

**STATE OF NEW MEXICO
ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**CASE NO. 12219
ORDER NO. R-11245**

**APPLICATION OF YATES PETROLEUM CORPORATION FOR COMPULSORY
POOLING, CHAVES COUNTY, NEW MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This case came on for hearing at 8:15 a.m. on September 2, 1999 at Santa Fe, New Mexico, before Examiner Mark W. Ashley.

NOW, on this 8th day of September, 1999, the Division Director, having considered the testimony, the record and the recommendations of the Examiner,

FINDS THAT:

(1) Due public notice has been given and the Division has jurisdiction of this case and its subject matter.

(2) The applicant, Yates Petroleum Corporation ("Yates"), seeks an order pooling all uncommitted mineral interests from the surface to the base of the Abo formation underlying the following described acreage in Section 20, Township 7 South, Range 25 East, NMPM, Chaves County, New Mexico, in the following manner:

- (a) the SE/4 to form a standard 160-acre gas spacing and proration unit for any formations and/or pools developed on 160-acre spacing within that vertical extent, which presently include the Pecos Slope-Abo Gas Pool;
- (b) the N/2 SE/4 to form a standard 80-acre oil spacing and proration unit for any formations and/or pools developed on 80-acre spacing within that vertical extent; and
- (c) the NE/4 SE/4 to form a standard 40-acre oil spacing and proration unit for any formations and/or pools developed on 40-acre spacing within that vertical extent.

Note: After pooling, uncommitted working interest owners are referred to as “non-consenting working interest owners.”

(3) Yates controls 100 percent of the working interest underlying the N/2 SE/4 of Section 20 making it unnecessary to force pool those formations and/or pools spaced on 80 acres and 40 acres. Therefore, the portion of the application seeking to pool the proposed 80-acre (N/2 SE/4 of Section 20) and 40-acre (NE/4 SE/4 of Section 20) units should be dismissed at this time.

(4) The remaining 160-acre unit is to be dedicated to Yates’ proposed Reinauer “RC” Federal Com Well No. 3 to be drilled 1980 feet from the South line and 1000 feet from the East line (Unit I) of Section 20. This location is standard for the proposed 160-acre unit pursuant to the special pool rules governing the Pecos Slope-Abo Gas Pool set forth in Division Order No. R-9976-C.

(5) The applicant is a working interest owner within the proposed 160-acre proration unit and therefore has the right to drill for and develop the minerals underlying this unit.

(6) There are interest owners in the proposed 160-acre proration unit that have not agreed to pool their interests.

(7) No affected party or offset operator and/or interest owner appeared at the hearing in opposition to this application.

(8) To avoid the drilling of unnecessary wells, protect correlative rights, avoid waste, and afford to each interest owner in the unit the opportunity to receive without unnecessary expense its fair share of the production in any pool completion resulting from this order, this application should be approved by pooling all uncommitted mineral interests, whatever they may be, within the unit.

(9) Yates should be designated the operator of the well and unit.

(10) Any non-consenting working interest owner should be afforded the opportunity to pay its share of estimated well costs to the operator in lieu of paying its share of reasonable well costs out of production.

(11) Any non-consenting working interest owner who does not pay its share of estimated well costs should have withheld from production its share of reasonable well costs

plus an additional 200 percent thereof as a reasonable charge for the risk involved in the drilling of the well.

(12) Any non-consenting working interest owner should be afforded the opportunity to object to the actual well costs but actual well costs should be adopted as the reasonable well costs in the absence of such objection.

(13) Following determination of reasonable well costs, any non-consenting working interest owner who has paid its share of estimated costs should pay to the operator any amount that reasonable well costs exceed estimated well costs and should receive from the operator any amount that paid estimated well costs exceed reasonable well costs.

(14) Reasonable charges for supervision (combined fixed rates) should be fixed at \$4,000.00 per month while drilling and \$ 400.00 per month while producing, provided that this rate should be adjusted annually pursuant to Section III.1.A.3. of Exhibit "C" (*Accounting Procedure-Joint Operations*) to the Operating Agreement dated May 7, 1999, which was Yates Exhibit No. 4. The operator should be authorized to withhold from production the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not in excess of what are reasonable, attributable to each non-consenting working interest.

(15) All proceeds from production from the well that are not disbursed for any reason should be placed in escrow to be paid to the true owner thereof upon demand and proof of ownership.

(16) If the operator of the pooled unit fails to commence drilling the well to which the unit is dedicated on or before December 15, 1999, or if all the parties to this compulsory pooling reach voluntary agreement subsequent to entry of this order, this order should become of no effect.

(17) The operator of the well and unit should notify the Division in writing of the subsequent voluntary agreement of all parties subject to the compulsory pooling provisions of this order.

IT IS THEREFORE ORDERED THAT:

(1) All uncommitted mineral interests, whatever they may be, from the surface to the base of the Abo formation underlying the following described acreage in Section 20, Township 7 South, Range 25 East, NMPM, Chaves County, New Mexico, are hereby pooled in the following manner:

- (a) the SE/4 to form a standard 160-acre gas spacing and proration unit for any formations and/or pools developed on 160-acre spacing within that vertical extent, which presently include the Pecos Slope-Abo Gas Pool.

Note: After pooling, uncommitted working interest owners are referred to as “non-consenting working interest owners.”

(2) The 160-acre unit is to be dedicated to Yates’ proposed Reinauer “RC” Federal Com Well No. 3 to be drilled 1980 feet from the South line and 1000 feet from the East line (Unit I) of Section 20. This location is standard for the proposed 160-acre unit pursuant to the special pool rules governing the Pecos Slope-Abo Gas Pool set forth in Division Order No. R-9976-C.

PROVIDED HOWEVER THAT, the operator of the unit shall commence drilling the proposed well on or before December 15, 1999, and shall thereafter continue drilling the well with due diligence to a depth sufficient to test the Delaware formation.

PROVIDED FURTHER THAT, in the event the operator does not commence drilling the well on or before December 15, 1999, Ordering Paragraph (1) shall be of no effect, unless the operator obtains a time extension from the Division Director for good cause.

PROVIDED FURTHER THAT, should the well not be drilled to completion or abandoned within 120 days after commencement thereof, the operator shall appear before the Division Director and show cause why Ordering Paragraph (1) should not be rescinded.

(3) That portion of the application of Yates seeking to pool all formations and/or pools spaced on 80 and 40 acres from the surface to the base of the Abo formation underlying the N/2 SE/4 and NE/4 SE/4 of Section 20, respectively, is hereby **dismissed**.

(4) Yates Petroleum Corporation is hereby designated the operator of the well and unit.

(5) After the effective date of this order and within 90 days prior to commencing the well, the operator shall furnish the Division and each known non-consenting working interest owner in the unit an itemized schedule of estimated well costs.

(6) Within 30 days from the date the schedule of estimated well costs is furnished, any non-consenting working interest owner shall have the right to pay its share

of estimated well costs to the operator in lieu of paying its share of reasonable well costs out of production, and any such owner who pays its share of estimated well costs as provided above shall remain liable for operating costs but shall not be liable for risk charges.

(7) The operator shall furnish the Division and each known non-consenting working interest owner an itemized schedule of actual well costs within 90 days following completion of the well. If no objection to the actual well costs is received by the Division and the Division has not objected within 45 days following receipt of the schedule, the actual well costs shall be the reasonable well costs; provided, however, that if there is an objection to actual well costs within the 45-day period the Division will determine reasonable well costs after public notice and hearing.

(8) Within 60 days following determination of reasonable well costs, any non-consenting working interest owner who has paid its share of estimated well costs in advance as provided above shall pay to the operator its share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator its share of the amount that estimated well costs exceed reasonable well costs.

(9) The operator is hereby authorized to withhold the following costs and charges from production:

(a) the proportionate share of reasonable well costs attributable to each non-consenting working interest owner who has not paid its share of estimated well costs within 30 days from the date the schedule of estimated well costs is furnished; and

(b) as a charge for the risk involved in drilling the well, 200 percent of the above costs.

(10) The operator shall distribute the costs and charges withheld from production pursuant to this order to the parties who advanced the well costs.

(11) Reasonable charges for supervision (combined fixed rates) are hereby fixed at \$4,000.00 per month while drilling and \$400.00 per month while producing, provided that this rate should be adjusted annually pursuant to Section III.1.A.3. of Exhibit "C" (*Accounting Procedure-Joint Operations*) to the Operating Agreement dated May 7, 1999, which was Yates Exhibit No. 4. The operator is hereby authorized to withhold from production the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not in excess of what are reasonable, attributable to each non-consenting working interest.

(12) Any unleased mineral interest shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for the purpose of allocating costs and charges under this order.

(13) Any well costs or charges that are to be paid out of production pursuant to this order shall be withheld only from the working interests' share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(14) All proceeds from production from the well that are not disbursed for any reason shall immediately be placed in escrow in Chaves County, New Mexico, to be paid to the true owner thereof upon demand and proof of ownership. The operator shall notify the Division of the name and address of the escrow agent within 30 days from the date of first deposit with the escrow agent.

(15) Should all the parties to this compulsory pooling order reach voluntary agreement subsequent to entry of this order, this order shall thereafter be of no further effect.

(16) The operator of the well and unit shall notify the Division in writing of the subsequent voluntary agreement of all parties subject to the compulsory pooling provisions of this order.

(17) Jurisdiction is hereby retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
