

# NM1-62

## Sundance Services West Inc.

Approval, with  
conditions, of 2024  
Annual Report

December 24, 2025

March 17, 2025

Mr. Joe Kennedy  
State of New Mexico Energy, Minerals, and Natural Resources Department  
Oil Conservation Department  
1220 South St. Francis Drive  
Santa Fe, New Mexico 87505

Re: Response to Comments, NM1-62 2024 Annual Report  
Sundance Services West, Inc.

Dear Mr. Kennedy:

This letter provides Daniel B. Stephens & Associates, Inc.'s (DBS&A's) responses to comments received from the Oil Conservation Division (OCD) on February 17, 2025. Comments are reproduced in *italics*, with responses immediately following in regular text. The updated annual report is attached.

1. *SSWI's provided closure/post-closure cost estimate (Permit Condition 1H) does not accurately address all associated costs to close-out the facility. Some examples are as follows:*
  - *Task 4.1.2.1 in Attachment 4 calculates the soil amount based on filling each evaporation pond with only 2 feet of soil. However, in the design plans of the original application (see Sheet 17 of 19) soil excavation to construct each pond is shown at 5 to 7 feet.*

The Landfill Final Grading Plan (Sheet 5 of 19) provided with the application shows some soil placement in the evaporation pond, but does not appear to show the ponds being refilled to grade. The closure cost estimate of 2 feet of soil placement is consistent with the language of the closure plan.

- *Task 5.2.1 in Attachment 4 shows a quantity of 10 tanks. However, notes 2 and 3 discuss the closure of the 13 tanks.*

The cost estimate has been updated to reflect 13 tanks.

2. *SSWI's cost estimates for the mud management facility are based on closure in-place. This type of closure would require SSWI to submit an exception request to the OCD for approval. SSWI would need to demonstrate that closure in-place of the mud management facility provides equivalent protection of fresh water, public health, and the environment. SSWI needs to submit to the OCD, as a minor permit modification request, an updated closure/post-closure plan that includes associated exception requests and an updated comprehensive cost estimate.*

The costs to close the mud management facility were updated to reflect closure in place. The soil required to bury the existing structures is approximately 25,000 cubic yards (CY), and we assumed approximately 85,000 CY to place soil above the mud management area

Mr. Joe Kennedy  
March 17, 2025  
Page 2

and grade it to shed water to the edges of the mud management facility, minimizing infiltration. The volume in Section 5.1.2 has been updated, as has the footnote on the table. This change does not affect the areas assumed in Sections 5.1.3 or 5.1.4, as the footprint remains the same. The closure/post closure plan has been updated and provided under separate cover to reflect closure in place.

3. *SSWI did not include all inspections in the 2024 annual report. Permit Condition 2D requires "all inspection forms including those for leak detection systems along with analytical results" be submitted to the OCD in the required annual report.*

All inspection forms are included in Attachment 1 of the updated annual report.

Please let me know if you have any further questions.

Sincerely,

DANIEL B. STEPHENS & ASSOCIATES, INC.

Gundar Peterson, P.E.

Re: Updated NM1-62 2024 Annual Report  
Sundance Services West, Inc. Surface Waste Management Facility

To Whom It May Concern:

Sundance Services West, Inc. (SSWI) completed development of their Surface Waste Management Facility (SWMF) (NM1-62) in Lea County, New Mexico in 2018. SSWI has compiled the information in this letter and related attachments to satisfy the requirements of the required annual report due by September 1, 2024. This updated report addresses Permit Condition 2D, Annual Report, and then addresses the additional permit conditions issued on July 31, 2017. It also incorporates OCD comments.

Permit Condition 2D, Annual Report required the following:

*The operator must submit an annual report to the OCD by September 1st of each year providing the following information for the preceding year:*

*1) all inspection forms including those for leak detection systems along with analytical results*

Inspections of the evaporation pond leak detection systems, the process area leak detection system and the landfill leachate and leak detection system are conducted as required. The inspection forms, including those for leak detection systems, are provided in Attachment 1, along with analytical results.

*2) hydrogen sulfide monitoring results*

An updated version of the hydrogen sulfide prevention and contingency plan was submitted to OCD on August 11, 2022. No hydrogen sulfide incidents have been reported. Results for hydrogen sulfide monitoring for August 2023 through July 2024 are provided in Attachment 2.

*3) process piping integrity test results*

At this time, no process piping integrity tests are required.

Environmental Bureau, OCD  
March 17, 2025  
Page 2

4) *training records*

Documentation of training is provided in Attachment 3.

5) *complaint logs and resolutions*

At this time, no complaints have been received or logged for this SWMF; therefore, no resolution of complaints has been required.

and 6) *a summary of the nature and amount of any reportable releases*

At this time, no reportable releases have been identified; therefore, no summaries are provided.

The remaining permit conditions have been addressed as described in the following subsections.

***Permit Condition 1A, Permittee and Permitted Facility***

*OCD issues surface oil field waste management permit NM1-62 to Sundance West, Inc. (operator subsequently revised to Sundance Services West, Inc.), 1006 6th Street, Eunice, New Mexico 88231 for the construction, operation, and eventual closure of a commercial facility located upon a 320-acre tract in an unincorporated portion of Lea County, New Mexico approximately three miles east of Eunice.*

*The waste management facility is intended for the permanent disposal of exempt and non-exempt/nonhazardous oil field waste, and currently includes a processing area on 80 acres and a landfill on 180 acres. SSWI currently consists of 10 evaporation ponds. Not all 10 evaporation ponds are in use at all times. Most recently, one to two ponds are used for initial liquids storage, another pond is used for adding chemical flocculant, and one pond is used for clarification prior to liquid disposal off-site. The SSWI landfill consists of approximately 47.6 acres ± of lined Cells 1A, 1B, 1C, 1D, 2A, and 2B. SSWI also operates a mud management facility that accepts drilling muds to separate water and oil, stabilizes the muds with on-site soils, and dries the waste for landfill disposal.*

No action is required by SSWI relative to this condition.

***Permit Condition 1B, Scope of Permit***

*OCD regulates the disposition of water produced or used in connection with the exploration and production of oil and gas and to direct disposal of that water in a manner which will afford reasonable protection against contamination of fresh water supplies pursuant to authority granted in the Oil & Gas Act (Chapter 70, Article 2 NMSA 1978). Under that Act, OCD also regulates the disposition of nondomestic wastes resulting from exploration, production, or storage of crude oil and natural gas to protect public health and the environment. Similarly, OCD regulates the disposition of nondomestic wastes resulting from the oil field service industry, the transportation of crude oil*

Environmental Bureau, OCD  
March 17, 2025  
Page 3

*and natural gas, the treatment of natural gas, and the refinement of crude oil to protect public health and the environment pursuant to jurisdiction and authority granted by the same Act.*

*This permit does not convey any property rights of any sort or any exclusive privilege to the operator and does not authorize any injury to property or persons, any invasion of other private rights, or any infringement of state, federal, or local laws, rules, or regulations.*

No action is required by SSWI relative to this condition.

#### ***Permit Condition 1C, Owner/Operator Commitments***

*The operator must ensure that all operations are consistent with the terms and conditions of this permit and in conformance with all pertinent rules and regulations under the Oil & Gas Act. Furthermore, the operator shall abide by the approval conditions contained herein, along with all commitments submitted in its permit application of October 11, 2016 including any attachments and/or amendments all of which are incorporated into this Permit by reference.*

SSWI confirms that, to the best of their knowledge, their operations to date are consistent with the terms and conditions of Permit NM1-62 and in conformance with all pertinent rules and regulations under the Oil & Gas Act.

SSWI confirms that, to the best of their knowledge, they are abiding by the approval conditions contained within Permit NM1-62, along with all commitments submitted in the October 11, 2016 permit application, including any attachments and/or amendments, all of which were incorporated into Permit NM1-62 by reference.

#### ***Permit Condition 1D, Modifications***

*The operator must notify the OCD in advance of any increase in the land area the facility occupies, any change in the design capacity, any change in the nature of the oil field waste streams, or addition of a new treatment process. As a result, the OCD Director may require a modification in the permit conditions.*

SSWI has no current plans to increase the land area the facility occupies, change the design capacity, or change the nature of the oil field waste streams.

#### ***Permit Condition 1E, Definitions***

*Terms not specifically defined in the permit shall have the same meanings as those in the Oil & Gas Act or the rules adopted pursuant to the Act, as the context requires.*

No action is required by SSWI relative to this condition.

Environmental Bureau, OCD  
March 17, 2025  
Page 4

**Permit Condition 1F. General Performance Standards**

*The operator must operate in accordance with the permit conditions, comply with the Oil & Gas Act and rules issued pursuant to the Act, protect public health and the environment, prevent the waste of oil and gas, and prevent the contamination of fresh waters.*

SSWI confirms that, to the best of their knowledge, the SSWI SWMF has been operating in accordance with the permit conditions, complying with the Oil & Gas Act and rules issued pursuant to the Act, protecting public health and the environment, preventing the waste of oil and gas, and preventing the contamination of fresh waters.

**Permit Condition 1G, Effective Date, Expiration, Renewal, and Penalties for Operating Without a Permit**

*This permit is effective once OCD receives adequate financial assurance [see Section 1.H below] and will expire ten years thereafter. If it so desires, the owner/operator may submit an application for renewal to OCD no later than 120 calendar days before the expiration date. If the operator submits such a renewal application before the required date and is in compliance with the existing permit, then that existing permit will not expire until the OCD approves or denies the renewal application. Operating with an expired permit will subject the owner/operator to civil and/or criminal penalties (see Section 70-2-31 NMSA 1978).*

SSWI provided adequate evidence of financial assurance prior to the issuance of Permit NM1 62. This condition requires no further action at this time.

**Permit Condition 1H, Financial Assurance**

*The operator must provide financial assurance in a form acceptable to OCD for the waste management facility's estimated closure and post-closure cost. The initial financial assurance currently provided is \$1,048,311.00, which includes the cost of closure construction and post-closure operations for Phase I described in the application. On an annual basis, or should unforeseen conditions arise, the operator will update the closure/post-closure estimate and thus the amount of financial assurance.*

SSWI has reviewed required financial assurance provided in the amount of \$1,048,611.00 prior to the issuance of Permit NM1-62, and has taken into consideration the completion of the evaporation ponds, the jet-out facility and associated processing, and the drying pad. Based on our review of the required financial assurance, we have determined that with the addition of the referenced installations, SSWI will require financial assurance for closure and post-closure care in the amount of \$3,952,814. Upon concurrence by OCD that this represents adequate financial assurance for closure and post closure care, SSWI will plan to provide for the additional amount required. Attachment 4 provides the updated financial assurance estimate.

Environmental Bureau, OCD  
March 17, 2025  
Page 5

### ***Permit Condition 2A, Labeling***

*The operator must clearly label all tanks, drums, and other containers to identify the contents along with other emergency notification information. The operator may use a tank coding system if it is incorporated into their emergency response planning.*

SSWI has clearly labeled all tanks, drums, and other containers currently installed at the SWMF Processing Area.

### ***Permit Condition 2B, Inspections and Maintenance of Secondary Containment Systems***

*The operator must inspect all secondary containment systems and sumps at least monthly to ensure proper operation and to prevent over filling or system failure. The operator must empty all secondary containment systems of any fluids within 48 hours of discovery, notify the OCD, and initiate corrective actions. The operator must keep written records of its inspections and of any fluid analyses. The operator shall maintain and make the documentation available for OCD inspection.*

SSWI implemented the inspection of all secondary containment systems and sumps on a monthly basis upon the completion of the evaporation ponds, process area, and landfill cell to ensure proper operation and to prevent overfilling or system failure.

### ***Permit Condition 2C, Release Reporting and Corrective Action for Releases***

*The operator must comply with the spill reporting and corrective action provisions of the Oil & Gas Regulations (19.15.29 and 19.15.30 NMAC) as may be amended from time to time.*

SSWI confirms that, to the best of their knowledge, the SSWI SWMF is in compliance with the spill reporting and corrective action provisions of the Oil & Gas Regulations (19.15.29 and 19.15.30 NMAC).

### ***Permit Condition 2D, Annual Report***

This condition was previously addressed.

### ***Permit Condition 3A, Process, Maintenance, and Material Storage Areas***

*The operator must pave and curb all process, maintenance, and material storage areas at the facility excluding evaporation ponds, below-grade tanks, and sumps, or incorporate another appropriate spill collection device for these areas approved by the OCD.*

SSWI confirms that they have paved and curbed all process, maintenance, and material storage areas at the facility or have incorporated another appropriate spill collection device for these areas approved by OCD.

### ***Permit Condition 3B, Above Ground Tanks***

*The operator must place above ground tanks on impermeable pads and surround the tanks with lined berms or other impermeable secondary containment system having a capacity of at least one and one-*

Environmental Bureau, OCD  
March 17, 2025  
Page 6

*third times the capacity of the largest tank, or the combined volume of any interconnected tanks. This does not apply to tanks containing fresh water.*

SSWI confirms that they have placed aboveground tanks on impermeable pads and surrounded the tanks with an impermeable secondary containment system having a capacity of at least one and one-third times the capacity of the largest tank, or the combined volume of any interconnected tanks.

#### **Permit Condition 4A, Waste Streams**

*This permit authorizes the operator to handle the RCRA exempt streams. OCD approval must be obtained to receive any waste stream not specified in its application prior to collection, storage, treatment, or disposal.*

SSWI is currently handling only RCRA exempt waste streams.

#### **Permit Condition 4B, Waste Storage**

*The operator must store wastes at the facility only in clearly marked storage areas that have been specified in the application except any waste that may be generated during emergency response operations. However, such emergency waste may be stored elsewhere for no more than 72 hours. OCD may approve additional storage on a case-by-case basis.*

*The operator must not store non-oil field waste generated at the facility by the operator for more than 180 calendar days from the date any container is filled without OCD approval.*

SSWI is not currently providing waste storage at this SWMF.

#### **Permit Condition 4C, Class V Wells**

*Leach fields and other wastewater disposal systems at OCD-regulated facilities which inject non-hazardous fluids into or above an underground source of drinking water are Underground Injection Control Class V wells pursuant to 20.6.2.5002 NMAC. This permit does not authorize the use of a Class V injection well for the disposal of industrial waste at the facility. Other Class V wells, including wells used only for the injection of domestic wastes, must be permitted by the New Mexico Environment Department.*

The SSWI SWMF is in compliance with this permit condition.

#### **Permit Condition 5, Below Grade Tanks and Sumps**

*Below grade tanks and sumps must have secondary containment systems with leak detection and meet construction and operating requirements of 19.15.17 NMAC.*

SSWI confirms that they have provided secondary containment systems with leak detection that meet the construction and operating requirements of 19.15.17 NMAC for any below grade tanks and sumps.

Environmental Bureau, OCD  
March 17, 2025  
Page 7

#### **Permit Condition 6A**

*Prior to construction activities within the facility, the operator shall determine that all abandoned oil wells within the area are properly plugged in accordance with OCD regulations. If any wells are found to be unplugged or improperly plugged, the operator shall take the appropriate corrective actions.*

SSWI completed an evaluation of the site property to confirm that no abandoned oil wells were located in the areas proposed for development.

#### **Permit Condition 6B**

*Naturally Occurring Radioactive Material (NORM) waste cannot be accepted at the facility unless in compliance with 19.15.35 NMAC.*

SSWI confirms that they have not accepted naturally occurring radioactive material (NORM) at this facility.

#### **Permit Condition 6C**

*At least 30 days prior to the start of construction of the landfill, evaporation ponds, stabilization and solidification area, or process area the operator shall furnish OCD with a complete set of construction drawings including a major milestone schedule for construction. These construction drawings must substantially comply with the engineering design provided with the application and show the location of pond discharge for the purposes of identifying the location of the sacrificial liner. The major milestone schedule shall be updated throughout construction activities.*

SSWI confirms that they have no current plans to start any construction at this site.

#### **Permit Condition 6D**

*If disposal wells are to be incorporated into facility operations at a later date, those wells must be separately permitted under provisions of the New Mexico Underground Injection Control program.*

SSWI confirms that they have no current plans for the incorporation of disposal wells at this SWMF.

#### **Permit Condition 6E**

*Based upon the nature of the waste material and the lack of internal moisture, the operator in its application has stated the production of landfill gas should be negligible and thus no gas control system is required. However, continuous hydrogen sulfide monitors will be located across the facility with a 10-ppm alarm threshold. If OCD determines landfill gases are unreasonably problematic, a gas control system/plan will need to be implemented with OCD approval.*

Continuous hydrogen sulfide monitors are installed with a 10 parts per million (ppm) alarm threshold.

Environmental Bureau, OCD  
March 17, 2025  
Page 8

### **Permit Condition 6F**

*Given the significant depth to the uppermost aquifer beneath the facility, a groundwater monitoring program relative to that aquifer (19.15.36.14 B NMAC) is not herein required. However, as provided in the application, the operator shall monitor the vadose zone within a group of ten wells for the presence and quality of water that might emanate from the facility or otherwise appear as the result of stormwater infiltration. The operator shall notify the OCD prior to the installation of vadose zone monitoring wells not already in place. The final number and location of such wells may be modified by conditions encountered in the field. All groundwater samples must also be analyzed by EPA Method 8260 (full list) for volatile organic compounds in addition to those parameters outlined in the application.*

SSWI verbally notified OCD in March 2018 regarding the installation of vadose zone monitoring wells not already in place.

SSWI provided documentation confirming the installation of the vadose monitoring program in a completion report delivered to OCD on June 28, 2018.

SSWI has monitored the vadose zone wells, purging any liquids present, in an effort to sample these wells. To date, there has not been sufficient liquid present to properly sample any of the vadose zone wells.

### **Permit Condition 6G**

*The operator has proposed an alternative landfill design which incorporates a geonet layer rather than compacted soil within the leak detection portion (19.15.36.14 C.(3) NMAC), another geonet layer rather than compacted soil within the leachate collection and removal portion (19.15.36.14 C.(5) NMAC), and an evapotranspiration layer for the top landfill cover thereby eliminating the need for a synthetic hydraulic barrier layer beneath the cover and above the waste (19.15.36.14 C.(8) NMAC). The OCD hereby approves these alternatives as they are supported by numeric modeling provided within the application as allowed under 19.15.36.14 C.(9) and appear to provide equivalent protection of fresh water, public health and the environment.*

SSWI provided construction plans reflecting this design for the landfill liner in the August 1, 2017 submittal.

### **Permit Condition 6H**

*The operator in its application requested an exception to 19.15.36.13 I NMAC with respect to the protection of migratory birds. That exception is hereby granted. Rather than installing netting over the evaporation ponds, the owner/operator shall remove all oil from the water prior to discharge to the ponds and undertake daily inspections of the ponds for the presence of either oil or birds. Any oil found on the ponds will be removed immediately. If a consistent bird presence is noted, the operator will be required to implement more aggressive protective actions which may include the use of netting or screens.*

Environmental Bureau, OCD  
March 17, 2025  
Page 9

SSWI has been diligent with their oil management within the evaporation ponds, decanting liquids below the surface from the discharge ponds and collecting any oil observed on the evaporation ponds.

### Closing

We appreciate your review of this 2024 annual report for the SSWI SWMF (NM1-62). Please let us know if you have any questions regarding this information.

Sincerely,

DANIEL B. STEPHENS & ASSOCIATES, INC.
