Mr. Dan Nutter Oil Conservation Commission P.O. Box 2088 Santa Fe, New Mexico 87501

Dear Mr. Nutter,

We notice that you have placed all of Section 12-10S-33E, Lea County, New Mexico in the nomenclature case for this month and are suggesting that all of Section 12 be placed in the Vada Penn Pool. The purpose of this letter is to support this proposal.

All the tests that we have run in the area - and we now have ten (10) producing Bough "C" wells - indicate a strong relationship between the wells that are drilled on 80 acres as well as the wells that are drilled on 160 acres and it is our opinion that one well drilled on 160 acres in this area will adequately drain the reserves.

If you would like to have any information that we have in this area in order to help substantiate your position that this acreage be placed in the Vada Penn, please advise and it will be forth coming.

Very truly yours,

CHARLES B. READ

Docket No. 27-68 9-18-68 Regular Hearing Case 3861(d)

Dear Mr. Porter:

Reference is made to the subject Case 3861 whereby the Commission is requesting the extension of the Inbe Permo-Pennsylvanian Pool of Lea County to include all of Section 25 and the N/2 and SE/4 of Section 36-10S-33E, NMPM. It is also noticed Case 3861(h) contains a request for the extension of the Vada Pennsylvanian Pool to include the N/2 Section 19-10S-34E.

Monsanto Company is the operator of leases consisting of the SE/4 Section 25-10S-33E, N/2 and SE/4 of Section 30 and the SE/4 of Section 19-10S-34E. We have recently finished drilling the TUC State Well No. 1 in the NE/NE Section 30-10S-34E, and are presently in the process of completing the well from the Bough "C" formation. Our plans are to itmediately develop the remaining leasehold interest for this Bough "C" reservoir.

It is requested that the Commission give consideration to include Section 25 and the N/2 Section 36-10S-33E in the Vada Pennsylvanian Pool instead of the Inbe Permo-Pennsylvanian Pool. It is also suggested that the Vada Pennsylvanian Pool be extended to include the S/2 of Section 19 and all of Section 30-10S-34E. This would require the East Inbe Pool, which presently contains one well, to be dissolved.

dissolved. It is our contention this Bough "C" reservoir should be developed on 160-acre spacing to prevent the drilling of unnecessary wells. Present development to date on Section 25 and N/2 of Section 36-10S-33E has been ch 160-acre spacing and Monsanto also intends to pursue development of its leasehold interests on 160-acre spacing in this area. Therefore, the extension of the Vada Pennsylvanian Pool to include these areas would be consistent with present development and should not result in any conflict of interest.
