STATEMENT OF THE CASE

Select seeks authorization to drill, complete, and operate a proposed saltwater disposal well in Lea County, New Mexico. Select seeks to inject produced water into the Bell Canyon and Cherry Canyon formations (SWD; Bell Canyon-Cherry Canyon; Code 96802) at a depth of approximately 5,400’ to 6,410’ for the purposes of disposal through its Roadrunner Fed 26 SWD#1 well (“Well”). The Well will be drilled at a location 2,561’ from the south line and 2,086’ from the east line (Unit J) of Section 26,

Township 26 South, Range 35 East, Lea County, New Mexico. Select proposes to inject an average of 15,000 barrels of water per day up to a maximum of 20,000 barrels of water per day and requests that the Division approve a maximum surface injection pressure of 1,080 psi.

The Well, as proposed in the C-108, will not cause waste, impair correlative rights, or harm public health or the environment, including through the risk of induced seismicity. Further, the Well will provide additional saltwater disposal capacity, which is needed in this area.
