Steps and Actions to Prevent Waste

For this event, the operator could not have reasonably anticipated the current event and it was beyond the operator's control.	True
Please explain reason for why this event was beyond your operator's control	All field flaring a result of third party maintenance activity which operator was not able to predict
Steps taken to limit the duration and magnitude of venting or flaring	backed gas out of plant, resumed normal operations once third party maintenance was complete.
Corrective actions taken to eliminate the cause and reoccurrence of venting or flaring	There will likely be a reoccurrence during future third party maintenance events.
