None.

ATTORNEYS

STATEMENT OF THE CASE

Targa seeks authorization to drill and operate a redundant Class II acid gas injection well, the Copperhead AGI No. 2 Well (“Well”), at Targa’s Copperhead Gas Processing Facility. The vertical well will be located approximately 1,138 feet from the south line (FSL) and 1,842 feet from the west line (FWL) of Section 13, Township 24 South, Range 32 East, Lea County, New Mexico. The Well will inject treated acid gas into the Bell Canyon and Cherry Canyon formations of the Delaware Mountain Group at a depth of approximately 4,990 to 7,125 feet. The Well’s

maximum daily injection rate will not exceed 26 million standard cubic feet per day, and the Well's maximum surface injection pressure will not exceed 1,004 pounds per square inch gauge.

The Well, as proposed in the C-108, will not cause waste, impair correlative rights, or harm public health or the environment, including through the risk of induced seismicity. In addition, the Well will facilitate the sequestration of CO₂ and TAG, which is in the public interest. Accordingly, Targa's application for the Well comports with the requirements of the Oil and Gas Act and the Division's regulations and should be approved.

PROPOSED EVIDENCE

Witness	Occupation	Estimated Time	Exhibits
Matt Eales	Vice President of Regulatory Affairs	Affidavit	Approx. 3
Paul Ragsdale	Drilling Engineer	Affidavit	Approx. 1
Tuhin Biswas	Geologist	Affidavit	Approx. 2
Jiyue (Jessie) Yu	Reservoir Engineer	Affidavit	Approx. 2

PROCEDURAL MATTERS

Applicant will present this matter by affidavit if there is no opposition to its application.

Respectfully submitted,

HARDY McLEAN LLC
