| <b>Independent Project Manager &amp; Contract Administration Cost (10% of Task Totals)</b> |      |               |           | <b>\$104,116</b>   |
| <b>Total Cost</b>                                                                          |      |               |           | <b>\$1,145,281</b> |

**Notes:**

- Closure costs are based on contracting with a qualified third party to complete and certify closure. The activities included in this cost estimate are based on current dollars, previous experience with landfills located in arid climates, and current subcontractor costs.
- Final cover installation costs assume that:
  - The greatest area requiring final cover is 47.5 acres +/-, see Figure 1 for landfill area requiring final cover.
  - All soils necessary for closure construction are available on-site from the substantial lease area outside BLM mineral acreage.
- See Figure 1 for Disturbed Landfill Area to be Seeded
- Costs include taxes.
- CY = Cubic yard  
AC = Acre  
LS = Lump sum

Sundance Services West, Inc.

**Task 2.0: Landfill Maintenance**

## Notes:

1. Closure costs are based on contracting with a qualified third party to complete and certify closure.
2. Assume 1,000 gallons of residual water in each pond (10) transported up to 50 miles for disposal, 1 US Gallon = 0.024 Barrel.
3. Assume 6" of sludge remaining solids in ten ponds (bottom dimensions 348' \* 128') at closure transported up to 50 miles for disposal and specific gravity of sludge is 1.7, 1 ton = 2,000 lb.
4. Pond liner system (2 layers of 60 mil HDPE, 200 mil Geonet) will be removed and disposed during pond closure, 1 cubic yard = 27 cubic feet
5. Unit Cost includes Excavation and Transport of on-site soil to the ponds
6. Soil amount is calculated based on the amount needed to fill 2' of 10 evaporation ponds
7. Site sampling is conducted during the CQA phase
8. Per 19.15.36.18 D(4) and Hall Environmental analysis laboratory, unit cost per sample (sampling & testing) is \$1,000
9. See Figure 1 for Disturbed Pond Area to be Seeded
10. Costs include taxes.
11. CY = Cubic Yard  
AC = Acre  
LS = Lump Sum  
EA = Each Acre  
BBL = Barrel (US)

| Independent Project Manager & Contract Administration Cost (10% of Task Totals) |               |      |                              | \$80,123    |
| Total Cost                                                                      |               |      |                              | \$881,351   |

## Notes:

- Closure costs are based on contracting with a qualified third party to complete and certify closure.
- Assume 5' of liquid (residual water) in each tank (13) is transported up to 50 miles for disposal; tank Diameter 15', see Figure 2 for 13 Tanks, 1 cubic feet = 0.178 Barrel.
- Assume 6" of sludge remaining solids in each tank (13) at closure transported up to 50 miles for disposal and specific gravity of sludge is 1.7; tank Diameter 15', see Figure 2 for 13 tanks, 1 ton = 2,000 lb.
- Per Permit no liner removal is required. Assuming backfilling whole mud processing area with 10' of soil (area approximately 13.7 acres).
- Per 19.15.36.18 D(4) and Hall Environmental analysis laboratory, unit cost per sample (sampling & testing) is \$1,000. Assumes core drilling through concrete and sampling soils
- See Figure 1 for Disturbed Mud Management Facility Area to be Seeded
- Site sampling is conducted during the CQA phase
- Costs include taxes
- CY = Cubic Yard  
AC = Acre  
LS = Lump Sum  
EA = Each Acre

## Notes:

1. Pond and Treatment Plant closure maintenance costs are based on contracting with a qualified third party to conduct post-closure care maintenance. The activities included in this cost estimate are based on current dollars, previous experience with closures located in arid climates, and current subcontractor costs.

2. Costs include taxes

3. AC = Acre

RE: 2024 Annual Report for Permit NM1-62, Sundance Services West, Inc.

Dear Mr. Mussani:

The Oil Conservation Division (OCD) has reviewed Sundance Services West, Inc.'s (SSWI) 2024 Annual Report, resubmitted March 17, 2025, which addresses the permit conditions for the Sundance West Surface Waste Management Facility (SWMF) under permit NM1-62. This annual report has been evaluated for accuracy and compliance with the permit and Part 19.15.36 NMAC requirements. The OCD hereby approves the report with conditions.

The OCD's comments from a previous rejection letter, dated February 17, 2025, are followed by SSWI's comments (*italicized*) and the OCD response and conditions (in **bold**). Please note: for Permit Condition 1H, Financial Assurance (FA), OCD is not evaluating FA in this annual report because we received a revised Closure/Post-closure plan (CPCP) on June 13, 2025, and OCD is evaluating FA in that CPCP.

1. SSWI's provided closure/post-closure cost estimate (Permit Condition 1H) does not accurately address all associated costs to close-out the facility. Some examples are as follows:
  - Task 4.1.2.1 in Attachment 4 calculates the soil amount based on filling each evaporation pond with only 2 feet of soil. However, in the design plans of the original application (see Sheet 17 of 19) soil excavation to construct each pond is shown at 5 to 7 feet.

*The Landfill Final Grading Plan (Sheet 5 of 19) provided with the application shows some soil placement in the evaporation pond but does not appear to show the ponds being refilled to grade. The closure cost estimate of 2 feet of soil placement is consistent with the language of the closure plan.*

**On April 15, 2025, OCD rejected a permit minor modification/CPCP submitted March 28, 2025 that requested this backfilling plan. SSWI submitted a revised CPCP on June 13, 2025, which is**

**under review by OCD, that addresses backfilling of evaporative ponds, run-on/run-off design and associated estimated closure costs.**

2. SSWI's cost estimates for the mud management facility are based on closure in-place. This type of closure would require SSWI to submit an exception request to the OCD for approval. SSWI would need to demonstrate that closure in-place of the mud management facility provides equivalent protection of fresh water, public health, and the environment. SSWI needs to submit to the OCD, as a minor permit modification request, an updated closure/post-closure plan that includes associated exception requests and an updated comprehensive cost estimate.

*The costs to close the mud management facility were updated to reflect closure in place. The soil required to bury the existing structures is approximately 25,000 cubic yards (CY), and we assumed approximately 85,000 CY to place soil above the mud management area and grade it to shed water to the edges of the mud management facility, minimizing infiltration. The volume in Section 5.1.2 has been updated, as has the footnote on the table. This change does not affect the areas assumed in Sections 5.1.3 or 5.1.4, as the footprint remains the same. The closure/post closure plan has been updated and provided under separate cover to reflect closure in place.*

**On April 15, 2025, OCD rejected a permit minor modification/CPCP submitted March 28, 2025, stating OCD does not believe that this practice/alternative (burial in place) provides equivalent protection of fresh water, public health, and the environment compared to removing the known contaminated concrete and liner system and then conducting the required sampling to ensure clean closure. SSWI submitted a revised CPCP on June 13, 2025, with associated estimated closure costs, which are under review by OCD.**

If there are any questions regarding this matter, please do not hesitate to contact me at (505) 549-5583 or via email at [joseph.kennedy@emnrd.nm.gov](mailto:joseph.kennedy@emnrd.nm.gov).  
Respectfully,

Joe Kennedy • Senior Environmental Scientist
