BEFORE THE
NEW MEXICO OIL CONSERVATION COMMISSION
MORGAN HALL, STATE LAND OFFICE BUILDING
SANTA FE, NEW MEXICO

June 20, 1973

IN THE MATTER OF:

The hearing called by the Oil Conservation Commission on its own motion to permit Glenn Petroleum Corporation and United States Fire Insurance Company and all other interested parties to appear and show cause why the Crosby Well No. 1 located in Unit O of Section 26, Township 7 South, Range 30 East, Chaves County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

Case No. 4994

IN THE MATTER OF:

The hearing called by the Oil Conservation Commission on its own motion to permit Glenn Petroleum Corporation and United States Fire Insurance Company and all other interested parties to appear and show cause why the Sanders Well No. 1 located in Unit N of Section 25, Township 7 South, Range 30 East, Chaves County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

Case No. 4995

BEFORE: State Geologist, A. L. Porter, Jr.,
Secretary-Director

I. R. Trujillo,
Member

TRANSCRIPT OF HEARING

dearnley, meier & associates

209 SIMMS BLDG. • P.O. BOX 1092 • PHONE 243-6691 • ALBUQUERQUE, NEW MEXICO 87103

1 MR. PORTER: Case 4994.

2 MR. CARR: Case 4994: In the matter of the hearing
3 called by the Oil Conservation Commission on its own motion
4 to permit Glenn Petroleum Corporation and United States Fire
5 Insurance Company and all other interested parties to appear
6 and show cause why the Crosby Well No. 1 located in Unit O
7 of Section 26, Township 7 South, Range 30 East, Chaves
8 County, New Mexico, should not be plugged and abandoned in
9 accordance with a Commission-approved plugging program.

10 I would move that Cases 4994 and 4995 be consolidated.

11 MR. KELLAHIN: No objection.

12 MR. CARR: And a separate order be issued in both.

13 Case 4995: In the matter of the hearing called by
14 the Oil Conservation Commission on its own motion to permit
15 Glenn Petroleum Corporation and United States Fire Insurance
16 Company and all other interested parties to appear and show
17 cause why the Sanders Well No. 1 located in Unit N of
18 Section 25, Township 7 South, Range 30 East, Chaves County,
19 New Mexico, should not be plugged and abandoned in accordance
20 with a Commission-approved plugging program.

21 MR. PORTER: Are there other appearances in this
22 case?

23 MR. KELLAHIN: Jason Kellahin, of Kellahin and Fox,
24 Santa Fe, appearing on behalf of Glenn Petroleum Corporation.

25 MR. PORTER: Proceed, Mr. Carr.

JOSEPH D. RAMEY,

was called as a witness, and having been already duly sworn according to law, testified as follows:

DIRECT EXAMINATION

BY MR. CARR:

Q Will you state your name and occupation for the record?

A Joe D. Ramey, supervisor of the Commission's District One Office in Hobbs, New Mexico.

Q Does District One include Chaves County?

A Yes.

Q The portion of the county involved in this case?

A Yes, it includes that portion of Chaves County in which the two wells are located.

Q Would you briefly describe your duties as District supervisor?

A Our responsibilities in the Hobbs Office is to supervise the drilling, producing, plugging, and testing of oil and gas wells.

Q Do your duties include making recommendations as to whether a well should be plugged and abandoned?

A Yes, they do.

Q Are you familiar with the subject matter in Cases 4994 and 4995?

A Yes, sir. The purpose of this hearing is to permit Glenn Petroleum Corporation to appear and show

1 why their Sanders Well No. 1 and Crosby Well No. 1
2 should not be plugged and abandoned.

3 Q Have you reviewed the reports filed with the Commission
4 concerning these wells? And have you or someone from
5 your staff visited the well sites?

6 A Yes, I personally the well sites early last week.

7 Q Do you have those records with you?

8 A Yes, sir.

9 Q Will you refer to the records and give us a history of
10 each of the wells as reflected in your records?

11 A Which case first?

12 Q The Crosby Well No. 1.

13 A This well had the Form C-101, Notice of Intent to Drill,
14 approved on 6/28/71 for a well location 660 feet from
15 the south line and 1980 feet from the east line of
16 Section 26, Township 7 South, Range 30 East, Chaves
17 County, New Mexico. The well was drilled to a total
18 depth of 3,720 and it had 278 feet of 8 and 5/8 casing
19 circulated and 3,720 feet of 4 inch casing cemented
20 with 200 sacks of cement.

21 The well was tested from 3,454 to 3,641, and was
22 tested quite extensively. It made a small amount of
23 oil, and a larger amount of water.

24 The Sanders Well No. 1 had its C-101 approved on
25 9/24/71 for a well location 660 feet from the south

dearnley, meier & associates

209 SIMMS BLDG., P.O. BOX 1092, PHONE 243-5591, ALBUQUERQUE, NEW MEXICO 87103
1210 FIRST NATIONAL BANK BLDG. EAST, ALBUQUERQUE, NEW MEXICO 87101

1 line and 1980 feet from the west line of Section 25,
2 Township 7 South, Range 30 East, Chaves County, New
3 Mexico. The well was drilled to a total depth of
4 280 feet on December 9th, 1971. An 8 5/8 inch casing
5 was set at 278 feet and circulated. In visiting this
6 well site, all we could find was a small pit, and this
7 was a pile of cement.

8 Now, whether this well has been plugged, I do not
9 know. This was probably cement that came out on the
10 surface of the ground in the cementing of the well, so
11 I would assume something had been put on top of the
12 well.

13 The well is covered over with dirt.

14 The Crosby No. 1, as I said, was tested quite
15 extensively. We first contacted Glenn Petroleum
16 Company on April 25th, 1972, asking for delinquent forms,
17 and there was some correspondence on this before I
18 did finally get the forms. However, the well files
19 are complete to date of the work done.

20 Glenn Petroleum Corporation corresponded, and
21 I would like to call your attention to the letter of
22 August 7th, 1972, wherein Mr. Michael Hart wrote to
23 me after I had written to him, saying that at some
24 future date, we were going to set a hearing to let
25 him show cause why the wells should not be plugged

dearnley, meier & associates

209 SIMMS BLDG., P.O. BOX 1092 • PHONE 243-6691 • ALBUQUERQUE, NEW MEXICO 87103
1216 FIRST NATIONAL BANK BLDG. EAST • ALBUQUERQUE, NEW MEXICO 87108

1 and abandoned. Briefly in this letter, he states that
2 he thinks they have a bad cement job, and they are at
3 the present time attempting to raise funds for a
4 work-over to squeeze and perforate the well. He states
5 that they feel the well will be a producer when funds
6 can be raised to perform this work.

7 I answered this letter on August 11th, 1972, and
8 stated that I would go ahead with the hearing, at which
9 time, he could present his case to the Commission and
10 let them make the decision as to whether the well should
11 be worked over. The well has been sitting idle for
12 some time, not quite a year and a half, with no work
13 done on the well, and it would seem to me this is ample
14 time for the operator to raise the funds necessary to
15 do the work-over.

16 Q Could you give us the date of the last official form
17 filed with the Commission concerning these wells?

18 A On the Crosby No. 1, a Form C-103 outlining the work
19 done on the well dated August 16th, 1972. On the
20 Sanders Well No. 1, there was a C-103 Form filed
21 showing the work done on that well and dated 3/22/72.

22 These letters state that the wells have been
23 temporarily abandoned with no plans to go deeper in
24 the immediate future.

25 Q Mr. Ramey, have you had other communication with Glenn

1 Petroleum Corporation concerning these wells which
2 you have not previously referred to?

3 A I have letters dated April 25th, 1972, June 22nd, 1972,
4 August 4th, 1972, and a letter from Glenn Petroleum
5 Corporation dated August 7th, 1972. I wrote again on
6 August 11th, 1972, and then wrote them on May 1st, 1973,
7 stating that this hearing had been set.

8 Q These were related to the Crosby No. 1?

9 A Yes, sir.

10 Q And you have letters corresponding with them concerning
11 the Sanders Well, is that not correct?

12 A Yes, I have letters dated March 21st, 1972-- The first
13 one is March 1st, 1972, March 21st, 1972, April 3rd,
14 1972, and May 1st, 1973.

15 Q Have they been marked in Cases 4994 and 4995 as OCC
16 Exhibit One?

17 A Yes, sir.

18 Q Do you have a recommendation based on your experience
19 with these wells as to what should be done with them
20 at this time?

21 A I would recommend a plugging program for the Sanders
22 No. 1. Since no pipe can be salvaged from the well,
23 it should be filled with 25 sacks of cement to its
24 total depth, and the hole filled with mud with 10 sacks
25 of cement being placed at the surface with an

1 appropriate marker.

2 On the Crosby No. 1, I think at this time, the
3 well should be plugged and abandoned, but I would not
4 like at this time to recommend a plugging program,
5 because the operators, or whoever would plug the well,
6 may want to pull pipe and salvage pipe.

7 The plugging program would be dependent upon the
8 recovery of the pipe from the well.

9 Q Are the letters included in Exhibit One true and correct
10 copies of the letters on file with the Commission?

11 A Yes, sir.

12 MR. CARR: I offer Exhibit One in Case 4994 and
13 the same exhibit in Case 4995.

14 MR. PORTER: Without objection, the exhibit will be
15 admitted.

16 (Whereupon Oil Conservation Commission Exhibit
17 Number One was admitted in evidence.)

18 MR. CARR: I have nothing further.

19 * * * *

20 CROSS EXAMINATION

21 BY MR. KELLAHIN:

22 Q Mr. Ramey, am I correct in saying that the last report
23 you had on the Crosby No. 1 was dated August 14th, 1972?

24 A Yes, sir, unless there is one underneath that.

25 Q That showed a swab test on that well which did not

dearnley, meier & associates

209 SIMMS BLDG., P.O. BOX 1092, PHONE 243-6691, ALBUQUERQUE, NEW MEXICO 87108
1216 FIRST NATIONAL BANK BLDG. EAST, ALBUQUERQUE, NEW MEXICO 87108

1 produce oil, did it not?

2 A Yes.

3 Q And it also indicated a bad cement job?

4 A Yes, sir. There is one notation on here that this well
5 is higher structurally to the Sun State Well, which I
6 believe is probably the well to the south of it.

7 Q Glenn Petroleum Corporation does have production in the
8 area, does it not?

9 A Yes, they have one well.

10 Q Do they have any other production?

11 A No, sir.

12 Q Actually this well was actively being worked in August
13 of 1972, isn't that correct?

14 A Yes, sir.

15 MR. KELLAHIN: I have nothing further.

16 MR. PORTER: Does anyone else have any questions
17 of Mr. Ramey?

18 (No response)

19 MR. PORTER: If not, the witness may be excused.

20 (Witness excused.)

21 MR. PORTER: Mr. Kellahin, do you have any witnesses?

22 MR. KELLAHIN: Yes, sir.

23 * * * *

24

25

1 MICHAEL L. HART,
2 was called as a witness, and after being duly sworn according
3 to law, testified as follows:
4 DIRECT EXAMINATION
5 BY MR. KELLAHIN:
6 Q Will you state your name, please?
7 A Michael L. Hart.
8 Q Where do you live?
9 A Dallas, Texas.
10 Q Do you have any connection with Glenn Petroleum Corporation?
11 A Yes, I am President and principal stockholder, engineer,
12 and everything else.
13 Q What kind of staff does Glenn Petroleum Corporation have?
14 A I have a part-time girl that answers the telephone.
15 And myself.
16 Q Now, Mr. Hart, you have never testified before the
17 Commission, have you?
18 A No, sir.
19 Q Are you a geologist?
20 A Yes, I am a graduate geologist. I graduated with a
21 bachelor of science degree from Texas A and M University
22 with a minor in petroleum engineering.
23 Q When did you receive your degree?
24 A In 1952.
25 Q What have you done since that date?

1 A I worked as a geologist for Lone Star Gas Company
2 for about five years, and I worked as a geologist and
3 petroleum engineer for Advanced Petroleum Corporation
4 out of Dallas for approximately four years. Since
5 that time, I have been on my own both as a consultant
6 and an operator.

7 Q Were do you operate, Mr. Hart?

8 A Outside of these two wells, in Texas.

9 Q By these two wells, are you talking about the two that
10 are the subject matter of this hearing? You do have
11 three wells, do you not?

12 A Actually there are three wells here, but I was referring
13 to the two that are the subject matter of this hearing,
14 yes.

15 Q You do have a producing well also?

16 A Yes.

17 Q And that is the only production that you have in New
18 Mexico?

19 A Yes, sir.

20 Q The only other operations you have in New Mexico.

21 A Yes.

22 Q Had you ever operated in New Mexico before?

23 A Before I drilled the No. 1 Sun State, I had never
24 operated in the State of New Mexico before.

25 Q Are you familiar with the State of New Mexico's requirements

- 1 for filing various notices and forms?
- 2 A To some extent, I am now. I was kind of feeling in the
- 3 dark at the start.
- 4 Q You have become familiar?
- 5 A Yes.
- 6 Q And have you attempted to file all the necessary forms
- 7 that are required by this Commission?
- 8 A Yes, sir.
- 9 Q To the best of your ability?
- 10 A To the best of my knowledge and beliefs.
- 11 Q Now, referring first to what has been marked as Glenn
- 12 Petroleum Corporation Exhibit One, would you identify
- 13 that exhibit, please?
- 14 A This is a Xerox copy of a land ownership map covering
- 15 the portions of Chaves County on which are located
- 16 the four wells in which I have an interest.
- 17 Q What are those wells?
- 18 A Actually there are three wells in which I have an interest,
- 19 the fourth well is a key well.
- 20 Q What do you mean by a "key well"?
- 21 A It's owned by Sun Oil Company, and it's their No.1 J.
- 22 Q You have no interest in that?
- 23 A No, sir.
- 24 Q What well is that?
- 25 A Well No. 1 on this plat.

1 Q Would you go through the numbers and identify each of
2 the wells?

3 A The No. 2 Well is our No. 1 Sun State Well, which is
4 a producing well, and which is approximately 25 feet
5 high to the Sun Well. As I say, the No. 2 Well is our
6 producing well, and is 25 feet high to the Sun Well.
7 Our No. 3 Well is the Crosby Well No. 1, and it's
8 approximately 25 feet high to our Sun State Well. The
9 No. 4 Well is the Sanders Well No. 1.

10 Q Your Sun State Well, the producing well, what kind of
11 production do you get from that?

12 A Initially it was completed for approximately 45 barrels
13 a day, with a small amount of water, like 2 barrels of
14 water.

15 Q What is your current production?

16 A Approximately 15 barrels a day, with a half a barrel
17 of water.

18 Q So it is not a high water producer?

19 A No, sir.

20 Q Do you know anything about the Sun Oil Company Well?

21 A Yes.

22 Q Does it produce large volumes of water?

23 A Originally it did, but then the water depleted, and
24 it doesn't make but a very normal amount of water now.

25 Q Did they work it over or squeeze it? Do you know?

1 A No.

2 Q Now, referring to what has been marked as Glenn Petroleum
3 Corporation Exhibit Number Two, would you identify that
4 exhibit?

5 A Exhibit Number Two is a Xerox copy of a portion of a log
6 which was run on our No. 1 State, which had the marked
7 perforations and the various porosities, pay zones, and
8 analyses thereof.

9 Q What is Exhibit Number Three?

10 A Exhibit Number Three is a neutron log of a portion of
11 our No. 1 Crosby Well on which has been marked the
12 various perforations along with the completion data and
13 porosity information.

14 Q Now, these are different types of logs, are they not?

15 A Yes, sir.

16 Q They are not the same type of log?

17 A No.

18 Q Can you compare the two as to the producing formations?

19 A The two logs show essentially the same producing
20 formation.

21 Q From a study of the logs, do they indicate to you that
22 the Crosby No. 1 Well is capable of producing?

23 A Mr. Kellahin, when we drilled the well, we had some
24 difficulty in getting the logs down in the well, and
25 this sidewall neutron log was the only log we were

dearnley, meier & associates

209 SIMMS BLDG., P.O. BOX 1092, PHONE 243-6691, ALBUQUERQUE, NEW MEXICO 87103
1216 FIRST NATIONAL BANK BLDG., EAST ALBUQUERQUE, NEW MEXICO 87108

able to get down because of shale problems. But on the strength of this log, because the well was running high, and because the porosity indicated that it was as good as it was in the first well, we went ahead and set pipe, and attempted to complete the well as a producing well.

Q Were you able to complete it as a producing well?

A Well, sir, when we tested the well originally from the perforation with a swab, it indicated and tested with the swab essentially the same way the Sun State Well tested when we swab tested it initially.

The Sun State Well started out making a high quantity of water with the swab, and then the oil cut increased on up, and we put the thing on pump, and the water depleted. The swab test on the Crosby Well indicated essentially the same thing. The two swab tests were comparable, so because of this, we decided to put it on pump immediately.

We went ahead and installed the pumping unit on a full tank battery with a heater and treater. When the thing was put on pump, it would pump essentially nothing but water, which led us to believe that we could pull enough vacuum on the thing where the oil could override the water. But with the pump, we couldn't get anything but water out of it.

dearnley, meier & associates

209 SIMMS BLDG., P.O. BOX 1092, PHONE 243-6691, ALBUQUERQUE, NEW MEXICO 87103
1216 FIRST NATIONAL BANK BLDG. EAST, ALBUQUERQUE, NEW MEXICO 87108

We gave it a test of about 60 days pumping, and it didn't respond, and we went in and tried to do some more work on the thing. Then we put it back on pump again and tested it again, and it hadn't changed. So at that time, we decided that it was obviously a bad cement job between these various areas, some of which carry oil and some of which carry water, and at that time, I talked to my partners and said, "What do you want to do?" They said, "Well, let's not flow anymore money after it, because it's too hard to operate this far from home. Let's just sell the thing to a local operator."

So that's the status of the thing at this time.

Q Now, you heard Mr. Ramey testify that you wrote to him and stated that you were attempting to raise money to do a work-over on the well.

A Right.

Q Were you successful?

A So far, no, because my partners said, "No, let's dispose of it."

Q Is it your present intention to attempt to sell this well?

A Yes.

Q Would you sell it by itself?

A I would like to sell the producing well, and all three

1 wells in a package.

2 Q What is the status of the Sanders No. 1 Well?

3 A When we started the Sanders No. 1 Well, because of
4 surface conditions, it made it imperative to set pipe
5 with cable, because Railroad Mountain ran right through
6 there, and we didn't want to get on top of Railroad
7 Mountain with a rotary rig.

8 So we set a series of pipe on the Sanders Well
9 with a cable tool.

10 Q Is that all that has been done to that well?

11 A That's all.

12 Q Did you cement the surface string?

13 A Yes.

14 Q And circulated the cement?

15 A Yes.

16 Q You heard Mr. Ramey's recommendation that the Sanders
17 Well be plugged. Do you have any objection to the
18 plugging of that well?

19 A I have no objection to plugging the well, although I
20 might want to argue a little bit about the plugging
21 program recommended.

22 Q Do you have a plugging program that you would recommend?

23 A Yes, sir. Since the 8 and 5/8 inch surface pipe has
24 been set in the hole and nothing has been deepened
25 beyond where it was set, I think it would be sufficient

dearnley, meier & associates

209 SIMMS BLDG. • P.O. BOX 1092 • PHONE 243-6691 • ALBUQUERQUE, NEW MEXICO 87103
1216 FIRST NATIONAL BANK BLDG. EAST • ALBUQUERQUE, NEW MEXICO 87108

- 1 to merely fill the hole with mud and put a plug at
- 2 the surface.
- 3 Q Do you think that would adequately protect the formation?
- 4 A I think it would more than adequately protect any
- 5 formations. First of all, when we dug the surface hole
- 6 with the cable tool, it was just as dry at 270 feet
- 7 as it was on the top of the ground.
- 8 Q You encountered no water?
- 9 A There was no water. As a matter of fact, I could sell
- 10 the well if I had water in it. I could make more money
- 11 off fresh water than I did off the oil.
- 12 Q With regard to the Crosby No. 1 Well, Mr. Ramey has
- 13 recommended that this well be plugged in accordance
- 14 with Commission regulations. Do you ask the Commission
- 15 to give you some period of time in which to attempt
- 16 to sell this well, together with the producing well?
- 17 A Yes, that's our request.
- 18 Q Would it be a more favorable package for you to sell
- 19 the two rather than just the one producing well?
- 20 A Yes, sir. The plugging of the second well, the Sanders
- 21 Well, would not materially affect the package, though.
- 22 Q But the plugging of the Crosby would, in your opinion?
- 23 A Very definitely.
- 24 Q How much time are you asking the Commission to give you?
- 25 A I would like to be able to sell it tomorrow, but I have

dearnley, meier & associates

200 SIMMS BLDG. • P.O. BOX 1092 • PHONE 243-0691 • ALBUQUERQUE, NEW MEXICO 87103
1216 FIRST NATIONAL BANK BLDG. EAST • ALBUQUERQUE, NEW MEXICO 87108

- 1 talked to several people, and so far, I have received
- 2 no firm prospect.
- 3 Q But you have some interest in it?
- 4 A I have talked to people who are interested, yes.
- 5 Q Are they checking it at the present time?
- 6 A Yes.
- 7 Q Can you give the Commission any estimate as to what time
- 8 you think you might be able to sell it in?
- 9 A No, I can't.
- 10 Q Well, in order to be safe, would one year be all right?
- 11 A I would say if it was not done within one year, it's
- 12 an undoable situation.
- 13 Q Referring to what has been marked as Exhibits Four and
- 14 Five, would you identify those exhibits?
- 15 A Number Four is a cementing affidavit by the Ron Jackson
- 16 Corporation regarding the surface casing cementing on
- 17 the No. 1 Crosby.
- 18 Q And Exhibit Number Five?
- 19 A Exhibit Five is an affidavit of cementing by the Ron
- 20 Jackson Corporation on the No. 1 Crosby on the 4 and
- 21 1/2 inch string.
- 22 Q On the surface string?
- 23 A Yes.
- 24 Q Did cement circulate to the surface?
- 25 A Yes.

- 1 Q And on the 4 and 1/2 inch string, how many sacks of
2 cement were used?
- 3 A Two hundred fifty.
- 4 Q Do you have any idea where the top of the cement is?
- 5 A I can't find my notes to refer to, but it's approximately
6 2,700 feet.
- 7 Q Would that cover any producing formations that exist
8 in the area?
- 9 A Yes.
- 10 Q And it was cemented through them?
- 11 A It came above the San Andreas.
- 12 Q Was the casing used in the well good quality casing?
- 13 A Yes.
- 14 Q In your opinion, will the leaving of this well as it is
15 for a period of one year cause any damage to any
16 formation which this well penetrates?
- 17 A No, sir.
- 18 Q Is there any possibility of any leakage, oil or gas,
19 to any formation?
- 20 A Not the way the well presently stands, no.
- 21 Q Were Exhibits One through Five extracted from your
22 business records?
- 23 A Yes, sir.
- 24 MR. KELLAHIN: At this time, I would like to offer
25 into evidence Glenn Petroleum Corporation Exhibits One through

1 Five.

2 MR. PORTER: Without objection, Exhibits One through
3 Five will be admitted in evidence.

4 (Whereupon Glenn Petroleum Corporation Exhibits
5 One through Five were admitted in evidence.)

6 MR. KELLAHIN: That's all I have, Mr. Porter.

7 MR. PORTER: Does anyone have any questions?

8 MR. RAMEY: Yes.

9 * * * *

10 CROSS EXAMINATION

11 BY MR. RAMEY:

12 Q Mr. Hart, you no longer anticipate working on this well
13 yourself?

14 A I do not anticipate working on it myself, I am trying
15 to sell it. I find it too difficult to operate right
16 now in New Mexico from Dallas.

17 Q You evidently think this well would be a produceable
18 well?

19 A Yes, sir.

20 Q What was the effect of the bad cement job on the producing
21 formation?

22 A On the producing formation?

23 Q Yes. Are you in communication with water?

24 A We don't feel like it is true communication. We feel
25 as if it's a non-bonding situation in which there is

1 just enough water there to flood out the oil.

2 Q You don't feel that the water would be going into the
3 oil zone?

4 A Let me say that this is the position of the operators:
5 instead of selectively perforating each one of these
6 zones that we have indicated here which are from the
7 oil-bearing zones, some of the zones being water-bearing,
8 most of the operators perforate the whole thing and
9 produce it altogether.

10 Q But they do produce it, they don't allow it to stand?

11 A I am sure the wells are shut down sometimes.

12 MR. RAMEY: That's all I have.

13 MR. PORTER: Mr. Ramey, did you leave any room for
14 argument? The witness says he would like to argue with you
15 about the plugging program.

16 MR. RAMEY: I think, Mr. Porter, I could go along
17 with a ten sack plug in at the top of the hole in view of
18 the evidence that there was no water encountered in the sand.

19 MR. PORTER: Does anyone have anything further
20 in this case?

21 (No response)

22 MR. PORTER: There being nothing further to be
23 offered in this case, the Commission will take it under
24 advisement.

BEFORE THE OIL CONSERVATION COMMISSION
OF THE STATE OF NEW MEXICO

CASE NO. 4995
Order No. R-4571

IN THE MATTER OF THE HEARING CALLED BY
THE OIL CONSERVATION COMMISSION ON ITS
OWN MOTION TO PERMIT GLENN PETROLEUM
CORPORATION AND UNITED STATES FIRE IN-
SURANCE COMPANY AND ALL OTHER INTERESTED
PARTIES TO APPEAR AND SHOW CAUSE WHY THE
SANDERS WELL NO. 1 LOCATED IN UNIT N OF
SECTION 25, TOWNSHIP 7 SOUTH, RANGE 30
EAST, CHAVES COUNTY, NEW MEXICO, SHOULD
NOT BE PLUGGED AND ABANDONED IN ACCORDANCE
WITH A COMMISSION-APPROVED PLUGGING PROGRAM.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 a.m. on June 20, 1973,
at Santa Fe, New Mexico, before the Oil Conservation Commission
of New Mexico, hereinafter referred to as the "Commission."

NOW, on this 28th day of June, 1973, the Commission, a
quorum being present, having considered the testimony presented
and the exhibits received at said hearing, and being fully advised
in the premises,

FINDS:

(1) That due public notice having been given as required
by Law, the Commission has jurisdiction of this cause and the
subject matter thereof.

(2) That Glenn Petroleum Corporation is the owner and oper-
ator of the Sanders Well No. 1 located in Unit N of Section 25,
Township 7 South, Range 30 East, NMPM, Chaves County, New Mexico.

(3) That in order to prevent waste and protect correlative
rights said Sanders Well No. 1 should be plugged and abandoned
in accordance with a program approved by the Hobbs District
Office of the New Mexico Oil Conservation Commission on or before
August 1, 1973.

-2-

Case No. 4995
Order No. R-4571

IT IS THEREFORE ORDERED:

(1) That Glenn Petroleum Corporation and United States Fire Insurance Company are hereby ordered to plug and abandon the Sanders Well No. 1, located in Unit N of Section 25, Township 7 South, Range 30 East, NMPM, Chaves County, New Mexico, on or before August 1, 1973.

(2) That Glenn Petroleum Corporation and United States Fire Insurance Company, prior to plugging and abandoning the above-described well, shall obtain from the Hobbs Office of the Commission, a Commission-approved program for said plugging and abandoning, and shall notify said Hobbs Office of the date and hour said work is to be commenced whereupon the Commission may, at its option, witness such work.

(3) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

Docket No. 16-73

DOCKET: REGULAR HEARING - WEDNESDAY - JUNE 20, 1973

OIL CONSERVATION COMMISSION - 9 A.M. - MORGAN HALL, STATE LAND OFFICE
BUILDING, SANTA FE, NEW MEXICO

CASE 4990: In the matter of the hearing called by the Oil Conservation Commission of New Mexico upon its own motion to consider the application of Thriftway Company, operator of a petroleum refinery in Bloomfield, New Mexico, for certification to the Commissioner of Public Lands as a small business enterprise within the state not having an adequate supply of charge stocks and eligible to be granted a preference, pursuant to Chapter 34, New Mexico Laws of 1967, for the purchase of state royalty oil. The Commission will consider the application and such pertinent evidence as may be submitted concerning the capacity of the refinery, the source and grade of all refinery charge stocks currently available to the applicant, the minimum amount and grade of additional refinery charge stocks needed to meet existing refinery commitments or existing refinery capacity, and the efforts made by applicant to purchase refinery charge stocks on the open market.

CASE 4991: Application of El Paso Natural Gas Company for the amendment of the prorated gas pool rules promulgated by Order No. R-1670, as amended.

Applicant, in the above-styled cause, seeks the amendment of the General Rules and Regulations for the Prorated Gas Pools of Northwest New Mexico and Southeast New Mexico, as promulgated by Commission Order No. R-1670, as amended. Applicant proposes:

1. That Rule 9 (B) of the Northwest New Mexico Gas Proration Rules and 10 (A) of the Southeast New Mexico Gas Proration Rules each be amended to provide that the monthly allowable assigned to a marginal well would be equal to its latest available monthly production.

2. That Rule 13 of the Northwest New Mexico and Southeast New Mexico Gas Proration Rules be amended to provide that the proration period would be the 12-month period from 7:00 a.m. April 1 of each year to 7:00 a.m. April 1 of the following year. (The current proration period, due to terminate at 7:00 a.m. January 1, 1974, would be extended to 7:00 a.m. April 1, 1974).

3. That Rule 16 (A) of the Northwest New Mexico and Southeast New Mexico Gas Proration Rules be amended to provide that each proration period consist of four classification periods for the purpose of classifying wells marginal, each such classification period being of three months duration; and to provide that after production data is available for the last month of each such classification period, any well which had an underproduced status at the beginning of the gas proration period would be classified marginal

(Case 4991 continued from Page 1)

if its highest single month's production during the classification period is less than its average monthly allowable for the classification period, unless within 15 days after receipt of notice of classification of a well as marginal, the operator of the well or other interested person presents satisfactory evidence to the Commission showing that the well is not of marginal character and should not be so classified.

Applicant, in addition to the above-requested specific rule changes, further requests such additional word changes in other orders and/or Rules of the Commission (including but not limited to Order No. R-333-F-1) as may be necessary to effectuate the substantive rule changes proposed herein.

CASE 4992: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Corinne Grace and the Travelers Indemnity Company and all other interested parties to appear and show cause why the Ranger Lake Wells Nos. 1 and 3 located in Unit N of Section 11, Township 12 South, Range 34 East, Lea County, New Mexico should not be plugged and abandoned in accordance with a Commission-approved plugging program.

CASE 4993: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Corinne Grace and the Travelers Indemnity Company and all other interested parties to appear and show cause why the T. P. State Well No. 1 located in Unit A of Section 17, Township 10 South, Range 33 East, Lea County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

CASE 4994: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Glenn Petroleum Corporation and United States Fire Insurance Company and all other interested parties to appear and show cause why the Crosby Well No. 1 located in Unit O of Section 26, Township 7 South, Range 30 East, Chaves County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

CASE 4995: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Glenn Petroleum Corporation and United States Fire Insurance Company and all other interested parties to appear and show cause why the Sanders Well No. 1 located in Unit N of Section 25, Township 7 South, Range 30 East, Chaves County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

- CASE 4996: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit C. H. Brockett Inc. and the Indemnity Company and all other interested parties to appear and show cause why the Lazy J State "A" Well No. 1 located in Unit A of Section 3, Township 14 South, Range 33 East, Lea County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 4997: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Jal Fishing Tool Company and United States Fidelity & Guarantee Company and all other interested parties to appear and show cause why the H. Whitten Well No. 1 located in Unit C of Section 4, Township 24 South, Range 36 East, Lea County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 4998: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit E. P. Campbell and Aetna Casualty and Surety Company and all other interested parties to appear and show cause why the E. P. Campbell Christmas Well No. 1 located in Unit C of Section 6, Township 23 South, Range 36 East, Lea County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 4999: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Standard Production Company and Aetna Life & Casualty and all other interested parties to appear and show cause why the Brown Lease Wells Nos. 1, 2, 3, 4, 5, and 5-A, located in Units F, D, C, F, E, and E, respectively, of Section 25, Township 25 South, Range 36 East, Lea County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program, and why the location of Well No. 6 in Unit L and No. 7 in Unit M of said Section 25 should not be cleaned and levelled.
- CASE 5000: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Aztec Oil and Gas Company and United States Fidelity and Guaranty Company and all other interested parties to appear and show cause why the Aztec Total Unit Wells Nos. 17 and 18, located in Unit E of Section 20, and Unit H of Section 19, respectively, Township 29 North, Range 13 West, San Juan County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 5001: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Tamanaco Oil Corporation and Continental Casualty Company and all other interested parties to appear and show cause why the El Poso Ranch "N" Well No. 11 located in Unit N of Section 11, Township 28 North, Range 1 East, Rio Arriba County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

- CASE 5002: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Tamanaco Oil Corporation and Continental Casualty Company and all other interested parties to appear and show cause why the Pound Ranch "B" Well No. 27 located in Unit B of Section 27, Township 28 North, Range 1 East, Rio Arriba County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 5003: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Dan M. Lockie and Hartford Fire Insurance Company Group and all other interested parties to appear and show cause why the Dan M. Lockie, Gersbach Com #1 located in Unit J of Section 3, Township 29 North, Range 16 West, San Juan County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 5004: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Pettus and Associates and United States Fidelity and Guaranty Company and all other interested parties to appear and show cause why the Pettus and Associates, Hunt Well No. 1 located in Unit K of Section 3, Township 29 North, Range 16 West, San Juan County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 5005: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Pettus and Associates and United States Fidelity and Guaranty Company and all other interested parties to appear and show cause why the Pettus and Associates, Don Stock Well No. 1 located in Unit E of Section 3, Township 29 North, Range 16 West, San Juan County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.
- CASE 5006: In the matter of the hearing called by the Oil Conservation Commission on its own motion to permit Aztec Oil and Gas Company and United States Fidelity and Guaranty Company and all other interested parties to appear and show cause why the Southeast Cha Cha Unit Well No. 1 located in Unit M of Section 32, Township 29 North, Range 13 West, San Juan County, New Mexico, should not be plugged and abandoned in accordance with a Commission-approved plugging program.

CASE 4989: (Continued from the June 6, 1973, Examiner Hearing)

In the matter of the hearing called by the Oil Conservation Commission upon its own motion to consider the amendment of the general rules governing prorated gas pools in Northwest and Southeast New Mexico as promulgated by Order No. R-1670, as amended. Rule 15 of the aforesaid general rules would be amended to provide that if a well is overproduced in an amount exceeding six times its average monthly allowable for the preceding twelve months (or, in the case of a newly connected well or a well in a newly prorated pool, six times its average monthly allowable for the months available), it shall be shut in during that month and each succeeding month until it is overproduced in an amount less than six times its average monthly allowable, as determined above.

Rule 15 would be further amended to permit the Secretary-Director of the Commission to grant a pool-wide moratorium of up to three months on the shutting in of gas wells during periods of high demand emergency if a significant number of the wells in the pool are subject to being shut in.

Case 4995 - Glenn Petroleum Company

TESTIMONY FOR SHOW CAUSE HEARINGS

Make appearance for Oil Conservation Commission

one witness: Joe Tamey

1. Name, position, place of residence.
2. Does district I include Elaves County?
3. Does it include the part of Elaves County involved in this case?
4. Would you briefly describe your duties as district supervisor as they relate to this case?
(recommendations to the Commission as to when wells should be plugged and abandoned)
5. Are you familiar with subject matter of Case No. 4995?
6. What is the purpose of this case?
(be sure wells are identified)
7. Are you familiar with these wells?
8. Have you reviewed all reports filed with the Commission concerning this/~~these~~ wells and visited the well site(s)?
9. Do you have these records with you?
10. Please refer to these records and give us the history of the/each well as reflected by the official records:
 - A. application to drill and date
 - B. operator
 - C. location and dedicated acreage (C-102)
 - D. well depth
 - E. formation completed in
 - F. information from other forms
11. The date of the last official form.
12. Other communication
(any which is relative to this case that should be called to the examiner's attention)
13. How recently have you visited these wells?
14. Would you tell us what you found at the site:
 - A. abandoned
 - B. a dry hole
 - C. any sign of present production
15. Would there be any danger in leaving this well in its present condition?
16. Could it be a safety problem?
17. Do you have any opinion as to whether or not the well should be plugged?

18. Do you have a recommended plugging program to submit to the Commission at this time?

(if there is a recommended plugging program:

1. What should be pulled from the well?

2. Where should plugs be set and why?

3. How many sacks of cement needed?)

19. Do you have true and correct copies of all Commission forms for inclusion in the record of this case?

20. Offer forms as exhibits.

OIL CONSERVATION COMMISSION

HOBBS, NEW MEXICO 88240

March 21, 1972

Glenn Petroleum Corp.
2906 Maple Ave.
Dallas, Texas 75201

Attention: Mr. Michael L. Hart

Gentlemen:

We are in receipt of Form C-103 covering work done on your Saunders Well No. 1 located in Unit N of Section 25, T-7-S, R-30-E, Chaves County, New Mexico. This C-103 indicated that you drilled to 280 feet and had set 8 5/8" surface casing at 278 feet and cemented with 100 sacks of cement. You also stated that the well was temporarily abandoned on December 9, 1971.

First, this office requires that all surface pipe be cemented to the surface of the ground. Your Notice of Intention to Drill indicated that you would use 300 sacks of cement, and yet on your actual work you used only 100 sacks, and it is doubtful if this volume would be enough to circulate cement. Also, drilling wells are allowed to be temporarily abandoned for a period of only 60 days, and this well has been in a temporarily abandoned state for in excess of 100 days.

Please advise this office immediately as to where the top of the cement is behind the 8 5/8" surface casing on this well, and also let me know immediately what your future plans are for the well, particularly as to whether or not you intend to drill this well any deeper in the immediate future.

Yours very truly,

OIL CONSERVATION COMMISSION

Gentlemen:

As you know, there has been considerable correspondence between this office and you concerning future plans for your Sanders No. 1 located in Unit N of Section 25, T-7-S, R-30-E, and your Crosby No. 1 located in Unit O of Section 26, T-7-S, R-30-E. To date you have indicated no intent for producing these wells, and I have no choice but to recommend that a hearing be held to enable you to show cause why the wells should not be plugged and abandoned.

In line with this, the matter has been turned over to the Commission's attorney and a hearing will be docketed in the near future with this in mind.

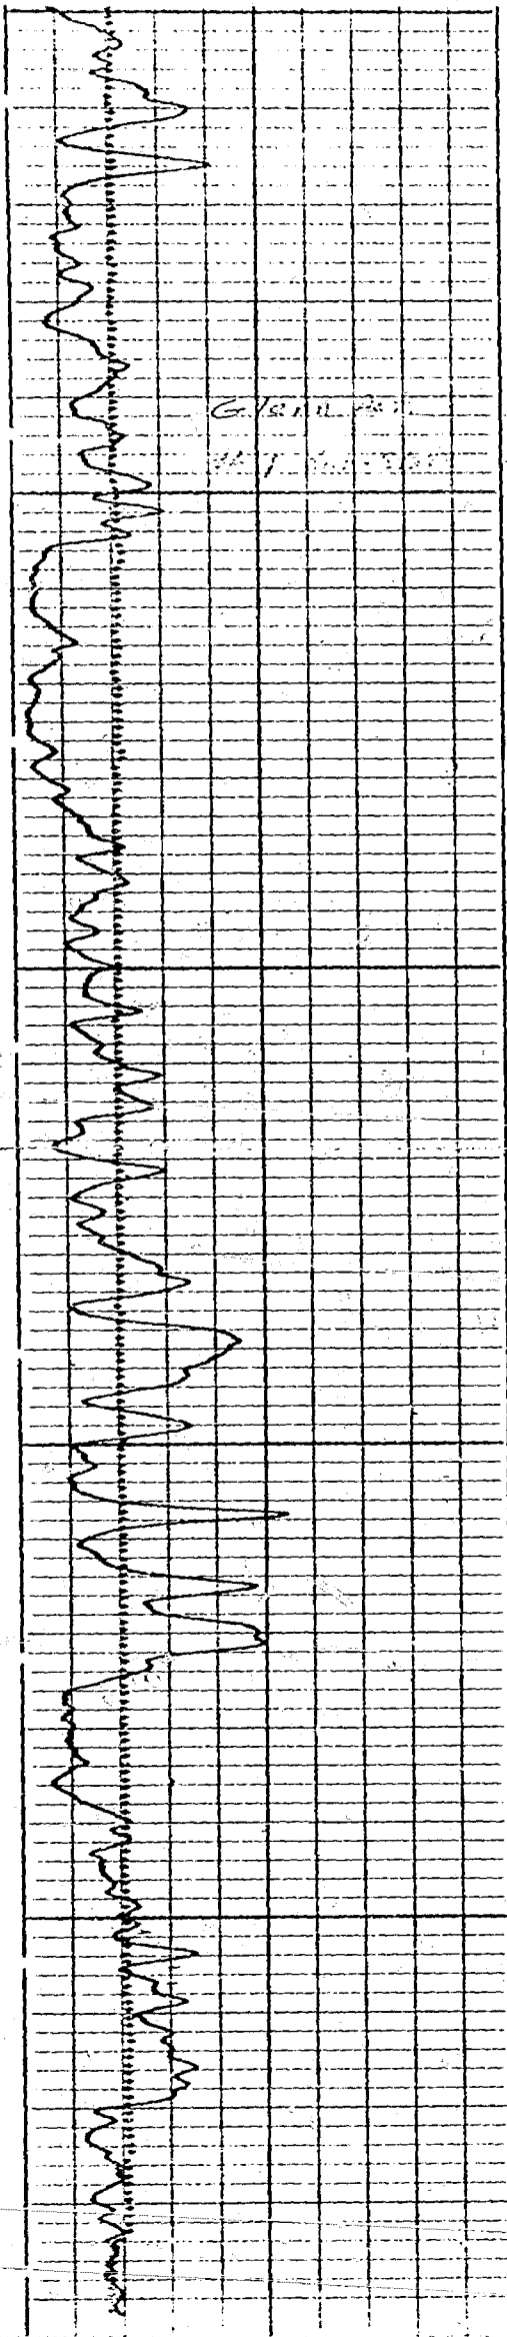

Yours very truly,

OIL CONSERVATION COMMISSION

CASE NO. ~~4995~~
Order No. R-45-71

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 a.m. on June 20, 1973, at Santa Fe, New Mexico, before the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission."

NOW, on this _____ day of June, 1973, the Commission, a quorum being present, having considered the testimony presented and the exhibits received at said hearing, and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by Law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That Glenn Petroleum Corporation is the owner and operator of the Sanders Well No. 1 located in Unit N of Section 25, Township 7 South, Range 30 East, NMPM, Chaves County, New Mexico.

(3) That in order to prevent waste and protect correlative rights said Sanders Well No. 1

should be plugged and abandoned in accordance with a program

approved by the Hobbs District Office of the New Mexico Oil Conservation Commission on or before July 1, 1973.

IT IS THEREFORE ORDERED:

(1) That Glenn Petroleum Corporation and United States Fire Insurance Company are hereby ordered to plug and abandon the Sanders Well No. 1

located in Unit N of Section 25, Township 7 South

Range 30 East, NMPM, Chaves County, New Mexico, on or

before August 1, 1973.

Case No. 4995

Order No. R-

(2) That Glenn Petroleum Corporation and United States Fire Insurance Company, prior to plugging and abandoning the above-described well, shall obtain from the ^{Hobbs}~~Artesia~~ Office of the Commission, a Commission-approved program for said plugging and abandoning, and shall notify said ^{Hobbs}~~Artesia~~ Office of the date and hour said work is to be commenced whereupon the Commission may, at its option, witness such work.

(3) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
