BEFORE THE OIL CONSERVATION COMMISSION  
OF THE STATE OF NEW MEXICO

ORDER NO. A-196

STATEWIDE OIL PRORATION ORDER FOR MARCH, 1966

The Oil Conservation Commission held public hearing at Santa Fe, New Mexico, on February 16, 1966, at 9 a.m., pursuant to legal notice for the purpose of setting the allowable production of oil within the State of New Mexico for the month of March, 1966.

NOW, on this 17th day of February, 1966, the Commission, a quorum being present, having considered the testimony adduced as to probable market demand, the nominations of purchasers, the capacities of producing wells, together with the anticipated newly completed or recompleted wells, and being otherwise fully advised in the premises,

FINDS:

(1) That the reasonable market demand for oil produced in the State of New Mexico during the month of March, 1966, is approximately 412,133 barrels per day, which total includes a demand for approximately 382,307 barrels of oil per day from the counties of Lea, Eddy, Chaves, and Roosevelt, and a demand for approximately 29,826 barrels of oil per day from the counties of San Juan, McKinley, Rio Arriba, and Sandoval.

(2) That the potential producing capacity of all oil wells in the state is in excess of such reasonable market demand, and in order to prevent waste the production of oil should be limited, allocated, and distributed for the month of March, 1966.

(3) That all the producing oil wells, together with the expected completed or recompleted wells in the state within the proration period, can produce a total of approximately 412,133 barrels per day without causing waste, and an allocation based upon such production would be reasonable and would protect correlative rights.

(4) That the demand for oil from each of the above-described areas is separate and distinct and cannot be reasonably met by the production of oil from the other area, and that the production allowable for each of the said areas should be based upon the demand for oil from that area.

(5) That a total Southeast New Mexico production allowable of 382,307 barrels per day, which includes 5,000 barrels per day supplemental allowable for new production and 37 barrels per day of back allowable, can be produced without waste by a distribution and allocation of such production among the oil wells in Lea, Eddy, Chaves, and Roosevelt Counties, by the establishment of a normal unit allowable for those counties of 44 barrels per unit per day.

(6) That a total Northwest New Mexico production allowable of 29,826 barrels per day, which includes 500 barrels per day supplemental allowable for new production, can be produced without waste by a

distribution and allocation of such production among the oil wells in San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, by the establishment of a normal unit allowable for those counties of 70 barrels per unit per day.

(7) That application for back allowable totalling approximately 2191 barrels has been received by the Commission from Cities Service Oil Company operator in the Mescalero-San Andres Pool, Lea County, New Mexico, as the result of underproduction incurred as the result of the inability of Western Oil Transportation Company, Incorporated to truck oil due to road and weather conditions during November, 1965. That of said 2191 barrels of applied for back allowable, 28/59 or approximately 1036 barrels was authorized for production during February, 1966, and authorization for the remaining 31/59 deferred until a later date. That the remaining 31/59 of 2191 barrels of underproduction or approximately 1155 barrels should be authorized for production during March, 1966.

IT IS THEREFORE ORDERED:

(1) For the month of March, 1966, a normal unit allowable for production of oil in the allocated pools within Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, is hereby set at 44 barrels per unit per day; provided that each well in the Knowles Pool in Lea County, New Mexico, under 80-acre spacing Order No. R-40 (except as amended by Order No. R-52) is allocated 88 barrels per 80 acres, with deep-pool adaptation. Provided further that the top unit allowable for the North Mason-Delaware Pool in Lea and Eddy Counties, New Mexico, is hereby set at 27 barrels per unit per day, in accordance with the provisions of Order No. R-944. Provided further that the top unit allowable for the South Carter-San Andres Pool in Lea County, New Mexico, is hereby set at 40 barrels per unit per day in accordance with the provisions of Order No. R-1012. The allocation hereby set for said month in the allocated pools of Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, shall be in accordance with Rules 502, 505, and 506 of the Commission's Rules and Regulations, and subject to and as modified by any valid orders of the Commission relating directly to any well, areas, or pools, and the assignment of allowable thereto.

(2) A Southeast New Mexico proration schedule duly prepared by the Commission and thereafter adopted for the month of March, 1966, is hereto attached and made a part hereof. Said proration schedule distributes and allocates the allowable production among the oil wells in Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, for the period stated. The sale, purchase, or acquisition, or the transporting, refining, processing, or handling in any other way of oil produced in excess thereof is hereby prohibited, and such oil is thereafter contraband.

(3) For the month of March, 1966, 31/59 of 2191 or approximately 1155 barrels of supplemental allowable is hereby authorized for production at the rate of approximately 37 barrels per day by certain wells in the Mescalero-San Andres Pool, Lea County, New Mexico. The

ORDER NO. A-196

oil wells listed in this supplemental proration schedule are those top allowable wells which incurred underproduction as the result of purchaser prorationing by Western Oil Transportation Company, Incorporated, during November, 1965.

IT IS FURTHER ORDERED:

(1) For the month of March, 1966, a normal unit allowable for production of oil in the allocated pools within San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, is hereby set at 70 barrels per unit per day; provided that each well in the Bisti-Lower Gallup Oil Pool in San Juan County, New Mexico, to which has been dedicated 80 acres, is allocated 140 barrels per 80 acres, in accordance with the provisions of Order No. R-1069-B. The allocation hereby set for said month in the allocated pools of San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, shall be in accordance with Rules 502, 505, and 506 of the Commission's Rules and Regulations, and subject to and as modified by any valid orders of the Commission relating directly to any well, areas, or pools, and the assignment of allowable thereto.

(2) A Northwest New Mexico proration schedule duly prepared by the Commission and thereafter adopted for the month of March, 1966, is hereto attached and made a part hereof. Said proration schedule distributes and allocates the allowable production among the oil wells in San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, for the period stated. The sale, purchase, or acquisition, or the transporting, refining, processing, or handling in any other way of oil produced in excess thereof is hereby prohibited and such oil is thereafter contraband.

The foregoing order shall remain effective until further order of the Commission.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
