For this event, the operator could not have reasonably anticipated the current event and it was beyond the operator's control.	True
Please explain reason for why this event was beyond your operator's control	Lucid Energy Group pipeline had high line pressure. Due to this the Mulva Man Hands location was forced to flare. Lucid has had this issue for the past couple of weeks and has not given a timeline of when corrections will be made. This location is also experiencing flowback from numerous wells. Once flowback concludes, and the midstream company is corrected, the flaring should decrease back to regulated numbers.
