OIL CONSERVATION COMMISSION

P. O. BOX 871

SANTA FE, NEW MEXICO

April 13, 1959

Mr. Jack Campbell  
Campbell & Russell  
P.O. Box 721  
Roswell, New Mexico

Dear Jack:

Reference is made to Order No. R-1364 in which your client, Texas Pacific Coal & Oil Company, was granted four non-standard gas proration units in the Jalmat Gas Pool. Since sending you two copies of this order some time last week, I have discovered that Paragraph (7) of the order portion contains an error. Line two of Paragraph (7) should say Section 21 rather than Section 20. This error has been corrected on the original copy from which the orders are printed.

Would you please correct your two copies to so read.

Very truly yours,

Oliver E. Payne  
General Counsel

Case 1611

TEXAS PACIFIC COAL AND OIL COMPANY

IRDLAND, TEXAS

FEBRUARY 5, 1959

New Mexico Oil Conservation Commission  
Box 871  
Santa Fe, New Mexico

Attention: Mr. A. L. Forter, Jr.

Re: Texas Pacific Coal and Oil Company's application for a hearing to grant a 320-acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Well No. 2 in Section 21, Township 23 South, Range 36 East, Jalmat Pool, Lea County, New Mexico.

Gentlemen:

Texas Pacific Coal and Oil Company respectfully requests a hearing under the provisions of Rule 5(b) of the Special Rules and Regulations for the Jalmat Gas Pool of Order No. R-520 for the formation of a 320 acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Well No. 2, located 2310' from the South line and 330' from the West line - the NW/4 SW/4 - of Section 21, Township 23 South, Range 36 East, Lea County, New Mexico.

The proposed unit is to consist of the SW/4 of Section 21 and the SE/4 of Section 20, both in Township 23 South, Range 36 East. Since this proposed unit will cross section lines, it is contrary to Rule 5(b)-2 which states that the unit should lie wholly within a single governmental section. However, in support of this request we would like to point out that the proposed non-standard gas proration conforms with the other requirements of said Rule 5(b) as follows:

1. Said unit consists of contiguous quarter-quarter sections.
2. The entire proposed unit may be reasonably presumed to be productive of gas.
3. The length or width of said unit does not exceed 5280 feet.
4. Copies of this application have been furnished this date by registered mail to all offset operators and all operators within 1500 feet of said well.

Texas Pacific further respectfully requests that contingent upon the approval of this application, the following non-standard gas proration unit remain in effect:

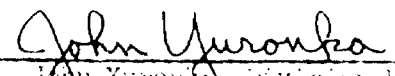

A 160 acre non-standard gas proration unit dedicated to the State of New Mexico "A" a/c-1 Well No. 2 consisting of the SE/4 of Section 21, Township 23 South, Range 36 East.

A plat is attached hereto showing to the best of our knowledge and belief the proposed unit, the location of the well and the offset ownership.

In view of the facts set out herein, it is respectfully requested that the Commission grant a hearing to hear evidence in order that it might approve the non-standard gas proration unit for Texas Pacific Coal and Oil Company's State of New Mexico "A" a/c-1 Well No. 3 as described above.

Yours very truly,

TEXAS PACIFIC COAL AND OIL COMPANY

  
John Yuranka, Division Engineer

TEXAS PACIFIC COAL AND OIL COMPANY

MIDLAND, TEXAS

FEBRUARY 5, 1959

New Mexico Oil Conservation Commission  
Box 871  
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Re: Texas Pacific Coal and Oil Company's application for an 80 acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Wells No. 4 and No. 6 in Section 21, Township 23 South, Range 36 East, Jalmat Pool, Lea County, New Mexico.

Gentlemen:

Texas Pacific Coal and Oil Company respectfully requests administrative approval under the provisions of Rule 5(b) of the Special Rules and Regulations for the Jalmat Gas Pool of Order No. R-520 for the formation of an 80 acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Well No. 4, located 330' from the North line and 1980' from the West line - the NE/4 NW/4 - of Section 21, Township 23 South, Range 36 East and its State of New Mexico "A" a/c-1 Well No. 6 - the SE/4 NW/4 - of Section 21, Township 23 South, Range 36 East, Lea County, New Mexico.

The proposed unit is to consist of the E/2 NW/4 of Section 21, Township 23 South, Range 36 East. Texas Pacific further respectfully requests that contingent upon the approval of this application and the one submitted for its State of New Mexico "A" a/c-1 Well No. 3, the following non-standard gas proration units remain in effect:

1. A 120 acre non-standard gas proration unit dedicated to the State of New Mexico "A" a/c-1 Well No. 4 consisting of the N/2 NW/4 of Section 21 and the NE/4 NE/4 of Section 20, Township 23 South, Range 36 East and
2. A 120 acre non-standard gas proration unit dedicated to the State of New Mexico "A" a/c-1 Wells No. 3 and No. 6 consisting of the S/2 NW/4 of Section 21 and the SE/4 NE/4 of Section 20, Township 23 South, Range 36 East.

In support of this request we would like to point out that the proposed non-standard gas proration unit conforms with the requirements of said Rule 5(b) in all respects as follows:

1. Said unit consists of contiguous quarter-quarter sections.
2. Said unit lies wholly within a single governmental section.
3. The entire proposed unit may be reasonably presumed to be productive of gas.
4. The length or width of said unit does not exceed 5280 feet.
5. Copies of this application have been furnished this date by registered mail to all offset operators and all operators within 1500 feet of said wells.

A plat is attached hereto showing to the best of our knowledge and belief the proposed unit, the location of the well and the offset ownership.

In view of the facts set out herein, it is respectfully requested that the Commission enter an order approving the non-standard gas proration unit for Texas Pacific Coal and Oil Company's State of New Mexico "A" a/c-1 Wells No. 4 and No. 6 as described above.

Yours very truly,

TEXAS PACIFIC COAL AND OIL COMPANY

Dear Sam:

This letter is in reference to Case No. 1611 in which Continental Oil Company asks for three non-standard gas proration units in the Jalnat Gas Pool.

After studying the exhibits presented by Continental and doing some additional geological work, I find that all three non-standard gas units are productive of gas, and that their respective wells are capable of draining the proration units requested.

DOCKET: EXAMINER HEARING MARCH 11, 1959

Oil Conservation Commission 9 a. m., Mabry Hall, State Capitol, Santa Fe, N. M.

The following cases will be heard before Daniel S. Nutter, Examiner

CASE 1610: Application of Wood River Oil & Refining Company, Inc., for an order authorizing a pilot water flood project, for capacity allowables for wells in said project, and for approval of five unorthodox locations. Applicant, in the above-styled cause, seeks an order authorizing it to institute a pilot water flood project in the Rhodes Pool in Lea County, New Mexico. Applicant proposes to inject water into the Lower Yates formation through six wells located in Section 35, Township 26 South, Range 37 East. Applicant also seeks approval of unorthodox locations for five of its proposed injection wells. Applicant further seeks capacity allowables for wells within the project.

CASE 1611: Application of Texas Pacific Coal & Oil Company for three non-standard gas proration units. Applicant, in the above-styled cause, seeks an order establishing the following non-standard gas proration units in the Jalmat Gas Pool, Lea County, New Mexico.

- (1) A 320-acre non-standard gas proration unit consisting of the SW/4 of Section 21 and the SE/4 of Section 20, both in Township 23 South, Range 36 East, to be dedicated to applicant's State "A" a/c-1 Well No.2 located in the NW/4 SW/4 of said Section 21;
- (2) A 240-acre non-standard gas proration unit consisting of the W/2 NW/4 of said Section 21 and the NE/4 of said Section 20 to be dedicated to applicant's State "A" a/c-1 Well No. 3 located in the SW/4 NW/4 of said Section 21;
- (3) An 80-acre non-standard gas proration unit consisting of the E/2 NW/4 of said Section 21 to be dedicated to applicant's State "A" a/c-1 Wells 4 and 6 located respectively in the NE/4 NW/4 and the SE/4 NW/4 of said Section 21.

CASE 1612: Application of Santiago Oil & Gas Company for an oil-gas dual completion. Applicant, in the above-styled cause, seeks an order authorizing the dual completion of its State No. 1-30 Well located 660 feet from the North line and 1980 feet from the East line of Section 30, Township 12 South, Range 34 East, Lea County, New Mexico, in such a manner as to permit the production of oil from an undesignated Upper-Pennsylvanian oil pool and the production of gas from an undesignated Devonian gas pool through parallel string of 2" tubing.

CASE 1613: Application of British American Oil Producing Company for an unorthodox gas well location. Applicant, in the above-styled cause, seeks an order authorizing an unorthodox gas well location in an undesignated Dakota gas pool for its Fullerton Well No. 5, located 660 feet from the North line and 1980 feet from the East line of Section 15, Township 27 North, Range 11 West, San Juan County, New Mexico.

Docket No. 8-59

CASE 1614: Application of Texas Consolidated Oils, Inc., for an order authorizing a pilot water flood project in the Square Lake Pool in Eddy County, New Mexico, and for capacity allowables for said project. Applicant, in the above-styled cause, seeks an order authorizing it to institute a pilot water flood project in the Square Lake Pool in Eddy County, New Mexico. Applicant proposes to inject water into the Grayburg and San Andres formations through four wells located in Section 34, Township 16 South, Range 30 East. Applicant further seeks capacity allowables for nine wells in said Section 34.

CASE 1294: Application of Ambassador Oil Corporation for capacity allowables for three wells in a water flood project. Applicant, in the above-styled cause, seeks an order authorizing capacity allowables for the following described wells situated in the project area of its North Caprock Queen water flood project No. 2 in the Caprock-Queen Pool in Lea and Chaves Counties, New Mexico.

Well No. 18-2, NE/4 SE/4, Section 12, Township 13 South, Range 31 East;

Well No. 19-1, SW/4 NW/4, Section 7, Township 13 South, Range 32 East;

Well No. 22-1, SW/4 SE/4, Section 12, Township 13 South, Range 31 East.

(Case 1611)

TEXAS PACIFIC COAL AND OIL COMPANY

MIDLAND, TEXAS

FEBRUARY 5, 1959

New Mexico Oil Conservation Commission  
P. O. Box 871  
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Re: Texas Pacific Coal and Oil Company's application for a hearing to grant a 240-acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Well No. 3 in Section 21, Township 23 South, Range 36 East, Jalmat Pool, Lea County, New Mexico.

Gentlemen:

Texas Pacific Coal and Oil Company respectfully requests a hearing under the provisions of Rule 5(b) of the Special Rules and Regulations for the Jalmat Gas Pool of Order No. R-520 for the formation of a 240 acre non-standard gas proration unit for its State of New Mexico "A" a/c-1 Well No. 3, located 1650' from the North line and 330' from the West line - the SW/4 NW/4 - of Section 21, Township 23 South, Range 36 East, Lea County, New Mexico.

The proposed unit is to consist of the W/2 NW/4 of Section 21 and the NE/4 of Section 20, both in Township 23 South, Range 36 East. Since this proposed unit will cross section lines, it is contrary to Rule 5(b)-2 which states that the unit should lie wholly within a single governmental section. However, in support of this request we would like to point out that the proposed non-standard gas proration unit conforms with the other requirements of said Rule 5(b) as follows:

1. Said unit consists of contiguous quarter-quarter sections.
2. The entire proposed unit may be reasonably presumed to be productive of gas.
3. The length or width of said unit does not exceed 5280 feet.
4. Copies of this application have been furnished this date by registered mail to all offset operators and all operators within 1500 feet of said well.

Texas Pacific further respectfully requests that contingent upon the approval of this application and the one submitted for its State of New Mexico "A" a/c-1 Wells No. 4 and No. 6, the following non-standard gas proration units remain in effect:

1. A 120 acre non-standard gas proration unit dedicated to the State of New Mexico "A" a/c-1 Well No. 4 consisting of the 1/2 NW/4 of Section 21 and the NE/4, SE/4 of Section 20, Township 23 South, Range 36 East and
2. A 120 acre non-standard gas proration unit dedicated to the State of New Mexico "A" a/c-1 Wells No. 5 and No. 6 consisting of the S/2 NW/4 of Section 21 and the SE/4, NE/4 of Section 20, Township 23 South, Range 36 East.

A plat is attached hereto showing to the best of our knowledge and belief the proposed unit, the location of the well and the offset ownership.

In view of the facts set out herein, it is respectfully requested that the Commission grant a hearing to hear evidence in order that it might approve the non-standard gas proration unit for Texas Pacific Coal and Oil Company's State of New Mexico "A" a/c-1 Well No. 3 as described above.

Yours very truly,

TEXAS PACIFIC COAL AND OIL COMPANY

Date 3/30/59

CASE NO. 1611

HEARING DATE 3/11/59 DSN @ SF @ 9

My recommendations for an order in the above numbered case(s) are as follows:

Enter an order cancelling the NSP's which currently cover certain acreage involved in Case 1611 and approving the non-std units requested by T-P with one exception:

Rather than approve the 2 well 80-acre units requested, authorize 2 well 40-acre non std units. This will simplify bookkeeping and allocation and T-P's witness saw no objection to such an arrangement.

The Commission's geological staff has looked into the requested units and concurs w/ T-P's theory that all of the acreage involved is productive of gas.

Attention: Mr. Daniel Nutter

Dear Sir:

To verify our telephone conversation of this date, the locations of the Texas Pacific Coal and Oil Company wells shown below are correct to the best of my knowledge. All of the wells are located in Section 21, T-23-S, R-36-E, Jalmat Gas Pool, Lea County, New Mexico.

New Mexico State "A" Account 1 Well No. 2  
2260' from south line and 330' from west line of the section.

New Mexico State "A" Account 1 Well No. 3  
1650' from north line and 330' from west line of the section.

New Mexico State "A" Account 1 Well No. 4  
330' from north line and 1660' from west line of the section.

New Mexico State "A" Account 1 Well No. 6  
2310' from north line and 1650' from west line of the section.

Yours very truly,

*John Yuronka*

**BEFORE THE OIL CONSERVATION COMMISSION  
OF THE STATE OF NEW MEXICO**

**IN THE MATTER OF THE HEARING  
CALLED BY THE OIL CONSERVATION  
COMMISSION OF NEW MEXICO FOR  
THE PURPOSE OF CONSIDERING:**

**CASE NO. 1611  
Order No. E-1364**

**APPLICATION OF TEXAS PACIFIC COAL & OIL  
COMPANY FOR THREE NON-STANDARD GAS PRODUCTION  
UNITS IN THE JALMAT GAS POOL, LEA COUNTY,  
NEW MEXICO.**

**ORDER OF THE COMMISSION**

**BY THE COMMISSION:**

This cause came on for hearing at 9 o'clock a.m. on March 11, 1959, at Santa Fe, New Mexico, before Daniel S. Nutter, Examiner duly appointed by the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission," in accordance with Rule 1214 of the Commission Rules and Regulations.

NOW, on this 7<sup>th</sup> day of April, 1959, the Commission, a quorum being present, having considered the application, the evidence adduced and the recommendations of the Examiner, Daniel S. Nutter, and being fully advised in the premises,

**FINDS:**

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant, Texas Pacific Coal & Oil Company, is the owner and operator of the E/2 of Section 20 and the W/2 of Section 21, both in Township 23 South, Range 36 East, N4PM, Lea County, New Mexico.

(3) That the applicant is the owner and operator of the following-described wells in the Jalmat Gas Pool:

State "A" a/c-1 Well No. 2, located 2260 feet from the South line and 330 feet from the West line of said Section 21.

State "B" a/c-1 Well No. 3, located 1650 feet from the North line and 330 feet from the West line of said Section 21.

State "A" a/c-1 Well No. 4, located 330 feet from the North line and 1860 feet from the West line of said Section 21.

State "A" a/c-1 Well No. 6, located 2310 feet from the North line and 1650 feet from the West line of said Section 21.

(4) That the applicant proposes the establishment of three non-standard gas proration units in the Jalmat Gas Pool, to-wit:

A 320-acre non-standard gas proration unit consisting of the SW/4 of said Section 21 and the SE/4 of said Section 20 to be dedicated to said State "A" a/c-1 Well No. 2.

A 240-acre non-standard gas proration unit consisting of the NE/4 of said Section 20 and the W/2 NW/4 of said Section 21 to be dedicated to said State "A" a/c-1 Well No. 3.

An 80-acre non-standard gas proration unit consisting of the E/2 NW/4 of said Section 21 to be dedicated to said State "A" a/c-1 Wells No. 4 and 6.

(5) That all of the above-described acreage can reasonably be presumed to be productive of gas from the Jalmat Gas Pool.

(6) That said 80-acre non-standard gas proration unit consisting of the E/2 NW/4 of said Section 21 with said State "A" a/c-1 Wells No. 4 and 6 as the unit wells should be denied; rather, two 40-acre non-standard gas proration units should be formed, one consisting of the NE/4 NW/4 of said Section 21 with said State "A" a/c-1 Well No. 4 as the unit well, the other consisting of the SE/4 NW/4 of said Section 21 with the said State "A" a/c-1 Well No. 6 as the unit well.

(7) That establishment of the four above-described non-standard gas proration units in the Jalmat Gas Pool will not cause waste nor impair correlative rights.

IT IS THEREFORE ORDERED:

(1) That a 320-acre non-standard gas proration unit in the Jalmat Gas Pool, consisting of the SW/4 of Section 21 and the SE/4 of Section 20, both in Township 23 South, Range 36 East, NMPM, Lea County, New Mexico, be and the same is hereby established. Said unit is to be dedicated to applicant's State "A" a/c-1 Well No. 2, located 2260 feet from the South line and 330 feet from the West line of said Section 21.

-3-

Case No. 1611  
Order No. R-1364

(2) That the said State "A" a/c-1 Well No. 2 be granted an acreage factor for allowable purposes in the proportion that the above-described acreage bears to a standard gas proration unit in the Jalmat Gas Pool.

(3) That a 240-acre non-standard gas proration unit in the Jalmat Gas Pool, consisting of the NE/4 of said Section 20 and the W/2 NW/4 of said Section 21 be and the same is hereby established. Said unit is to be dedicated to applicant's State "A" a/c-1 Well No. 3, located 1650 feet from the North line and 330 feet from the West line of said Section 21.

(4) That the said State "A" a/c-1 Well No. 3 be granted an acreage factor for allowable purposes in the proportion that the above-described acreage bears to a standard gas proration unit in the Jalmat Gas Pool.

(5) That a 40-acre non-standard gas proration unit in the Jalmat Gas Pool, consisting of the NE/4 NW/4 of said Section 21, be and the same is hereby established. Said unit is to be dedicated to applicant's State "A" a/c-1 Well No. 4, located 330 feet from the North line and 1660 feet from the West line of said Section 21.

(6) That the said State "A" a/c-1 Well No. 4 be granted an acreage factor for allowable purposes in the proportion that the above-described acreage bears to a standard gas proration unit in the Jalmat Gas Pool.

(7) That a 40-acre non-standard gas proration unit in the Jalmat Gas Pool, consisting of the SE/4 NW/4 of said Section 21, be and the same is hereby established. Said unit is to be dedicated to applicant's State "A" a/c-1 Well No. 6, located 2310 feet from the North line and 1650 feet from the West line of said Section 21.

(8) That the said State "A" a/c-1 Well No. 6 be granted an acreage factor for allowable purposes in the proportion that the above-described acreage bears to a standard gas proration unit in the Jalmat Gas Pool.

(9) That the non-standard gas proration units in the Jalmat Gas Pool established by Orders R-535 and R-536 be and the same are hereby rescinded.

MR. WATKINS: The next case on the agenda is Case No. 1411.

MR. LAYNE: Case 1411. Application of Texas Pacific Coal & Oil Company for three non-standard gas proration units.

MR. CAMPBELL: Mr. Examiner, I am Jack E. Campbell of Campbell and Russell, Roswell, New Mexico, appearing on behalf of the Applicant. We have one witness.

(Witness sworn.)

JOHN YURONKA

called as a witness, having been first duly sworn, testified as follows:

DIRECT EXAMINATION

BY: MR. CAMPBELL:

Q State your name, please.

A John Yuronka.

Q Where do you live?

A Midland, Texas.

Q By whom are you employed and in what capacity?

A Texas Pacific Coal and Oil Company as division engineer.

Q You have testified previously before this Commission or its examiners?

A Yes, sir, I have.

MR. LAYNE: Are the witness' qualifications acceptable?

MR. WATKINS: Yes, sir, please proceed.

Q. Now, the gas proration unit is a unit of the Yates Field Gas & Oil Company in the Yates field relating to three outlined non-standard units. The other has been taken from.

A. I will hand you what has been marked as Exhibit 1 and ask you to state what it is.

A. Exhibit 1 is the plat of the area involved showing the non-standard proration units outlined in red. The plat also shows contours on top of the Yates formation. In addition, the cross sections are indicated on the map, and in Exhibit No. 2, it is denoted by the green line, in Exhibit No. 3 by the orange, and in Exhibit No. 4 by the blue line.

Q. Will you, by referring to Exhibit No. 1, advise the Examiner as to the present designations of gas proration units in that area and also the wells to which the acreage is dedicated?

A. At the present time Well No. 2 is located in the NW/4 of the SW/4 of Section 21, and has 160 acres dedicated to it, which consists of the SW/4 of Section 21. Also we have 120-acre non-standard proration units, one unit consists of the N/2 of the NW/4 of Section 21, and the NE/4 of the NE/4 of Section 20, all in Township 23 South, Range 30 East, and the gas well involved is Well No. 1. The other 160-acre non-standard proration unit consists of the SW/4 of the NW/4 of Section 21, and the SW/4 of the NW/4 of Section 20. This acreage is dedicated to Well No. 2.

...and we are seeking a 240-acre non-standard gas proration unit consisting of the NW/4 of Section 14 and the SE/4 of Section 20, both in Township 23 South, Range 10 East, to be dedicated to applicant's State "A" a/c-1 Well No. 1 located in the NW/4 SE/4 of said Section 21. We are also asking for a 240-acre non-standard gas proration unit consisting of the W/2 NW/4 of said Section 21 and the NE/4 of said Section 16 to be dedicated to applicant's State "A" a/c-1 Well No. 2 located in the SE/4 NW/4 of said Section 21, and the third unit is an 80-acre non-standard proration unit consisting of the W/2 NW/4 of said Section 21 to be dedicated to applicant's State "A" a/c-1 Wells 4 and 5 located respectively in the NW/4 NW/4 and the SE/4 NW/4 of said Section 21.

Now, Mr. Yuronka, I refer you to what has been identified as Exhibit No. 2 and ask you to state what that is, please.

Exhibit No. 2 is a cross section beginning with Sinclair's Federal #14 Well No. 3 located in the NW/4 of the SW/4 of Section 14, Township 23 South, Range 10 East, and includes Sinclair's Federal #14 No. 1, T.R.'s State "A" a/c Well No. 1, T.R.'s State Account Well No. 1, and Well No. 2 in the same Section and Well No. 4 also in the same Section.

...and we are seeking a 240-acre non-standard gas proration unit consisting of the NW/4 of Section 14 and the SE/4 of Section 20, both in Township 23 South, Range 10 East, to be dedicated to applicant's State "A" a/c-1 Well No. 1 located in the NW/4 SE/4 of said Section 21. We are also asking for a 240-acre non-standard gas proration unit consisting of the W/2 NW/4 of said Section 21 and the NE/4 of said Section 16 to be dedicated to applicant's State "A" a/c-1 Well No. 2 located in the SE/4 NW/4 of said Section 21, and the third unit is an 80-acre non-standard proration unit consisting of the W/2 NW/4 of said Section 21 to be dedicated to applicant's State "A" a/c-1 Wells 4 and 5 located respectively in the NW/4 NW/4 and the SE/4 NW/4 of said Section 21.

A Yes, sir.

Q Now, refer to what has been shown on Exhibit No. 1, and state what that is, please.

A Exhibit No. 3 is denoted by the orange line on Exhibit No. 1, and starts with Continental's Steven "A" Well No. 1 located in the NE/4 of the NE/4 of Section 20, and includes Continental's Steven "B-20" Well No. 2. T. P.'s State "A" Account 1 Well No. 1, and T. P.'s State "A" Account 1 No. 3.

Q Is that the cross section that is shown in orange on Exhibit No. 1?

A Yes, sir.

Q Now, refer to Exhibit No. 1, state what that is please.

A Exhibit No. 4 is shown by a blue line in Exhibit No. 1 and includes two wells; Sinclair's Federal 714 Well No. 4, located in the NE/4 of the SW/4 of Section 20, and also includes T. P.'s State "A" Account Well No. 1 No. 2 in Section 21.

Q Is that cross section in blue on Exhibit No. 1?

A Yes, sir.

Q Now, Mr. Yuronga, it would appear from your application here that the acreage you are now seeking to dedicate to a gas well or wells in the pool, which is not presently being dedicated, is the SW/4 of Section 20.

A Yes, sir.

Q And 1/4 of the NE/4 of Section 21. Is that correct?

A Yes, sir.

Now, referring, as you did refer to the cross sections which you have prepared, together with any other information or information that you may have, why do you believe that undiluted acreage may reasonably be presumed to be productive of gas from the Jarama Gas Pool?

A Referring to Exhibit No. 1, the productive zones as shown on this cross section are denoted by the yellow. There are three productive zones in the upper portion of the Yates, and these are traced through the wells included in this cross section from Sinclair's Federal 714 Well No. 3 down to T. P.'s State "A" Account 1 Well No. 2. It is quite apparent that this zone is, or these zones are productive of gas and can be traced through all of these wells. This same situation holds true for Exhibit 3 and 4 in regard to these productive zones. I would like to point out that in Sinclair's Federal 714 Well No. 1 --

Q Where is that situated?

A --which is located in the NE/4 of the SE/4 of Section 17, there is one zone opened. This zone is productive of oil, and this well is a top allowable oil well. However, I would like to point out that in the completion of Sinclair's Federal 714 No. 3, the zone that is opened in this perforated interval in the third zone is 1500-1510. It was sand oil treated with ten thousand gallons of oil and ten thousand pounds of sand. This zone tested fifteen hundred MCF per day, with three hundred and two barrels of liquid oil recovered, and had a GOR of a little over one thousand five

5  
hundred. Now, that is a report from the report to which I have  
about the date dated August the 22nd, 1937.

Mr. NUTTER: That's a test on the lower zone only.

A That's right, and after that it is apparent to me,  
at least, that Sinclair was looking for an oil well and consequently  
they plugged that off and perforated--that's the two upper zones  
and consequently got a gas well, so you have an oil well between  
two gas well, but you have gas up dip and gas down dip. Now, that  
is about the only point in regard to Exhibit No. 2. Now, in  
Exhibit 3 and 4, you will notice that the third zone is the one  
that is productive of oil and is opened, in Exhibit No. 3, that  
lower zone is opened in both Continental wells, and Exhibit No.  
4 you will note that that third zone is also opened in Sinclair's  
Federal 714 No. 4, however, none of these three wells have per-  
forated the upper two zones.

Q Mr. Yuronka, based upon your studies of the wells  
in this area, are you of the opinion that the 320-acre non-standard  
proration unit consisting of the SW/4 of Section 21 and the SE/4  
of Section 20 may be reasonably presumed to be productive of gas  
from the Jalmat Gas Pool?

A Yes, sir.

Q Do you believe that if this authority is granted,  
the proration unit established, that the gas may be produced  
from that gas proration unit without waste?

A Yes, sir, I do.

Q Do you believe that the proposed non-standard gas proration unit consisting of the E/2 NW/4 of Section 21 and the NW/4 of Section 20 may be reasonably presumed to be productive of gas from the Jalma Gas Pool?

A Yes, sir, I do.

Q Do you believe that if it is approved, that the allowable can be produced from that gas unit without waste?

A Yes, sir.

Q Do you believe that the proposed non-standard gas proration unit consisting of the E/2 NW/4 of Section 21 may be reasonably presumed to be productive of gas from the Jalma Gas Pool?

A Yes, I do.

Q Do you believe that if the authority is granted, the allowable may be produced from that unit without waste?

A Yes.

Q Will you state now a little bit about the producing capacity and deliverability of the wells which you intend to use as producing wells for each of these gas proration units?

A Before I do, though, as you will note, I haven't included wells No. 4 and No. 6 in these cross sections in regard to that 80-acre non-standard proration unit. However, I have checked the logs personally, and these wells can be correlated to Wells 8 and 9, and they are located in the same area. I'll state in my report that Wells 4 and 6 are in the same deliverability of

Q The well is located in the NW/4 of the NE/4 of Section 21, Township 23 South, Range 36 East, T. P.'s State "A" Account Well No. 2. In 1958 had a deliverability of 122.1. This well is located in the NW/4 of the SE/4 of Section 21, Township 23 South, Range 36 East. T. P.'s State "A" Account Well No. 4, which is located in the NE/4 of the NW/4 of Section 21 had a deliverability in 1958 of 95.32. Well No. -- T. P.'s State "A" Account Well No. 6, located in the SE/4, NE/4 of Section 21, in 1958, had a deliverability of 69.13.

Q Mr. Yuronka, do you know of your own knowledge whether or not offset operators were advised of this hearing?

A Yes, sir, they were all notified of our application.

Q Notified in writing of your application, were they notified?

A Yes, sir.

MR. CAMPBELL: I believe that's all I have at this time.

MR. NUTTER: Are there any questions of Mr. Yuronka?

MR. PAYNE: Yes, sir.

MR. NUTTER: Mr. Payne.

CHARLES CAMPBELL

MR. CAMPBELL

MR. NUTTER: Are there any questions of Mr. Yuronka?

Q. Now, you feel that you need the 35, 4 and No. 10, and both, didn't you, in this restricted 40-acre area, and that was the order to see, the 35, 4, 10, and No. 10, and you could produce the allowable from either one of them, is that right?

A. Well, with the deliverability involved, I don't see where it would make much difference in the production operation we have. It would amount to relatively the same. You could have 40-acre tract for ever and ever, and so on.

Q. That's what I am getting at. I am wondering, and you chose this route here to have the 40-acre tract collected for both wells as opposed to the 40-acre tract, correct?

A. There wasn't any particular reason for it.

MR. LAMBLE: That's all.

MR. NUTTER: Any further questions?

QUESTIONS BY MR. NUTTER:

Q. Mr. Vanden, is there anything that you know of in Southeast New Mexico that there is a gas field out there which is at a rather uniform level throughout the area?

A. Yes, sir, the gas field in the Permian Basin, and I think that's all.

THE COURT: All right, the case is closed.

BY MR. NUTTER: That's all, thank you.

Q Now, you said that the well was located in the  
area of the old well, and that the well was located in the  
area of the old well, and that the well was located in the

A Yes, sir.

Q Now, you said that the well was located in the

A Yes, sir.

Q Yes, sir.

Q Do you think that the well was located in the  
area of the old well, and that the well was located in the  
area of the old well, and that the well was located in the

A Yes, sir.

Q Referring to your testimony that the well was located  
in the area of the old well, and that the well was located in the  
area of the old well, and that the well was located in the

A Yes, sir.

Q Now, do you think that the well was located in the  
area of the old well, and that the well was located in the  
area of the old well, and that the well was located in the

A Yes, sir.

Q Now, you mentioned that the well was located in the  
area of the old well, and that the well was located in the  
area of the old well, and that the well was located in the

A Yes, sir.

Q Now, you mentioned that the well was located in the

A Yes, sir.

Q Now, did you observe that the cement was being pumped into the well during the drilling operation?

A Yes, sir, I did.

Q But if you had seen a cesspool or something along the cement, that you would have gotten a leaking well?

A Yes, sir.

MR. NUTTER: Any further questions of Mr. Vanden? If not, he may be excused.

MR. CAMPBELL: Just a moment. Did you say, were these exhibits prepared by you or under your supervision?

A Yes, sir, they were.

MR. CAMPBELL: I would like to offer Exhibit 1, 2, 3, and 4 in this case.

MR. NUTTER: Is there objection to the introduction of T. P.'s Exhibits 1 through 4? If not, they will be received as evidence. Does anyone have anything further they wish to offer in Case No. 111. Take the case under advisement and the hearing is adjourned.

Notary Public  
State of New Mexico

I, Joseph A. [Signature], Notary Public for the State of New Mexico, State of New Mexico, do hereby certify that the foregoing and attached transcript of hearing was reported by me in Stenotype and that the same was reduced to typewritten transcript by me and contains a true and correct record of said hearing, to the best of my knowledge, skill and ability.

DATED this 20th day of March, 1960, in the City of Albuquerque, County of Bernalillo, State of New Mexico.
