Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Gas was routed to flare to protect personnel and equipment when a VFD failure on the fan caused compression to shut down. The VFD failure was caused by the power failure on 5/9, which was caused by the actions of a third party. This failure was outside Targa's control.
Steps taken to limit the duration and magnitude of vent or flare	Gas was flared until the VFD could be repaired and the fan could be returned to service.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	The VFD on the fan was repaired. Compression was restarted, and normal operations resumed. Flaring ceased.
