Recycling Facility and/or Recycling Containment

Type of Facility: Recycling Facility Recycling Containment*
Type of action: Permit Registration
 Modification Extension
 Closure Other (explain) _____

* At the time C-147 is submitted to the division for a Recycling Containment, a copy shall be provided to the surface owner.

Be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

1.
Operator: Enduring Resources, LLC (For multiple operators attach page with information) OGRID #: 372286
Address: 200 Energy Court, Farmington, NM 87401
Facility or well name (include API# if associated with a well): WLU 2309 24N Water Recycle Facility
OCD Permit Number: 3RF-29 (For new facilities the permit number will be assigned by the district office)
U/L or Qtr/Qtr SW/4 SW/4 Section 24 Township 23N Range 9W County: San Juan
Surface Owner: Federal State Private Tribal Trust or Indian Allotment

2.
 Recycling Facility:
Location of recycling facility (if applicable): Latitude 36.205958 Longitude -107.740891 NAD83
Proposed Use: Drilling* Completion* Production* Plugging*
**The re-use of produced water may NOT be used until fresh water zones are cased and cemented*
 Other, requires permit for other uses. Describe use, process, testing, volume of produced water and ensure there will be no adverse impact on groundwater or surface water.
 Fluid Storage
 Above ground tanks Recycling containment Activity permitted under 19.15.17 NMAC explain type _____
 Activity permitted under 19.15.36 NMAC explain type: _____ Other explain _____
 For multiple or additional recycling containments, attach design and location information of each containment
 Closure Report (required within 60 days of closure completion): Recycling Facility Closure Completion Date: _____

3.
 Recycling Containment:
 Annual Extension after initial 5 years (attach summary of monthly leak detection inspections for previous year)
Center of Recycling Containment (if applicable): Latitude 36.205958 Longitude -107.740891 NAD83
 For multiple or additional recycling containments, attach design and location information of each containment
 Lined Liner type: Thickness 45 mil LLDPE HDPE PVC Other _____
 String-Reinforced
Liner Seams: Welded Factory Other _____ Volume: 265,385 bbl Dimensions: L 350' x W 400' x D 25'
 Recycling Containment Closure Completion Date: _____

4.

Bonding:

Covered under bonding pursuant to 19.15.8 NMAC per 19.15.34.15(A)(2) NMAC (These containments are limited to only the wells owned or operated by the owners of the containment.)

Bonding in accordance with 19.15.34.15(A)(1). Amount of bond \$ _____ (work on these facilities cannot commence until bonding amounts are approved)

Attach closure cost estimate and documentation on how the closure cost was calculated.

5.

Fencing:

Four foot height, four strands of barbed wire evenly spaced between one and four feet

Alternate. Please specify 8' Tall Chain Link Fencing

6.

Signs:

12"x 24", 2" lettering, providing Operator's name, site location, and emergency telephone numbers

Signed in compliance with 19.15.16.8 NMAC

7.

Variiances:

Justifications and/or demonstrations that the proposed variance will afford reasonable protection against contamination of fresh water, human health, and the environment.

Check the below box only if a variance is requested:

Variance(s): Requests must be submitted to the appropriate division district for consideration of approval. If a Variance is requested, include the variance information on a separate page and attach it to the C-147 as part of the application.

If a Variance is requested, it must be approved prior to implementation.

8.

Siting Criteria for Recycling Containment

Instructions: The applicant must provide attachments that demonstrate compliance for each siting criteria below as part of the application. Potential examples of the siting attachment source material are provided below under each criteria.

<u>General siting</u>	
<u>Ground water is less than 50 feet below the bottom of the Recycling Containment.</u> NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> NA
Within incorporated municipal boundaries or within a defined municipal fresh water well field covered under a municipal ordinance adopted pursuant to NMSA 1978, Section 3-27-3, as amended. - Written confirmation or verification from the municipality; written approval obtained from the municipality	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> NA
Within the area overlying a subsurface mine. - Written confirmation or verification or map from the NM EMNRD-Mining and Minerals Division	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within an unstable area. - Engineering measures incorporated into the design; NM Bureau of Geology & Mineral Resources; USGS; NM Geological Society; topographic map	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within a 100-year floodplain. FEMA map	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within 300 feet of a continuously flowing watercourse, or 200 feet of any other significant watercourse, or lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). - Topographic map; visual inspection (certification) of the proposed site	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within 1000 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application. - Visual inspection (certification) of the proposed site; aerial photo; satellite image	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within 500 horizontal feet of a spring or a fresh water well used for domestic or stock watering purposes, in existence at the time of initial application. - NM Office of the State Engineer - iWATERS database search; visual inspection (certification) of the proposed site	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Within 500 feet of a wetland. - US Fish and Wildlife Wetland Identification map; topographic map; visual inspection (certification) of the proposed site	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

9.

Recycling Facility and/or Containment Checklist:

Instructions: Each of the following items must be attached to the application. Indicate, by a check mark in the box, that the documents are attached.

- Design Plan - based upon the appropriate requirements.
- Operating and Maintenance Plan - based upon the appropriate requirements.
- Closure Plan - based upon the appropriate requirements.
- Site Specific Groundwater Data -
- Siting Criteria Compliance Demonstrations -
- Certify that notice of the C-147 (only) has been sent to the surface owner(s)

10.

Operator Application Certification:

I hereby certify that the information and attachments submitted with this application are true, accurate and complete to the best of my knowledge and belief.

REQUEST FOR EXTENSION

August 20, 2021

Victoria Venegas
New Mexico Oil Conservation Division
Artesia Office
811 South 1st Street
Artesia, NM 88210

Re: WLU 2309 24N Recycling Facility 3RF-29

Ms. Venegas:

Enduring Resources (OGRID 372286) respectfully requests a variance from the cessation of operation closure requirements in 19.15.31.13 NMAC for the WLU 2309 24N Recycling Facility 3RF-29 due to delays in approvals for upcoming work. Enduring will continue to maintain the recycling facility in a manner that ensures protection of fresh water, public health, and the environment.

Enduring Resources last recycled water out of the WLU 2309 Recycling Facility 3RF-29 pond on February 27, 2021. Enduring's current frac schedule does not allow for recycling operations at the WLU recycling facility until late September or early October 2021, therefore Enduring would like to request an extension on the cessation of operation. Enduring appreciates your flexibility and understanding in this matter.

Sincerely,

Deidre Duffy
Authorized Agent on behalf of Enduring Resources
WSP USA Inc.

Subject: 3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID fCS1828842180
Attachments: C-147 Extension approved. 3RF-29 - WLU 2309 24N – FACILITY ID fCS1828842180.pdf

3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#). Extension of the cessation of operations Approved.

Good morning Ms. Huntington,
 NMOCD has reviewed the determination of cessation of operations extension request for **3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#)**, received from [\[372286\]](#) ENDURING RESOURCES, LLC on August 20, 2021. The cessation for operations extension request is approved with the following conditions of approval:

- 3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#) permit expiration date is October 14, 2023.
- The 3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#) extension of cessation of operations is approved from August 1, 2021 through January 31, 2022.
- [\[372286\]](#) ENDURING RESOURCES, LLC must recycle at least 53,077 bbl of produced water no later than January 31, 2022, to be considered in operations.
- [\[372286\]](#) ENDURING RESOURCES, LLC will maintain a liquid level in the containment that is at least equal to the weight of the liner plus 20%. [\[372286\]](#) ENDURING RESOURCES, LLC may maintain a higher liquid level if they choose.
- Any withdrawal of fluid from the containment will negate this determination of the cessation of operations extension. Once the extension is negated and no longer in effect, an incremental fluid level test will be required.
- [\[372286\]](#) ENDURING RESOURCES, LLC will provide written notice to the OCD via [OCD Online](#) at least 72 hours, but no more than one week, prior to the incremental fill test and the recommencement of operations. Recommencement of recycling operations means that the operator plans to resume moving fluids through the containment and discharging fluids from the containment. The incremental fill test and notice of the test must be completed before fluids can move through the containment.
 - At the resumption of recycling operations, Enduring Resources is required to perform an incremental fluid level test for containment liquid levels above the minimum liquid level.
 - Enduring Resources will fill the containment. Enduring Resources will pause filling operations at every 10% of total fluid capacity above the minimum level.
 - Enduring Resources will maintain the liquid level for each 10% volume increase for 24 hours and inspect and operation the leak detection system at the end of the 24-hour period.
 - If there are no liquids present in the leak detection system, Enduring Resources may proceed to fill the next 10% volume and repeat the process until the containment full design capacity minus the 3-feet of freeboard is reached.
 - If liquids are present, Enduring Resources should immediately cease the incremental fill test and perform a liner inspection. Enduring Resources should provide written notice of the fluid detection and liner inspection findings to [OCD Online](#) using a C-147 (long form) with the “Other” box checked and “Notice of fluid detection” written as the explanation of “Other.”
- Upon notification of fluid detection in the leak detection system, the OCD will verify the source of water (condensation versus produced water).

- If the detected fluid is confirmed to be condensation, the OCD will issue a written approval to proceed with the incremental fluid level test.
 - If the detected fluid is confirmed to be produced water, Enduring Resources must comply with 19.15.34.13 NMAC. Enduring Resources must provide written notification via [OCD Online](#) on the actions taken to comply with 19.15.34.13 NMAC.
 - After fluid is detected in the leak detection system, the incremental fill test cannot continue until after a written approval to proceed is issued by the OCD.
 - Enduring Resources must submit copies of the detailed containment inspection records for the prior three (3) months and a report detailing the incremental fluid level test process and results to [OCD Online](#) using a C-147 (long form) with the "Other" box checked. "Recommendation of Operations - Incremental Fluid Level Test" should be written as the explanation of "Other." Form C-147 must be completed and include information in sections 1 General Information, 2 Recycling Facility, 3 Recycling Containment, 4 Bonding, and 10 Operator Application Certification. Section 9 Recycling Facility and/or Containment Checklist may also need to be partially completed. Operators should verify that the resumption of operations notification does not result in any changes to the recycling containment operating and maintenance plan or the closure plan. If the recommencement of operations will affect the operating and maintenance plan or closure plan, operators should check those boxes in section 9 and provide updated plans or plan addendums as attachments to the C-147.
- [\[372286\]](#) ENDURING RESOURCES, LLC will continue to operate, maintain, and close the 3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#) in compliance with 19.15.34 NMAC, to include but not limited to: detailed inspection records, removal of trash/oil from containment, and monthly C-148 reporting (even if there is zero activity).
 - Water reuse and recycling from 3RF-29 - WLU 2309 24N Recycling Facility – FACILITY ID [fCS1828842180](#) is limited to wells owned or operated by Enduring Resources OGRID 372286.
 - A minimum of 3-foot freeboard must always be maintained in the recycling containment during operations.
 - [\[372286\]](#) ENDURING RESOURCES, LLC should notify the surface owner of the cessation of operations extension request by October 30, 2020.
 - [\[372286\]](#) ENDURING RESOURCES, LLC may request a variance for an additional extension to the determination of cessation of operations, which will be reviewed on a case-by-case basis and evaluated on their merit. Extensions are considered for a maximum length of six months. Additional requests must be submitted to OCD via [OCD Online](#) on a Form C-147 (long form) as an Extension request and should include a variance request and summary per 19.15.34.16 NMAC and the detailed inspection records for the prior three (3) months. The extension request should be submitted no later than January 1, 2022.

Please let me know if you have any questions or concerns.
