DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF TASCOSA ENERGY PARTNERS,
LLC FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO.**

CASE NO. 25619

**SELF-AFFIRMED STATEMENT
OF JOHN SHOBERG**

1. I am a Landman for Tascosa Energy Partners, LLC ("Tascosa") and am over 18 years of age. I have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division ("Division") and my credentials as an expert in petroleum land matters were accepted and made a matter of record.

2. Copies of Tascosa's application and proposed hearing notice are attached as **Exhibit A-1**.

3. None of the parties proposed to be pooled in this case indicated opposition to this matter proceeding by affidavit; therefore I do not expect any opposition at hearing.

4. Tascosa seeks to pool all uncommitted interests in the Bone Spring formation underlying a 720-acre, more or less, standard horizontal spacing unit comprised of the S/2 NE/4 and N/2 SE/4 of Section 7, the N/2 S/2 and S/2 N/2 of Section 8, and the S/2 NW/4, N/2 SW/4, SW/4 NE/4 and NW/4 SE/4 of Section 9, Township 20 South, Range 26 East, Eddy County, New Mexico ("Unit").

5. The Unit will be dedicated to the **Anna 79 Fee #203H** well ("Well"), which will be drilled from a surface hole location in the NE/4 SW/4 (Unit K) of Section 7 to a bottom hole location in the NW/4 SE/4 (Unit J) of Section 9.

6. The completed interval of the Well will be orthodox.

**Tascosa Energy Partners, LLC
Case No. 25619
Exhibit A**

7. **Exhibit A-2** contains the C-102 for the Well.
8. The completed interval of the Well will be located within 330' of the quarter-quarter section line separating the S/2 N/2 and N/2 S/2 of Sections 7, 8, and 9 to allow for the creation of a 720-acre standard horizontal spacing unit.
9. **Exhibit A-3** contains a plat identifying ownership by tract in the Unit. This exhibit also includes any applicable lease numbers, a unit recapitulation, and the interests Tascosa seeks to pool highlighted in yellow.
10. Tascosa has conducted a diligent search of all county public records, including phone directories and computer databases, as well as internet searches, to locate the interest owners it seeks to pool.
11. **Exhibit A-4** contains a sample well proposal letter and AFE sent to working interest owners for the Well. The estimated costs reflected on the AFE are fair and reasonable and comparable to the cost of other wells of similar depth and length drilled in the subject formation in the area.
12. In my opinion, Tascosa made a good-faith effort to reach voluntary joinder of uncommitted interests in the Well as indicated by the chronology of contact described in **Exhibit A-5**.
13. As operator of the Unit and the Well, Tascosa requests overhead and administrative rates of \$9,800 per month while the Well is being drilled and \$980 per month while the Well is producing. These rates are fair and are comparable to the rates charged by Tascosa and other operators in the vicinity.
14. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

15. In my opinion, the granting of Tascosa's application would serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

16. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date next to my electronic signature below.

CASE NO. 25619

APPLICATION

Pursuant to NMSA 1978, Section 70-2-17, Tascosa Energy Partners, LLC (OGRID No. 329748) (“Tascosa” or “Applicant”) applies for an order pooling all uncommitted interests in the Bone Spring formation underlying a 720-acre, more or less, standard horizontal spacing unit comprised of the S/2 NE/4 and N/2 SE/4 of Section 7, the N/2 S/2 and S/2 N/2 of Section 8, and the S/2 NW/4, N/2 SW/4, SW/4 NE/4 and NW/4 SE/4 of Section 9, Township 20 South, Range 26 East, Eddy County, New Mexico (“Unit”). In support of this application, Tascosa states the following:

1. Applicant is a working interest owner in the Unit and has the right to drill wells thereon.
2. The Unit will be dedicated to the **Anna 79 Fee #203H** well (“Well”), which will be drilled from a surface hole location in the NE/4 SW/4 (Unit K) of Section 7 to a bottom hole location in the NW/4 SE/4 (Unit J) of Section 9.
3. The completed interval of the Well will be orthodox.
4. The completed interval of the Well will be located within 330’ of the quarter-quarter section line separating the S/2 N/2 and N/2 S/2 of Sections 7, 8, and 9 to allow for the creation of a 720-acre standard horizontal spacing unit.

**Tascosa Energy Partners, LLC
Case No. 25619
Exhibit A-1**

5. Applicant has undertaken diligent, good-faith efforts to obtain voluntary agreements from all interest owners to participate in the drilling of the Well but has been unable to obtain voluntary agreements from all interest owners.

6. The pooling of uncommitted interests will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

7. In order to allow Applicant to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in the Unit should be pooled and Applicant should be designated as the operator of the Well and Unit.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on October 9, 2025, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the Unit;
- B. Approving the Well in the Unit;
- C. Designating Applicant as operator of the Unit and the Well to be drilled thereon;
- D. Authorizing Applicant to recover its costs of drilling, equipping and completing the Well;
- E. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- F. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the Well against any working interest owner who does not voluntarily participate in the drilling of the Well.

**APPLICATION OF TASCOSA ENERGY PARTNERS,
LLC FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO.**

CASE NO. 25619

**SELF-AFFIRMED STATEMENT
OF HELDER ALVAREZ**

1. I am a Geological Consultant with Tascosa Energy Partners, LLC (“Tascosa”), and am over 18 years of age. I have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division (“Division”) and my credentials as an expert in petroleum geology were accepted and made a matter of record.

2. I am familiar with the geological matters that pertain to the above-referenced case.

3. **Exhibit B-1** is a regional locator map that identifies the Anna project area for the Bone Spring horizontal spacing unit that is the subject of this application.

4. **Exhibit B-2** is a cross-section location map for the proposed horizontal spacing units within the Bone Spring formation. The approximate wellbore path for the **Anna 79 Fee #203H** proposed well (“Well”) is represented by a dashed line. Existing producing wells in the targeted interval are represented by solid orange lines. This map identifies the cross-section running from A-A’ and includes the cross-section well names.

5. **Exhibit B-3** is a Subsea Structure map of the Bone Spring formation in TVD subsea with a contour interval of 50 ft. The map identifies the approximate wellbore path for the proposed Well with an orange line. It also identifies the location of the cross-section running from A-A’ in proximity to the proposed Well. The data points are indicated by red triangles. The map

**Tascosa Energy Partners, LLC
Case No. 25619
Exhibit B**

demonstrates the formation is gently dipping to the southwest in this area. I do not observe any faulting, pinch-outs, or geologic impediments to developing the targeted intervals with horizontal wells.

6. **Exhibit B-4** is a structural cross-section that identifies two wells penetrating the targeted interval, which I used to construct a structural cross-section from A to A'. The structural cross section from north to south shows the regional dip to the East-Southeast for the Bone Spring. I used these well logs because they penetrate the targeted interval, are of good quality, and are representative of the geology in the area. The target zone for the proposed Well is the 2nd Bone Spring Sand interval of the Bone Spring formation, which is consistent across the unit. The approximate well-path for the proposed Well is indicated by a dashed line to be drilled from west to east across the units.

7. **Exhibit B-5** is a stratigraphic cross-section from A to A' using the representative wells identified on Exhibit B-4. It contains gamma ray, resistivity, and porosity logs. The cross section is oriented from north to south and is hung on the top of the 3rd Bone Spring formation. The proposed landing zone for the Well is labeled on the exhibit. The approximate well-path for the proposed Well is indicated by a dashed orange line to be drilled from west to east across the units. This cross-section demonstrates the target interval is continuous across the Unit.

8. **Exhibit B-6** is a gun barrel diagram that shows the proposed Well in the Bone Spring formation. The spacing unit is defined by a purple box and is labeled with the well number.

9. In my opinion, a laydown orientation for the Well is appropriate to properly develop the subject acreage because of consistent rock properties throughout the Unit and the preferred fracture orientation in this portion of the trend.

10. Based on my geologic study of the area, the targeted interval underlying the Unit is suitable for development by horizontal wells and the tracts comprising the Unit will contribute more or less equally to the production of the Well.

11. In my opinion, the granting of Tascosa's application will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

12. The exhibits attached hereto were either prepared by me or under my supervision or were compiled from company business records.

13. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date identified next to my signature below.
