Surface Owner: State Federal Tribal Private (Name: _____

Nature and Volume of Release

Materia	Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)								
Crude Oil	Volume Released (bbls)	Volume Recovered (bbls)							
Produced Water	Volume Released (bbls)	Volume Recovered (bbls)							
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	Yes No							
Condensate	Volume Released (bbls)	Volume Recovered (bbls)							
Natural Gas	Volume Released (Mcf) 448.28	Volume Recovered (Mcf) 0							
Other (describe)	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)							
G CD 1									

Cause of Release

The VRU at the compressor station could not handle the increase in flash gas. Intermittent venting occurred throughout the day and at 4:30 PM the compressor was shutdown.

Was this a major release as defined by	If YES, for what reason(s) does the responsible party consider this a major release?
19.15.29.7(A) NMAC?	N/A
🗌 Yes 🖾 No	
If YES, was immediate no	otice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

 \boxtimes The source of the release has been stopped.

The impacted area has been secured to protect human health and the environment.

Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.

All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Released material was not a liquid therefore the fourth option does not apply.

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

<u>Closure Report Attachment Checklist</u> : Each of the following ite N/A due to release report is a flare event.	ms must be included in the closure report.								
A scaled site and sampling diagram as described in 19.15.29.11	NMAC								
	Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office								
Laboratory analyses of final sampling (Note: appropriate ODC	District office must be notified 2 days prior to final sampling)								
Description of remediation activities									
	ediate contamination that pose a threat to groundwater, surface water, C-141 report does not relieve the operator of responsibility for ons. The responsible party acknowledges they must substantially ditions that existed prior to the release or their final land use in CD when reclamation and re-vegetation are complete.
