

March 16, 2022

New Mexico Oil Conservation Division
Energy Minerals and Natural Resources Division
1220 South St. Francis Drive
Santa Fe, NM 87505

**Subject: Proof of Public Notice
Bloomfield Products Terminal
San Juan County, New Mexico
Discharge Permit Number: GW-001**

To Whom It May Concern:

On behalf of Western Refining Southwest LLC and Western Refining Terminals, LLC (collectively "Western"), WSP USA Inc. (WSP) is submitting this letter to submit proof of public notice for the Bloomfield Products Terminal (Site) Discharge Permit Renewal Application submitted to the New Mexico Oil Conservation Division (NMOCD) in February 2022. Public notice was provided for the submittal of the Discharge Permit Renewal Application in accordance with Subsection B of 20.6.2.3108 of the New Mexico Administrative Code (NMAC).

Attachment 1 provides photo documentation of the 2 by 3 feet signs posted at and near the Site providing a synopsis of the public notice in English and Spanish. One sign measuring at least 2 feet by 3 feet is displayed at the entrance to the Terminal facility located approximately 0.5 miles east of the intersection of Highway 550 and Country Road 4990 (located on the west side of the facility boundary and the north side of County Road 4990) and in a place conspicuous to the public. One additional 2 feet by 3 feet sign is displayed at the eastern boundary of the facility located approximately 1.25 miles east of the intersection of Highway 550 and Country Road 4990, at a location off-Site, and in a location conspicuous to the public.

Proof of mailings of the public notice to property owners within a 1/3-mile radius of the discharge area are included in Attachment 2. Lastly, proof of publication in the Farmington Daily Times is provided in Attachment 3.

If you have any questions or comments regarding this letter, do not hesitate to contact Devin Hencmann at (970) 903-1607 or at devin.hencmann@wsp.com.

Kind regards,

A handwritten signature in black ink, appearing to read 'Devin Hencmann', is written over a light blue circular stamp.

Devin Hencmann
Senior Geologist

NOTICE OF PUBLICATION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 of the New Mexico Administrative Code), the following discharge permit application has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3441:

NMOCD Discharge Permit Number GW-001, Western Refining Southwest LLC (Western) – Bloomfield Products Terminal, 50 County Road 4990, Bloomfield, New Mexico 87413, Mr. Gary Russell (678-594-6377, grussell@marathonpetroleum.com) announces the submittal of a renewal application for the Bloomfield Products Terminal (formerly known as the "Bloomfield Terminal") located approximately 1-mile southeast of the intersection of South Bloomfield Boulevard (Highway 44) and East Broadway Avenue (Highway 64), or east of Highway 44 on Road 4990 (NW/4 NE/4 S/2 NW/4, and the N/2 NE/4 SW/4 of Section 26, Township 29 North, Range 11 West, NMPM, San Juan County, New Mexico). Refining operations have ceased at the facility.

The facility is a crude oil and petroleum product transfer and storage facility. The facility stores and transfers crude oil and petroleum products (e.g., unleaded gasoline, diesel, and ethanol). Operations include petroleum products storage, pipeline shipping and receiving, and truck loading and unloading. The discharge permit renewal application is for a 5-year term during which non-hazardous industrial wastewater generated through terminal operation and remediation activities will be injected into the on-property NMOCD-permitted Underground Injection Control Class I (non-hazardous) disposal well (UICI-011 WDW-2). The well is located within the facility property boundary. There are wastewater ponds associated with the well, and other evaporation ponds equipped with aerators at the facility. The renewal application consists of methods and procedures that generate the wastewater, wastewater management, and site investigation/abatement. Any other wastes generated during facility operations will be temporarily stored in tanks or containers and shipped off-site for disposal or recycling at appropriate disposal facilities. The wastewater treatment system volume averages 65 gallons per minute (gpm) and water quality can be characterized by total dissolved solids (TDS) concentration of approximately 5,500 parts per million (ppm). Groundwater most likely to be affected by a spill, leak, or accidental discharge to the subsurface varies at depths ranging from 10 to 30 feet below the ground surface and contains TDS concentrations that vary across the property between 448 and 6,060 ppm. The discharge permit addresses how wastewater will be properly handled, stored, and disposed of, including response and abatement of spills, leaks, and other accidental discharges.

The NMOCD has determined the application is administratively complete and is in the process of preparing a draft permit. The NMOCD shall post notice on its website and distribute notice of the submittal of the renewal application to affected local, state, federal, tribal, or pueblo government agency, political subdivisions, ditch associations, and land grants as identified by the department, and persons on a general and facility-specific list maintained by the department who have requested notice of discharge permit applications. Interested persons may obtain information, submit comments, and request to be placed on a facility-specific mailing list for future notices. The NMOCD will also accept comments and statements of interest regarding the draft permit and will create a facility-specific mailing list for persons who wish to receive future notices. Prior to ruling on any proposed permit, the Director shall allow a period of at least (30) days after the draft permit is posted, during which time interested persons may submit comments.

Persons interested in obtaining further information, submitting comments, or requesting to be on a facility-specific mailing list for future notices may contact the Oil Conservation Division contact listed below:

AVISO DE PUBLICACIÓN

Por la presente se notifica que conforme a los Reglamentos de la Comisión de Control de Calidad del Agua de Nuevo México (20.6.2.3106 del Código Administrativo de Nuevo México), la siguiente solicitud para el permiso de descarga ha sido entregada al director de la División de Conservación de Petróleo de Nuevo México (NMOCD, por sus siglas en inglés), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Teléfono (505) 476-3441:

El Permiso de Descarga Número GW-001 del NMOCD, Western Refining Southwest LLC (Western) – Bloomfield Products Terminal, 50 County Road 4990, Bloomfield, New Mexico 87413, Mr. Gary Russell (678-594-6377, grussell@marathonpetroleum.com) anuncia la entrega de una solicitud de renovación para la Terminal de Bloomfield Products (anteriormente conocida como "Bloomfield Terminal") ubicada aproximadamente 1 milla al sureste de la intersección del Boulevard South Bloomfield (Carretera 44) y la Avenida East Broadway (Carretera 64), o este de la Carretera 44 en Road 4990 (NW/4 NE/4 S/2 NW/4, y el N/2 NE/4 SW/4 de la Sección 26, Municipio 29 Norte, Range 11 Oeste, NMPM, Condado San Juan, Nuevo México). Las operaciones de refinería han cesado en la instalación.

La instalación es una instalación de transferencia y almacenamiento de petróleo crudo y productos de petróleo. La instalación almacena y transfiere petróleo crudo y productos de petróleo (como gasolina sin plomo, diésel y etanol). Las operaciones incluyen el almacenamiento de productos de petróleo, envío y recepción del oleoducto, y carga y descarga de camiones. La solicitud de renovación del permiso de descarga es para un plazo de 5 años durante el cual las aguas residuales industriales no peligrosas generadas a través de las actividades de operación y remediación de la terminal serán inyectadas al pozo de desechos (no peligrosos) Control de Inyección Subterránea Clase I (UICI-011 WDW-2), con permiso NMOCD, ubicado en la propiedad. El pozo está localizado dentro de los límites de la propiedad de la instalación. Hay estanques de aguas residuales asociados con el pozo y otros estanques de evaporación equipados con aireación en la instalación. La solicitud de renovación consiste de métodos y procedimientos que generan las aguas residuales, el manejo de las aguas residuales, y la investigación y mitigación del sitio. Cualquier otro desecho generado durante las operaciones de la instalación se almacenará temporalmente en tanques o contenedores y será enviado fuera del sitio para su desecho o reciclado en las instalaciones de desecho apropiadas. El volumen del sistema de tratamiento de aguas residuales tiene un promedio de 65 galones por minuto (gpm) y la calidad del agua puede ser caracterizada por la concentración total de sólidos disueltos (TDS, por sus siglas en inglés) de aproximadamente 5,500 partes por millón (ppm). El agua subterránea con mayor probabilidad de ser afectada por un derrame, una fuga o un vertido accidental a la subsuperficie varía a profundidades de 10 a 30 pies bajo la superficie del suelo y contiene concentraciones de TDS que varían a través de la propiedad entre 448 y 6,060 ppm. El permiso de descarga aborda el manejo, almacenamiento y desecho apropiado de las aguas residuales, incluyendo la respuesta y mitigación de derrames, fugas o demás vertidos accidentales.

El NMOCD ha determinado que la solicitud está administrativamente completa y se encuentra en el proceso de preparación de un borrador del permiso. El NMOCD publicará un aviso en su sitio web y distribuirá el aviso de la solicitud para la renovación a las entidades y personas afectadas: agencias gubernamentales locales, estatales, federales, tribales o de pueblo, subdivisiones políticas, asociaciones rurales de agua, y concesiones de tierras, según identificadas por el departamento, y personas en una lista general y específica a la instalación, mantenida por el departamento, que solicitaron notificación de las solicitudes de permiso para descarga. Las personas interesadas pueden obtener información, enviar comentarios y pedir ser colocados en una lista de difusión específica a la instalación para recibir futuros avisos. El NMOCD también aceptará comentarios y declaraciones de interés en relación a el borrador del permiso y creará una lista de difusión específica a la instalación para las personas que deseen recibir futuras notificaciones. Antes de efectuar una decisión sobre cualquier permiso propuesto, el director debe permitir un período de por lo menos (30) días después de que el borrador del permiso sea publicado, durante el cual, las personas interesadas pueden entregar comentarios.

Las personas interesadas en obtener más información, entregar comentarios, o que solicitan ser colocados en una lista de difusión específica a la instalación para futuras notificaciones pueden comunicarse al contacto de la División de Conservación de Petróleo listada abajo:

Subject: WSP Public Notice Posting
Attachments: Final Bloomfield Terminal Public Notice.docx

[WSP USA | Confidential]

Hello,

I am reaching out to have a public notice posted in the Farmington Daily Times in the next week or two. If possible, we're hoping to have it posted one of the following weekend days: February 26th/27th or March 5th/6th. We need the ad in both English and Spanish, in a **display ad at least two inches by three inches not in the classified or legal advertisements section**. The said notice is attached. And, will you also send us an affidavit of the posting? Please let me know if you need anything else from me.

Thanks,

Cortney Cook
