MR. STAMETS: And the production from them, and so on?

A. Yes, sir.

MR. STAMETS: The witness is considered qualified.

Q. Mr. Singletary, would you refer to what we've marked as Exhibit Number One and identify that exhibit for us?

A. That is the application for multiple completion with attached lists, separate, of the offset operators that were notified of this application.

Q. What are the two zones involved?

A. Oil Center-Glorieta and Hardy-Drinkard.

Q. And both of these are oil zones?

A. Yes, sir.

Q. Okay. Would you turn to what we've marked as Exhibit Number Two, which is a schematic of the wellbore, and describe that for us?

A. That is an actual schematic of the wellbore, including all the casing settings depth, cement top. It also shows where the Model D packer is set; where the parallel anchor is set for the Glorieta short string in there; and it has all been tested and proven that there is no communication between the two zones, and they are completely

1 isolated.

2
3 Q This is a new well drilled as a dual
4 completed well?

5 A Yes, we drilled it as a dual.

6 Q It hasn't produced from any other zone?

7 A No, it hasn't produced anywhere else.

8 Q All right, sir, if you'll turn to Exhibit
9 Number Three and identify that?

10 A That's a plat showing the location of the
11 Wiser McQuatters No. 4 Well, which is located in Unit G, Sec-
12 tion 11, Township 21 South, Range 36 East.

13 Q The Glorieta is in the Oil Center-Glorieta
14 Pool and the Drinkard is the Hardy-Drinkard Pool?

15 A Yes, that's right.

16 Q And both of them are on 40-acre spacing?

17 A 40-acre spacing.

18 Q Turn to Exhibit Number Four and identify
19 that.

20 A That's New Mexico Oil Conservation Com-
21 mission Form C-102, showing the exact location of the
22 McQuatters No. 4 Well.

23 Q All right, sir, and Exhibit Number Five.

24 A Exhibit Number Five is the latest C-103
25 that describes the work that was done to this Glorieta well

1
2 in order to make the dual completion.

3 Q All right, sir, let me refer you to Ex
4 hibit Number Six, which has two parts to it, and ask you to
5 describe what you've done to insure that the two zones are
6 properly isolated and there's no communication across your
7 packer.

8 A In several occasions there I have tested
9 pressures on both zones, when I've had the Drinkard shut-in,
10 also after the Drinkard has flowed, during the flow period,
11 and after it has been shut again, and the pressures indicate
12 there is no communication at all between the zones. The
13 packer is completely sealed and has both zones isolated.

14 Q All right, sir, on page two of Exhibit
15 Number Six, your production information?

16 A Yes, it's production information which
17 was taken over a 5-day period. Of course the Drinkard well
18 has been on production considerably longer than that, but
19 production is pretty well established at from 15 to 16 barrels
20 of oil in the Drinkard and 13 - 14 barrels of oil in the
21 Glorieta.

22 Q In your opinion, Mr. Singletary, will
23 approval of this application be in the best interest of con-
24 servation, the prevention of waste, and the protection of cor-
25 relative rights?

1
2 A. Yes, it will.

3 Q. And were Exhibits One through Six prepared
4 by you or compiled under your direction and supervision?

5 A. Part of them were prepared by me and
6 part of them were under my direct supervision.

7 MR. KELIAHIN: We move the introduction
8 of Exhibits One through Six.

9 MR. STAMETS: These exhibits will be
10 admitted.

11 Are there any questions of the witness?
12 He may be excused.
