-3 is annotated.

7. **Exhibit B-3** is a stratigraphic cross section showing the gross stratigraphic section of the Paddock and Blinbry members of the Yeso formation. The total gross thickness of the Yeso section in the Petty CD Unit is approximately 1350' thick.

8. **Exhibit B-4** is a gunbarrel diagram depicting each well. These diagrams show the approximate landing zones in reference to the type log for the area and the associated spacing of the wellbores within the half-section width HSU.

9. **Exhibit B-5** is a gross isopach map showing the gross Yeso thickness in the Petty CD unit project area. The Yeso thickness is between 1200 and 1400' thick in adjacent sections to the Petty CD Unit.

10. The measured depths and true vertical depths for each well are approximately as follows:

WELL	MD	TVD
Petty Federal Com 31CD 001H	11,272'	5,867'
Petty Federal Com 31CD 002H	10,337'	4,961'
Petty Federal Com 31CD 003H	10,562'	5,226'
Petty Federal Com 31CD 004H	11,165'	5,875'
Petty Federal Com 31CD 005H	10,280'	4,969'
Petty Federal Com 31CD 006H	10,572'	5,244'
Petty Federal Com 31CD 007H	11,173'	5,894'
Petty Federal Com 31CD 008H	10,267'	4,987'
Petty Federal Com 31CD 009H	10,541'	5,243'

11. Based on my geologic study of the area, I conclude the following:
 - a. The horizontal spacing and proration units are justified from a geologic standpoint.
 - b. There are no structural impediments or faulting that will interfere with horizontal development.
 - c. Each quarter-quarter section in the Yeso HSUs will contribute more or less equally to production.
 - d. The planned E-W well orientation is consistent with horizontal development along the Yeso Trend.
12. The exhibits to this testimony were prepared by me or compiled from LFE's business records.
13. The granting of the Application is in the interests of conservation, the prevention of waste, and the protection of correlative rights.
14. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Summary Technically focused petroleum geologist with over 15 years of diverse experience including acquisitions and divestitures, reservoir characterization and asset development and exploration.

Education **Louisiana State University**, Baton Rouge, Louisiana
Masters Degree in Applied Geology 2010

Calvin College, Grand Rapids, Michigan
B.S. Geology 2006

Professional Experience

Longfellow Energy, LLC, Dallas, TX
Geologist (May 2022-Present)

- Source and evaluate domestic and international exploration and development opportunities
- Plan and execute development programs in New Mexico and W. Texas assets

Fleur de Lis Energy, LLC, Dallas, TX

Vice President (2020-2022)

- Technical VP and the geologic lead on a team responsible for the evaluation of unconventional and conventional acquisition targets in the Permian, South Texas, Williston, Powder River and Green River Basins
- Build and maintain internal deal flow pipeline of marketed and off market acquisition targets
- Manage successful divestment program for diversified group of unconventional, conventional, and secondary recovery properties in Wyoming, Oklahoma, and Texas
- Work with multiple asset teams to develop sale side materials across all disciplines including reservoir engineering, geology, operations and land

Director of Corporate Exploitation (2019-2020)

- Manage multi-discipline team tasked with maximizing value within current operated portfolio
- Identify and determine economic viability of capital projects contributing to cost reductions and production improvements
- Long term planning of large-scale development projects within FDL's current asset base such as tertiary field expansions and unconventional new drill and refrac programs

Senior Geologist (2015-2019)

- Responsible for the integration of advanced logs, routine and special core analysis, and well performance to appraise reservoir properties, horizontal drilling targets, and resource in place for both oil and gas reservoirs
- Technical oversight of operations geologists for Midland Basin, Wyoming EOR, and Fort Worth Basin asset teams
- Managed day to day geologic operations of Wyoming EOR properties
- Work with corporate and field operations staff to understand field wide conformance, implement re-drill programs and plan for field expansion to existing and new development targets
- Lead geologist in valuation, assessment and purchase of \$1B of assets in the Midland and Fort Worth Basins

Cascade Petroleum LLC, Denver, Co**Senior Geologist (2012-2015)**

- Senior geologist responsible for day to day geologic operations, development planning, managing 3rd party consulting, and contributing to certain acquisition and divestiture projects
- Executed geologic operations of a ten well exploration program targeting Pennsylvanian Carbonates in Eastern Colorado
- Field development for the Section 8 field in Eastern Colorado
- Integration of 3D Seismic into planning and permitting of well locations
- Development of conventional risk assessment model to determine prospect ranking and value throughout acreage position
- Planning and execution of logging and advanced coring program for exploration wells
- Development of a geologic and petrophysical model to assess and explore Pennsylvanian Carbonates
- Development of petroleum systems model to identify source rocks for producing reservoirs in Cascade's project area.
- Integrated basin assessments of the Powder River, Uinta, Piceance and Hardeman Basins.
- Acquisition assessments for producing and non-producing properties in major hydrocarbon basins including Uinta, Powder River, and DJ Basins

Newfield Exploration, Denver CO**Geologist (2010-2012)**

- Staff geologist in both operations and new ventures for company's Rocky Mountain asset base
- Responsible for 2-3 rig well planning and geosteering short and long lateral Middle Bakken targets
- Worked within an integrated team of drilling engineers, completion engineers, and geologists to develop the NFX acreage position across the Williston Basin
- Exploration assessment for grass roots growth in the Southern Alberta Basin of Montana
- Responsible for early assessment of company acreage in the Powder River and DJ Basins
- Gained a myriad of exposure to variety of liquids plays across the Rocky Mountain region including the Niobrara, Frontier, Turner, Uteland Butte, Wasatch, and Pennsylvanian Carbonates
- Worked among a team of exploration and assessment geologists and engineers to place a value on exploration targets for Newfield

Wolverine Gas and Oil Corp., Grand Rapids, MI**Geologist (September 2005-December 2007)**

- Work with Wolverine Shale Team to assess Devonian Shale Plays in the Appalachian Basin
- Evaluation of potential oil and gas plays in the Black Warrior Basin, Big Horn Basin, Idaho-Wyoming Thrust Belt, Central Utah Thrust Belt, Arkoma Basin and the Appalachian Foreland Basin.
- Facies differentiation of the Navajo Sandstone in the Covenant Field, Central Utah
- Assist in the development of a petroleum systems model for the sourcing of Covenant Field, Central Utah

Additional Skills and Associations

Memberships: ADAM, AAPG, RMAG, SPWLA, WTGS, and DGS

Software: Kingdom, Petra, Geographix, Boresight, and SES

Field Courses: Wyoming Geologic Association Frontier Formation Symposium, Denver Well Logging Society Permian Basin Symposium, Newfield Uinta Basin/Book Cliffs Field Trip, AAPG Carbonate and Shaly Sand Petrophysical Analysis, RMAG Ichnology of Carbonate Systems, Newfield Internal Risk Assessment, DWLS Petrophysics in Horizontal Logging

AFFIRMATION OF NOTICE

I, Sharon T. Shaheen, attorney for LONGFELLOW ENERGY, L.P. (“Longfellow”), Applicant in the above-captioned matter, state and affirm the following:

I caused notice of the application to be sent by certified mail through the United States Postal Service on August 21, 2025, to all interest owners sought to be pooled in this proceeding. A sample notice letter to all interested parties is attached hereto as Exhibit C-1. A chart showing the results of certified mailing is attached as Exhibit C-2. Notice was also directed to all such owners by publication in the Carlsbad Current Argus on August 26, 2025, as shown in the Notice attached hereto as Exhibit C-4. The attached exhibits demonstrate to my satisfaction that all owners sought to be pooled were properly served.

Longfellow has conducted a good faith, diligent effort to find the names and correct addresses for the interest-owners entitled to receive notice of the Application filed herein.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Re: Case No. 25572 – Application of Longfellow Energy, L.P. for Compulsory Pooling, Eddy County, New Mexico – **Petty Federal Com 31CD wells**

Dear Interest Owner:

This will advise that pursuant to NMSA 1978, § 70-2-17, LONGFELLOW ENERGY, L.P. ("Longfellow") has filed an application with the New Mexico Oil Conservation Division seeking an order pooling all uncommitted interests in the proposed well described below. You are receiving this notice because you may have an interest in this well.

Case No. 25572. Application of Longfellow Operating Partners, LLC for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division approving a standard ~320-acre horizontal spacing and proration unit ("HSU"), with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico and pooling all mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) underlying the HSU. Applicant proposes to drill the following 1.0-mile wells in the HSU: Petty Federal Com 31CD 001H well, to be horizontally drilled from a surface hole location ("SHL") ~441' FWL and 1,717' FSL of Section 32-16S-31E and a bottomhole location ("BHL") ~20' FWL & 2,628' FSL of Section 31-16S-31E ("001H"); Petty Federal Com 31CD 002H well, to be horizontally drilled from a SHL ~441' FWL and 1,697' FSL of Section 32-16S-31E and a BHL ~20' FWL & 2,319' FSL of Section 31-16S-31E; Petty Federal Com 31CD 003H well, to be horizontally drilled from a surface hole location approximately 441' FWL and 1,677' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 2,159' FSL of Section 31-16S-31E; Petty Federal Com 31CD 004H well, to be horizontally drilled from a SHL ~441' FWL and 1,657' FSL of Section 32-16S-31E and a BHL ~20' FWL & 1,785' FSL of Section 31-16S-31E; Petty Federal Com 31CD 005H well, to be horizontally drilled from a SHL ~441' FWL and 1,637' FSL of Section 32-16S-31E and a BHL ~20' FWL & 1,410' FSL of Section 31-16S-31E; Petty Federal Com 31CD 006H well, to be horizontally drilled from a SHL ~1,085' FWL and 676' FSL of Section 32-16S-31E and a BHL ~20' FWL & 1,250' FSL of Section 31-16S-31E; Petty Federal Com 31CD 007H well, to be horizontally drilled from a SHL ~1,086' FWL and 656' FSL of Section 32-16S-31E and a bottomhole location approximately 20' FWL & 875' FSL of Section 31-16S-31E; Petty Federal Com 31CD 008H well, to be horizontally drilled from a SHL ~1,086' FWL and 636' FSL of Section 32-16S-31E and a BHL ~20' FWL & 500' FSL of Section 31-16S-31E; and Petty Federal Com 31CD 009H well, to be horizontally drilled from a SHL ~1,087' FWL and 616' FSL of Section 32-16S-31E and a BHL ~20' FWL & 340' FSL of Section 31-16S-31E. The

All Interest Owners

Page 2

completed interval of the 001H is in a non-standard location ("NSL"). Applicant will seek administrative approval of the NSL. With the proximity tracts, the completed intervals of the other wells will meet standard setback requirements. The first and last take points of all wells will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and wells to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 6 miles Northeast of Loco Hills, New Mexico.

The attached application will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division on **September 11, 2025**, beginning at 9:00 a.m. Hearings are currently conducted in a hybrid fashion, both in-person at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe NM 87505 and via a virtual meeting platform. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date at <http://www.emnrd.state.nm.us/OCD/hearing-info>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony.

Failure to appear at that time and become a party of record will preclude you from challenging these applications at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance **eight days prior to the hearing**, no later than **September 3, 2025**, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement **seven days prior to the hearing**, no later than **September 4, 2025**, in accordance with Division Rule 19.15.4.13 NMAC.

Please feel free to contact me if you have any questions about this application.

Very truly yours,

/s/ Sharon T. Shaheen

Longfellow Energy, L.P. has filed an application with the New Mexico Oil Conservation Division as follows:

Case No. 25572. Application of Longfellow Operating Partners, LLC for Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division approving a standard ~320-acre horizontal spacing and proration unit (HSU), with proximity tracts, comprised of the S/2 of Section 31, Township 16 South, Range 31 East in Eddy County, New Mexico and pooling all mineral interests in the Yeso formation (Cedar Lake; Glorieta-Yeso [96831]) underlying the HSU. Applicant proposes to drill the following 1.0-mile wells in the HSU: Petty Federal Com 31CD 001H well, to be horizontally drilled from a surface hole location (SHL) ~441 FWL and 1,717 FSL of Section 32-16S-31E and a bottomhole location (BHL) ~20 FWL & 2,628 FSL of Section 31-16S-31E (001H); Petty Federal Com 31CD 002H well, to be horizontally drilled from a SHL ~441 FWL and 1,697 FSL of Section 32-16S-31E and a BHL ~20 FWL & 2,319 FSL of Section 31-16S-31E; Petty Federal Com 31CD 003H well, to be horizontally drilled from a surface hole location approximately 441 FWL and 1,677 FSL of Section 32-16S-31E and a bottomhole location approximately 20 FWL & 2,159 FSL of Section 31-16S-31E; Petty Federal Com 31CD 004H well, to be horizontally drilled from a SHL ~441 FWL and 1,657 FSL of Section 32-16S-31E and a BHL ~20 FWL & 1,785 FSL of Section 31-16S-31E; Petty Federal Com 31CD 005H well, to be horizontally drilled from a SHL ~441 FWL and 1,637 FSL of Section 32-16S-31E and a BHL ~20 FWL & 1,410 FSL of Section 31-16S-31E; Petty Federal Com 31CD 006H well, to be horizontally drilled from a SHL ~1,085 FWL and 676 FSL of Section 32-16S-31E and a BHL ~20 FWL & 1,250 FSL of Section 31-16S-31E; Petty Federal Com 31CD 007H well, to be horizontally drilled from a SHL ~1,086 FWL and 656 FSL of Section 32-16S-31E and a bottomhole location approximately 20 FWL & 875 FSL of Section 31-16S-31E; Petty Federal Com 31CD 008H well, to be horizontally drilled from a SHL ~1,086 FWL and 636 FSL of Section 32-16S-31E and a BHL ~20 FWL & 500 FSL of Section 31-16S-31E; and Petty Federal Com 31CD 009H well, to be horizontally drilled from a SHL ~1,087 FWL and 616 FSL of Section 32-16S-31E and a BHL ~20 FWL & 340 FSL of Section 31-16S-31E. The completed interval of the 001H is in a non-standard location (NSL). Applicant will seek administrative approval of the NSL. With the proximity tracts, the completed intervals of the other wells will meet standard setback requirements. The first and last take points of all wells will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and wells to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 6 miles Northeast of Loco Hills, New Mexico. This application will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division on September 11, 2025, beginning at 9:00 a.m. Hearings are currently conducted in a hybrid fashion, both in-person and at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe NM 87505 and via a virtual meeting platform. To participate in the

electronic hearing, see the instructions posted on the docket for the hearing date: <https://www.emnrd.nm.gov/ocd/hearing-info/>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging these applications at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance by September 3, 2025, eight (8) days before the hearing, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement by September 4, 2025, seven days before the hearing in accordance with Division Rule 19.15.4.13 NMAC. For further information, contact the applicants attorney, Sharon T. Shaheen, Spencer Fane, LLC, 325 Paseo de Peralta, Santa Fe, New Mexico 87501, (505) 986-2678.
